About the National Bank of Rwanda

The National Bank of Rwanda (NBR) was established in 1964 with the aim of issuing the Rwandan currency named Franc Rwandais (FRW). Over the years, the role of the NBR has evolved. The current Law N°48/2017 of 23/09/2017, as amended to date, delineates a clear mandate for the NBR.

The National Bank of Rwanda, as Rwanda's Central Bank, is responsible for ensuring price stability and maintaining a sound financial system contributing to sustainable and inclusive growth. Price stability is achieved through the implementation of appropriate monetary policy measures to foster a stable macroeconomic environment, while financial stability is maintained through the regulation and supervision of the financial system. NBR's regulatory duties encompass several sectors: banking, microfinance, insurance, pensions, payment systems, and non-deposit-taking institutions. Its supervision emphasizes prudential measures, consumer protection, market conduct, and financial integrity. By fulfilling its mandate, NBR promotes sustainable and inclusive growth.

NBR **MANDATE**

The National Bank of Rwanda, as Rwanda's Central Bank, is responsible for ensuring price stability and maintaining a sound financial system contributing to sustainable and inclusive growth. Price stability is achieved through the implementation of appropriate monetary policy measures to foster a stable macroeconomic environment, while financial stability is maintained through the regulation and supervision of the financial system.

NBR's regulatory duties encompass several sectors: banking, microfinance, insurance, pensions, payment systems, and non-deposit-taking institutions. Its supervision emphasizes prudential measures, consumer protection, market conduct, and financial integrity. By fulfilling its mandate, NBR promotes sustainable and inclusive growth.

KEY RESPONSIBILITIES

- Maintaining price stability
- Maintaining financial stability
- Developing and maintaining payment system resilience
- Contributing to the overall development of the financial sector
- Ensuring financial services consumer protection
- Minting and managing currency
- Holding and managing official foreign exchange reserves
- Acting as State Cashier
- Advising the Government on economic matters

VISION

To become a World-Class Central Bank

MISSION

To ensure price stability and a sound financial system contributing to sustainable and inclusive growth.

OUR CORE VALUES

- Integrity
- Collaboration
- Excellence

IDENTITY STATEMENT

The National Bank of Rwanda strives to be a World-Class Central Bank that contributes to economic growth & development, by using robust monetary policy and supervision tools to maintain price and financial sector stability. The Bank embraces innovations, diversity and inclusiveness, economic integration and ensures financial stability in a free market economy.

PERSPECTIVES

- Customer/Stakeholder
- Financial Stewardship
- Internal Business Processes
- Organization Capacity

STRATEGIC THEMES

Service Excellence

- Customers and stakeholders satisfaction
- Trust
- Improved efficiency

The Employer of Choice

- Employee satisfaction
- Higher retention rates
- Competitive advantage in attracting top talent.

Sustainable Strategic Partnership

- Create value addition to the Bank, stakeholders and broader community.

Governor's Foreword

The FY 2024/25 unfolded amid complex global and domestic challenges - persistent inflation, high interest rates, and a strong U.S. dollar - which placed pressure on currencies worldwide, including the Rwandan Franc. Geopolitical tensions, particularly in the Middle East, and climate-related shocks further tested global economic resilience.

Despite these headwinds, Rwanda demonstrated resilience and ambition. The economy maintained steady growth, driven by sound policy measures and key reforms. At the National Bank of Rwanda (NBR), we responded decisively through evidence-based monetary policy and research-driven decisions. During the year, the Central Bank Rate (CBR) was reduced from 7.0 percent in June 2024 to 6.5 percent in August 2024, reflecting easing inflationary pressures and improved domestic conditions. The rate remained unchanged through May 2025 as inflation stayed moderate. Headline inflation fell from 7.9 percent in FY 2023/24 to 5.7 percent, within our target range of 2-8 percent and near the medium-term goal of 5 percent.

On the foreign exchange front, the Rwandan Franc depreciated by 9.68 percent year-on-year against the U.S. dollar, a moderation from 12.59 percent in FY 2023/24. This improvement reflected a narrowing trade deficit, a softer U.S. dollar, and NBR reforms to curb foreign exchange market malpractice.

Thanks to coordinated policy efforts, Rwanda's economy recorded robust real GDP growth of 6.3 percent in FY 2024/25. The financial sector remained strong and well-capitalized, with total assets growing by 22.6 percent. We enhanced regulatory frameworks to address risks such as money laundering and cyber threats, safeguarding financial stability and integrity.

Total assets in the financial sector rose by 22.6 percent to FRW 14.3 trillion by June 2025. All sub-sectors experienced growth. The banking sector, which accounts for approximately 67.4 percent of the sector's assets, increased by 22.5 percent, mainly driven by higher deposits and capital accumulation. Meanwhile, the pension sector grew by 25.7 percent, and both the insurance and microfinance sectors expanded by 17.6 percent and 22.1 percent respectively. The sector remains well-capitalised and liquid, with all financial institutions holding buffers well above regulatory minimums.

Beyond ensuring stability, NBR focused on driving innovation and expanding financial inclusion. Rwanda's payment infrastructure remained reliable and resilient, supported by substantial growth in digital transactions. Mobile payments increased by 57 percent in value and 44 percent in volume, with mobile banking experiencing the highest growth—up 108 percent in value and 113 percent in volume. eKash services saw a remarkable 301 percent increase, reaching a total value of FRW 37.7 billion, contributing to

the country's digitization and financial inclusion initiatives. By June 2025, 20 participanting institutions had been onboarded for Person-to-Person (P2P) services, with 2.1 million active users and over 99 percent of eKash transactions completed via E-money issuers (payment service providers licensed to issue electronic money).

These developments were supported by improved digital infrastructure and awareness campaigns. We completed a feasibility study on the Central Bank Digital Currency (CBDC) and continued our efforts to modernise Rwanda's payments ecosystem. Financial inclusion reached 96 percent, up from 93 percent in 2020, largely driven by expanded access in rural areas through Umurenge SACCOs and greater adoption of digital financial services.

The Central Bank supported the full automation of Umurenge SACCOs, which was completed in June 2024. This milestone helped form stronger, more efficient institutions at district level. By June 2025, seven District SACCOs had been established from 99 Umurenge SACCOs.

This consolidation is expected to enhance service delivery, boost operational sustainability, and broaden access to financial services, especially in underserved areas.

Technology remained central to our institutional transformation. Through our five-year Digital Transformation Strategy, we delivered 75 percent of our first-year initiatives, including the deployment of a centralised business intelligence environment and improvements to the RIPPS platform. We also enhanced our cybersecurity frameworks, boosted system resilience, and modernised our internal operations with upgrade of the core banking system and launch of Forex API and BI tools to enhance real time data integration, analytics, and decision making across the financial sector. These developments have increased the Bank's agility, operational efficiency, and service delivery across all areas.

Looking ahead, the NBR remains committed to maintaining macroeconomic stability, advancing financial sector development, and promoting innovation to support Rwanda's vision for inclusive and sustainable growth.

The financial year 2024/25 was a period of strong performance for the Bank, highlighted by a 23 percent growth in the balance sheet and a 35 percent increase in equity. Net interest income rose by 54 percent, supported by prudent investments and favorable global market conditions. Despite a 19 percent rise in expenses from restructuring and digital transformation initiatives, the Bank achieved a robust surplus of FRW 150 billion. In addition, the Bank registered a clean audit report, demonstrating effective financial management practices.

I extend my sincere gratitude to the Board of Directors, Management, and staff of the National Bank of Rwanda for their professionalism and dedication, which have been vital to our success and will continue to guide our progress.

I also want to acknowledge former Governor Hon. John RWANGOMBWA, whose two-term leadership established a solid base for NBR's performance and ongoing developments. We also appreciate our former Deputy Governor, Right Honorable Dr. Justin NSENGIYUMVA, Prime Minister of Rwanda, for his meaningful contributions to the institution.

Together, we will continue fostering an economy that is resilient, innovative, and poised for sustained growth.

Soraya M. HAKUZIYAREMYE
Governor and Chairperson of the Board of Directors

HIGHLIGHTS OF THE NBR STRATEGY 2024-2029

The 2024/25 Financial Year marks the first year of implementation of the NBR's Strategy 2024–2029. The summary of the strategy is outlined and illustrated in the strategy map below:

Strategic Objectives and Strategy Map	Measures	Targets	Initiatives
Stakeholders 	· Stakeholder satisfaction score · Stakeholder confidence rating · Inflation within the band · Ex-post inflation within the forecast band · Interbank rate evolving within the band · % of FIs meeting Financial Soundness Indicators · Risk Rating of Financial Institutions · Rate of Compliance with FATF standards · Maintain 4 months of imports cover · Return on investment of 20 basis points above the benchmark · % of adults formerly served · % of adults with transactions, credit and savings accounts · % of consumers satisfied with financial services	· Above 90% · Above 90% · 5%±3% · ≤ 2% · CBR ±1% · 100% (Banks) · Insurers (100%) · MFIs (100%) · Banks (Low) · Insurers (Low) · MFIs (Low) · Above 85%	· Establish Stakeholder Confidence Index · Strengthen Partnership · Implement Stakeholder Engagement Program · Integrate FPAS in monetary policy processes · Implement a research framework · Strengthen Advisory Role · Implement a data strategy and data governance framework · Deepen Financial Markets · Implement a comprehensive and harmonized RBS Program · Enhance Climate and Environmental Risk Management for Financial Sector · Establish Systems Security and Incident Response Coordination Mechanism · Implement a comprehensive Crisis Management and Resolution Framework · Implement legal, regulatory and supervisory frameworks for new trends and technologies · Implement Open Finance Framework · Promote Fin-Tech Star-ups · Conduct CBDC Research Project · Develop and Implement Financial Education Program · Develop capacity of financial sector professionals · Expand the scope of usage of financial inclusion data in policy making · Establish regulatory and supervisory systems for alternative financing · Develop and implement a Dispute Resolution Framework · Implement Gender Inclusion Financial Polices · Implement Payment Systems Interoperability · Establish an Innovation Lab
Financial Stewardship 	· Capital is over 10% of Monetary Liabilities · Cost to income ratio · Financial Asset Quality · % growth in the profitability of the Bank · Months of Imports cover · Above benchmark	· Over 10% monetary liabilities · Cost to income ratio: < 100% · Profitability Growth 65% · ≥4 months · ≥20bps	· Diversify Revenue Streams of the Bank · Implement Cost-Optimization Strategies · Implement Integrated Reporting for the Bank (ESG) · Digitalize Reserves Management · Diversify Portfolio Investments · Implement Appropriate Strategic Asset Allocation Framework · Strengthen NBR Policy Advice
Business Processes 	· % of re-engineered business processes · Level of Service availability · Compliance Score · Number of months of cash service · % Level of counterfeiting. · % level of Re-issuance. · Cycle time of payment services · % Reduction in manual adjustments	· Re-engineered processes 95% · Service availability 99.9% · Staff satisfaction at 90% · Staff turn-over at ≤ 2% · Compliance at 95% · Payment Processing error rate: 0%	· Re-engineer Business Processes · Mainstream Business Continuity Framework · Expand Cash Replenishment Framework · Establish business continuity Centre for currency. · Upgrade online Banking Services
Organizational Capacity 	· Compliance rate to safety, security and health standards · Cyber Maturity Level · Digital Solutions Utilization Score · IT Operations Maturity Level · Data and analytics maturity level · No of in-house developed solutions · % of IT Systems availability · % of Corporate Objectives Performance · % of Staff Objective Performance · Employee Competence Score · Staff Satisfaction Score	· Cyber Maturity Level 4 · Digital Utilization score: Above 95% · IT Maturity: Level 5 · Data Maturity: Level 5 · In house developed solutions: 10 · Competence score: above 25% · Staff satisfaction score: above 90%	· **Implement Organizational Transformation Initiatives** ✓ Develop NBR Culture Change Plan ✓ Establish NBR Brand Framework ✓ Implement Gender Mainstreaming Strategy ✓ Review Organizational Structure · **Develop Talent Management Framework** ✓ Establish and implement Leadership and staff development framework ✓ Establish NBR Academy ✓ Develop HR Metrix and Analytics tools ✓ Modernize NBR infrastructure · **Implement a digital transformation strategy** · **Establish a digital factory** · **Embrace cutting edge-technologies** · **Cloud Adoption** · **Implement a digital sobriety**

EXECUTIVE SUMMARY

This report reviews NBR's achievements in maintaining price stability and a sound financial system, highlights key milestones for FY 2024/25, and outlines future strategic goals.

Global growth is expected at **3.0%** in 2025

The domestic economy remains strong and is projected to sustain positive growth despite easing global stimulus measures. Global growth is expected at 3.0 percent in 2025, down from 3.3 percent in 2024 and below the pre-pandemic average of 3.7 percent. This slowdown reflects lingering effects of COVID-19, the Russia-Ukraine conflict, climate change, and trade tensions. Global inflation eased from 6.6 percent in 2023 to 5.6 percent in 2024, and is forecast to fall to 4.2 percent in 2025, still above pre-pandemic levels. Sub-Saharan Africa faces persistent inflation, averaging 18.3 percent in 2024, driven by food shortages and currency pressures.

Global oil prices projected to decline by **12.4% in 2025**

Commodity prices continue to decline, with global oil prices projected to decline by 12.4 percent in 2025 to USD 67.42 per barrel, while natural gas prices may rise slightly. Non-energy commodities are also expected to weaken as demand slows.

The **real GDP** grew by **6.3%** in FY 2024/25

Despite global challenges, the domestic economy proved resilient. Real GDP grew by an average of 6.3 percent, supported by robust performance in trade, financial services, ICT, professional services, and public administration.

Headline inflation increased from 4.9 percent in July 2024 to **7.0% in June 2025.**

This economic performance described above was achieved without triggering inflationary pressures. Although headline inflation increased from 4.9 percent in July 2024 to 7.0 percent in June 2025, it stayed within the 2-8 percent target range and stayed close to the medium-term goal of 5 percent during FY 2024/2025, with an average of 5.7 percent. The rise from July 2024 to June 2025 was mainly driven by increased costs from imports and domestic sources, affecting core areas like hotels and restaurants, along with higher prices for some international foods such as rice, sugar, and cooking oils during the same period. The NBR remains vigilant to risks, including adverse weather, which could impact inflation stability.

The **Central Bank Rate** (CBR) was lowered from 7% in June 2024 to **6.5%** in August 2024

The NBR's monetary policy decisions in FY 2024/25 were backed by extensive research, including eight research papers, eight policy briefs, and two international publications. This analytical foundation helped the NBR implement measures to control inflation aligned with global and local economic changes. The Central Bank Rate (CBR) was lowered from 7 percent in June 2024 to 6.5 percent in August 2024 due to subdued inflation. Despite improving conditions, the NBR saw no significant inflation risk and kept the monetary policy stable until May 2025.

By June 2025, **reserves** covered **4.8 months of imports**

During FY 2024/25, the Rwandan Franc depreciated by 9.68 percent year-on-year against the U.S. dollar, lower than the 12.59 percent recorded during the FY 2023/24. The slowdown in FRW depreciation was supported by a narrowing trade deficit, reforms in Rwanda's domestic foreign exchange market—including new rules banning and penalizing unauthorized foreign currency pricing- and a general weakening of the U.S. dollar worldwide.

The National Bank of Rwanda manages the country's foreign exchange reserves through a robust regulatory framework and adequate infrastructure to ensure enough reserves for imports, external shock resilience, and investment returns. In FY 2024/25, favorable global markets boosted NBR's investment returns to 6.315 percent, up from 4.06 percent the previous year. By June 2025, reserves covered 4.8 months of imports.

Newly designed Frw 5,000 and frw 2,000 banknotes

The Bank issued and reopened bonds for the government, supporting market development with a turnover of FRW 146 billion, up from FRW 54.7 billion last year. The active primary market and the financial literacy over the years continued to promote secondary market activities.

The Bank also introduced newly designed banknotes for the Frw 5000 and Frw 2000 denominations. It is worth noting that denominations are continually redesigned in response to technological, economic, political, and cultural developments.

Assets of the Financial Institutions **22.6%↑** June 2025 **FRW 14.3 trillion**

The financial sector, backed by strong economic growth and a stable regulatory environment, continued its growth trajectory and proved resilient to adverse shocks. Its total assets grew by 22.6 percent to FRW 14.3 trillion in June 2025, up from FRW 11.6 trillion in June 2024, surpassing the 20.9 percent increase observed the previous year.

Assets grew across all sub-sectors, with banks remaining the dominant player, holding about 67.4 percent of the total assets. The pension sector is second with 16.1 percent, followed by insurance sector at 8.5 percent and microfinance sector at 7.0 percent, Other institutions hold 1.0 percent. Bank assets increased by 22.5 percent, driven by deposits and capital growth. The pension sector expanded by 25.7 percent due to contributions and investment income. Insurance assets grew by 17.6 percent, supported by premiums and investments, while microfinance assets rose by 22.1 percent, primarily due to deposits and capital growth.

NBR **regularly supervised** financial institutions and payment systems

During FY 2024/25, the NBR regularly supervised financial institutions and payment systems to prevent systemic risks and maintain public confidence. By June 2025, institutions were well-capitalized, liquid, and viable for financing economic activities. The Capital Adequacy Ratios were 21.6 percent for banks and 34.7 percent for microfinances, well above the 15 percent minimum. Private insurers' solvency was at 215.5 percent, far exceeding the 100 percent minimum. This strong capitalization shows institutions can meet obligations, absorb losses, and operate without breaching regulations.

NBR **licensed 78 new non-deposit taking** financial institutions (NDFSPs)

NBR licensed 78 new non-deposit taking financial institutions (NDFSPs); 70 lending institutions, 5 TCSPs, and 3 debt collectors, increasing the total of supervised NDFIs to 152 entities with assets of FRW 126.9 billion serving over 11,000 customers. Assets grew 32.7 percent from FRW 95.6 billion in 2024. Supervisory efforts expanded in the foreign exchange sector with 48 inspections, focusing on governance, pricing, AML/CFT compliance. Despite challenges, the forex sector's assets rose 20.4 percent from FRW 12.1 billion to FRW 14.5 billion.

The sector's **liquidity buffers remained strong** with **LCR** for **banks** at **289.1%** by June 2025

Similarly, the sector's liquidity buffers remained strong, enhancing resilience to liquidity risk. The Liquidity Coverage Ratio (LCR) for banks stayed above requirements, at 289.1 percent by June 2025, well above the 100% minimum. Banks continued financing long-term assets with stable resources, with no funding pressures. The Net Stable Funding Ratio (NSFR) was at 150.5 percent, above the 100 percent requirement. For Non-Bank Financial Institutions, microfinance liquidity was 73.8 percent above the 30 percent requirement, while private insurers' ratio was 109.2 percent exceeding the 100 percent minimum.

NBR intensified efforts to enforce **consumer protection standards**

In FY 2024/25, NBR strengthened consumer protection through greater transparency, fairness, accountability, and compliance, using both on-site and off-site inspections. The 2024 General Financial Service Consumer Satisfaction Survey assessed changes over three years, highlighting awareness of rights, use of services, and remaining challenges.

By June 2025, **seven District SACCOs** had been established from 99 Umurenge SACCOs

To professionalise UMURENGE SACCOs, NBR, working with stakeholders, completed their automation in June 2024 and consolidated SACCOs at the district level. By June 2025, seven District SACCOs had been established from 99 Umurenge SACCOs. The merger enhances efficiency, expands financial access, diversifies products and strengthens sustainability.

Insurance strategic Initiatives

The NBR has made notable advances in bolstering the insurance and pension sectors through strategic initiatives and supervisory reforms. A key achievement was creating the insurance sector diagnostic report and drafting the National Insurance Strategy (NIS), which involved extensive stakeholders consultations and is now being finalized with an implementation plan. Regarding pensions, the Bank hosted a Pension Stakeholders' Engagement Week to raise awareness and expand coverage, showcasing sectoral innovations such as ESG integration, digital solutions, and customized pension products for underserved groups.

Launch of the **Financial Inclusion Dashboard**, which provides weekly supply-side data

Key initiatives in financial inclusion during the year included the launch of the Financial Inclusion Dashboard, which provides weekly supply-side data and is already used by over 2,500 users across 101 countries. Gender-focused programmes also expanded, notably the Gendana Konti project, under which 25,000 women were trained on the use of mobile money services, and 7,000 new mobile money users onboarded. In addition, through the Cenral Bank's coordination, Rwanda joined 28 countries in committing to increase funding to women owned enterprises by committing to the WE Finance Code.

Furthermore, Rwanda made significant strides in advancing financial inclusion, with 87.7 percent of adults (7.6 million people) holding active accounts across banks, SACCOs, MFIs, mobile money, and insurance as of June 2025. Mobile money continues to dominate, serving 68.5 percent of adults, followed by banks at 27 percent.

eKash services continued to register steady growth

301%↑ June 2025

FRW **37.7 Billion**

The eKash services continued to register steady growth expanding by 301 percent to FRW 37.7 billion in June 2025, supported by the digitization and financial inclusion initiatives on cashless for Rwanda's economic transformation program. The adoption of eKash services remains very high amongst the E-money issuers accounting for over 99 percent of eKash transactions.

Mobile payments services increased by **57% in value** and **44%t in volume**

Both large and retail payment systems remained stable and available, without major interruptions in electronic fund transfers services. Mobile payments services largely remained dominant, recording an increase of 57 percent in value and 44 percent in volume, while internet banking moderately grew by 7 percent in value and 15 percent in volume.

CBDC exploration by launching the **e-FRW proof-of-concept**

The Bank advanced its CBDC exploration by launching the e-FRW proof-of-concept to test feasibility, payment system integration, and legal frameworks. Meanwhile, the NBR finalized its Open Finance Roadmap to promote secure data sharing benefiting consumers.

In advancing financial innovation, collaboration was key. Indeed NBR partnered with Rwanda Finance Limited and the Global Finance and Technology Network for the Inclusive Fintech Forum 2025, gathering global leaders to discuss digital finance. Innovation was bolstered through the regulatory sandbox, admitting four new fintech solutions this year. These efforts showcase Rwanda's leadership in an inclusive, innovation-driven financial sector.

Launch of the **Financial Inclusion Dashboard**, which provides weekly supply-side data

The Bank launched several initiatives aligned with its goals in digital transformation, cybersecurity, and operational resilience of critical systems. It also upgraded its IT governance from COBIT5 to COBIT19 and successfully renewed its ISO 27001 certification to the 2022 version. Additionally, NBR provided cybersecurity awareness training to over 500 U-SACCO staff and internet banking users, increasing FinSOC integration coverage to 81 percent.

The core banking system was **upgraded** to comply with **ISO 20022 standards** for cross-border payments requirements

NBR enhanced data capabilities by establishing a central business intelligence environment and launched a Forex API for real-time exchange rates. The core banking system was upgraded to comply with ISO 20022 standards for cross-border payments requirements. Additionally, improvements were made to the Rwanda Integrated Payment Processing System (RIPPS) through integration upgrades and extended clearing sessions.

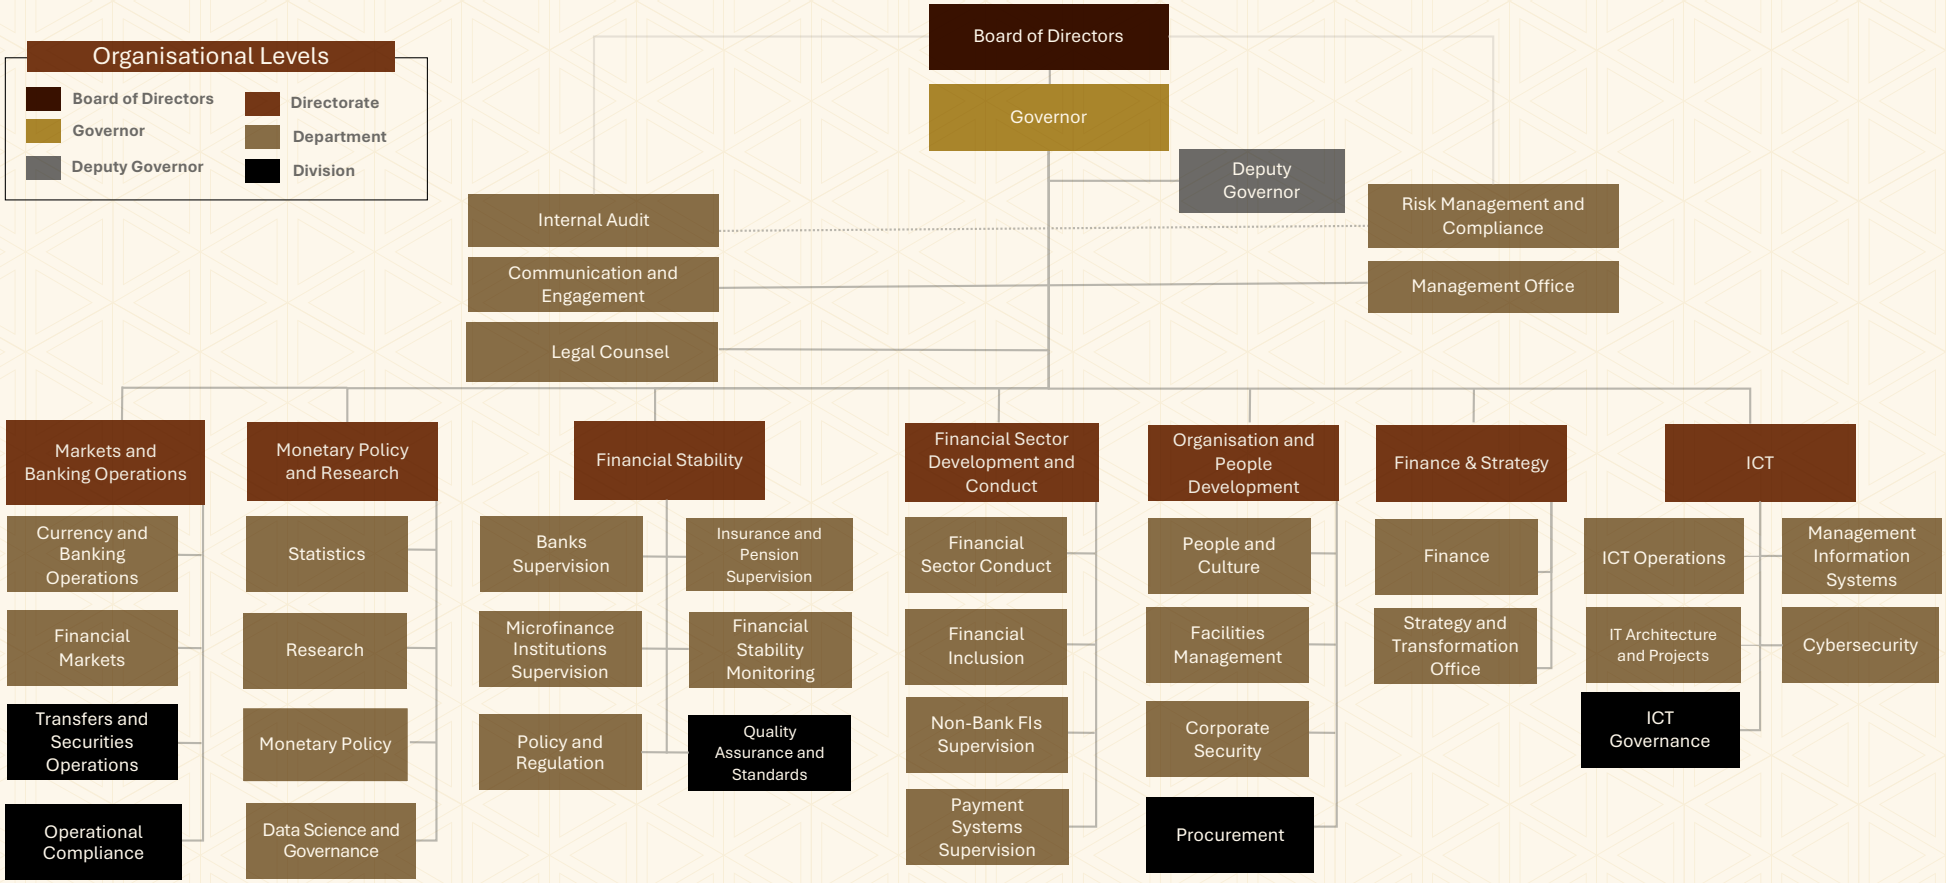
Aiming at safeguarding the financial system from climate and environmental risks, NBR implemented sustainability initiatives aligned to global best practices, by integrating Environmental, Social, and Governance (ESG) considerations into its core regulatory, supervisory, and operational mandates.

In closing, the financial year 2024/25 was a period of strong financial performance for the National Bank of Rwanda. The Bank's balance sheet expanded by 23 percent, supported by prudent investments and disciplined reserve management, while equity increased by 35 percent, reflecting strong earnings and sound asset revaluations. Net Interest Income surged by 54 percent, underpinned by prudent investments and favorable global market conditions

Despite a 19 percent rise in operating expenses, largely stemming from organizational restructuring and investments in digital transformation initiatives, the Bank maintained a solid financial position, achieving a surplus of FRW 150 billion. This performance underscores the Bank's commitment to prudent financial management, operational efficiency, and the pursuit of sustainable value creation amid a changing global environment.

NBR CORPORATE GOVERNANCE

ORGANISATION STRUCTURE



BOARD MEMBERS

Under the current law of the National Bank of Rwanda, the Board of Directors must include nine members: two executive roles (the Governor and Deputy Governor) and seven non-executive members. Currently, the Board is not fully formed because one member was appointed to the Cabinet.

The Board is responsible for defining the Bank's strategic direction and supervising its activities. In February 2025, Mr. John Rwangombwa concluded his term as Governor and Chairperson. He was succeeded by Ms. Soraya Hakuziyaremye, who had previously been Deputy Governor and Vice Chairperson. Additionally, Dr. Justin Nsengiyumva was appointed Deputy Governor and Vice Chairperson of the Board in the same month.

As of 30 June 2025, the Board consisted of the following members:

HAKUZIYAREMYE Soraya
Governor and the Chairperson of the Board
Date of Appointment:
25th February 2025
(previously served as Vice Chairperson and Deputy Governor since March 2021)

Dr. NSENGIYUMVA Justin
Deputy Governor and Vice-Chairperson of the Board
Date of Appointment:
25th February 2025

RUGWABIZA M. Leonard
Non-Executive Director
Date of Appointment:
04th November 2011

DUSHIMIRE Alice
Non-Executive Director
Date of Appointment:
04th March 2022

MURENZI Ivan
Non-Executive Director
Date of Appointment:
27th April 2018

NSENGUMUREMYI Cyridion
Non-Executive Director
Date of Appointment:
04th March 2022

KEZA Faith
Non-Executive Director
Date of Appointment:
27th April 2018

MUKETE DIKO Jacob
Non-Executive Director
Date of Appointment:
04th March 2022

The Board operates through four standing committees; each composed solely of non-executive members:

Legal and Regulatory Board Committee

The Committee assists the Board with matters related to NBR's compliance with legal and regulatory requirements, internal policies, and other legal issues as directed by the Board.

- **Mr. NSENGUMUREMYI Cyridion**
  Board Committee Chairperson
- **Mr. MUKETE DIKO Jacob**
  Board Committee Member

Strategy and ICT Board Committee

The Committee supports the Board on all strategic issues aimed at setting the Bank's strategic direction and ICT adoption. It provides guidance on developing, adopting, and updating the Bank's business plans to align with its overall strategy. Additionally, it offers advice on the ICT modernization agenda to enhance the Bank's business processes and service delivery.

- **Mr. RUGWABIZA Minega Leonard**
  Board Committee Chairperson
- **Ms. KEZA Faith**
  Board Committee Member
- **Ms. DUSHIMIRE Alice**
  Board Committee Member

Audit and Risk Board Committee

The Committee's primary responsibility is to assist the Board in establishing internal control mechanisms relating to financial management and reporting, risk management and compliance with relevant laws and regulations.

- **Ms. DUSHIMIRE Alice**
  Board Committee Chairperson
- **Mr. MURENZI Ivan**
  Board Committee Member

Human Resources Board Committee

The committee reviews the Bank's leadership needs, structure, size, and the required skills, salaries, and benefits for staff to ensure the Bank's remuneration remains competitive. It also provides strategic advice to the Board on succession planning and establishes the necessary HR policies.

- **Mr. MURENZI Ivan**
  Board Committee Chairperson
- **Ms. KEZA Faith**
  Board Committee Member
- **Mr. NSENGUMUREMYI Cyridion**
  Board Committee Member

The above committees are made up entirely of non-executive members. The Board holds regular quarterly meetings, called Ordinary meetings, as well as special meetings, known as extraordinary meetings. Additional meetings can be scheduled if necessary. In the financial year 2024/25, the Board of Directors conducted four ordinary quarterly meetings and four extraordinary meetings.

4 Ordinary quarterly meetings Conducted

Note: Attendance reflects the number of meetings held during each member's period of service.

BOARD COMMITTEES AND KEY ACHIEVEMENTS

The Committee reviewed and recommended the approval of the following:

Legal and Regulatory Board Committee

- Software License Governance Policy;
- Regulation on Administrative Sanctions for Banks;
- Revised Regulation on the Deposit Guarantee Fund;
- Regulation on Management of Inactive and Dormant Accounts;
- Demonetization of Old Banknote Series;
- Review of the Law Governing the National Bank of Rwanda
- Draft Law Governing the Resolution of Financial Institutions
- Revised Regulation Governing Foreign Exchange Operations
- Revised Currency Management Policy
- Regulation on Acquisition and Amalgamation of PSPs and PSOs

The Committee reviewed and recommended the approval of the following:

- NBR Business Plan Implementation Report for FY 2024/25
- NBR Annual Report for FY 2024/25
- Communication Strategy 2024/29
- Open Finance Implementation Roadmap
- Revised Project and Product Management Policy
- Business Cases and Project Closure Reports
- Strategic Plan 2024-29 and Alignment with NST2
- Business Plan and Budget for FY 2025/26
- Revised Budget, Business Plan and Procurement Plan for FY 2024/25

Strategy and ICT Board Committee

The Committee reviewed and recommended the approval of the following:

Audit and Risk Board Committee

- NBR Audited Financial Statements for FY 2023/24;
- Reappointment of External Auditors;
- Risk Exposure Status Reports for Q1, Q2, Q3, and Q4 for FY 2024/25;
- Internal Audit Activity Reports for Q1, Q2, Q3 and Q4 for FY 2024/25;
- Combined Assurance Framework and Revised Internal Audit Charter.

The Committee reviewed and recommended the approval of the following:

- Board Performance Evaluation Report for FY 2024/25;
- Appointments of Directors;
- Implementation of RSSB Pension Reform;
- Revised Staff Rules and New Organizational Structure;
- Salary Survey Report and Revised Compensation Policy
- Amendment to Fleet Policy
- Consolidated Fringe Benefits Package for Management

Human Resources Board Committee

POLICY COMMITTEES

Monetary Policy Committee

The MPC consists of nine members: The Governor, Deputy Governor, two Board members appointed by the Board of Directors, the Chief Economist, the Executive Director of Currency and Operations, the Executive Director of Financial Stability, the Director of the Monetary Policy Department, and the Director of the Research Department.

The Governor chairs all meetings. MPC meetings are held quarterly and can be convened more often if necessary to review the success of previous decisions and analyse the current economic conditions before making new ones. For transparency and accountability, a press conference is conducted after each meeting, during which the Governor announces the MPC's decisions to the public. In addition, MPC reports are published and accessible on the National Bank of Rwanda's website.

During FY 2024/25, the MPC gathered four times. In August 2024, they reduced the Central Bank Rate (CBR) to 6.5%, as inflation stayed within the 2 to 8 percent target range. The rate remained steady in the following meetings in November 2024, February 2025, and May 2025, due to signs of inflation stabilizing within the target band. Throughout this period, the committee carefully evaluated potential risks and external influences on the domestic economy, ensuring that monetary policy focused on maintaining price stability and fostering sustainable growth.

MPC and FSC Press Conference | May 2025

Financial Stability Committee

The Financial Stability Committee (FSC) is a regular forum that discusses financial stability topics, focusing on major risks to the financial systems and the measures to address them. It plays a vital role in supporting the NBR's mandate of maintaining a healthy financial system that promotes sustainable and inclusive growth. As a top authority, FSC makes decisions and sets policies to safeguard financial stability. Additionally, it provides advice on issues related to the stability of the financial sector, with the following responsibilities:

- Regularly review and ensure the soundness and stability of the financial system;
- Promote the stability of the Rwandan financial system by analyzing permanently the system in its environment;
- Identify, monitor and publish risks associated with financial systems to consider and take suitable actions to prevent, diminish and mitigate these risks; and
- Operate as a crisis management entity in times of financial stress.

Members of the FSC include the Governor as the Chairperson, Deputy Governor, Executive Director, Financial Stability Directorate, Chief Economist and Executive Director, Monetary Policy and Research Directorate, Executive Director, Markets and Banking Operations Directorate, Executive Director, Financial Sector Development and Conduct Directorate, Director, Financial Stability Monitoring Department. Director, Bank Supervision, Director, Insurance and Pension Supervision Department. Director, Microfinance Supervision Department, Director, Policy, and Regulations Department, Director, Payment System Department, Director, Market Conduct Supervision Department, Director, Non-Deposit Taking Financial Institutions Supervision Department.

During FY 24/25, FSC convened four times. Through press conferences, the chairperson of the committee communicated to the public the outcome of the meetings. The key recommendations from FSC meetings are as follows:

- Enhance financial intermediation: FSC assessed how banks' strategic plans are aligned with credit intermediation objectives and revised the FX directive to strengthen the intermediation.
- Fiscal consolidation: FSC evaluated the impact of reduced government domestic borrowing on financial institutions.
- FSC analyzed the implications of the new RSSB investment policy and contribution rates on long-term funding of public pension and market liquidity.
- FSC assessed the impact of reserve requirements on banks' liquidity measures and determined the optimal level needed to support monetary policy effectiveness, financial stability, and development initiatives.
- FSC analyzed the banking sector's exposure to Eurobonds amidst the projected rising global government debts.
- FSC analysed the viability of having a domestic reinsurance company
- FSC assessed challenges in consolidation of UMURENGE SACCOs

RISK GOVERNANCE FRAMEWORK

NBR encounters several risks in carrying out its mandate. To manage these effectively, it has created and enhanced a specialized function focused on enterprise-wide risk management, compliance, and the continuous operation of its essential services.

Guided by the Board of Directors, the risk management and compliance function operates within well-defined frameworks for Enterprise Risk Management (ERM), Compliance, and Business Continuity Management. This function, positioned as the second line of defense, collaborates closely with first-line business units that manage their individual risks, while the third line of defense is provided by Internal Audit. Through this structure, NBR ensures a consolidated, aggregated view of risks at the enterprise level, enabling comprehensive oversight and proactive mitigation.

Risk management is a shared responsibility across all staff, as potential risks can influence the bank's ability to achieve its strategic priorities. To promote consistency, the risk function facilitates collaboration among risk owners across different functions, aligning risk practices across the National Bank of Rwanda.

From a governance perspective, the function reports functionally to the Board's Audit and Risk Committee and administratively to Bank Management for day-to-day activities. The Board, through the Audit and Risk Committee, holds ultimate responsibility for overseeing, developing, and monitoring both the Risk Management, compliance and BCM frameworks.

The National Bank of Rwanda actively improves its risk management processes to stay ahead of changing global trends and emerging threats. During the past financial year, the Bank focused on reviewing and assessing emerging global risks, including those posed by artificial intelligence and other evolving technological and economic developments, ensuring it remains prepared to handle new and complex challenges. On the international level, it is part of the International Operational Risk Working Group (IORWG), a network of central bankers sharing global risk management best practices.

THE BANK RISK PROFILE

The National Bank of Rwanda manages several critical risks that stem from both its mandate execution and daily operations supporting its mission and vision. To monitor and assess these risks, the Bank employs Key Risk Indicators (KRIs) within its oversight framework. Every quarter, the risk profile assessment results are reported and reviewed by Management and the Board of Directors via the Audit and Risk Sub-Committee. This assessment tracks risk evolution, predicts possible trends, and identifies or recommends necessary risk responses. This process ensures risks stay within acceptable limits and enables prompt implementation of corrective or preventive measures.

The National Bank of Rwanda is also strengthening its proactive risk management capabilities by continuously refining its key risk indicator framework. This advancement supports the formulation of targeted action strategies designed to mitigate the likelihood or severity of potential risks.

Overall, the Bank's main risk exposures stayed within the pre-established limits throughout the entire financial year. The key risk exposures are categorised into five groups.

i. Operational risks

As a central bank, NBR is exposed to a wide range of operational risks that may lead to loss arising from shortcomings or errors in internal processes, human resources or internal systems, or derived from external circumstances.

Throughout the financial year, the Bank implemented diverse methodologies to keep these risks within established tolerance levels and actively tracked them using defined Key Risk Indicators (KRIs). The operational risk landscape covers among others, cyber security threats, third-party and vendor risks, risks related to data compromise, integrity, or quality, business continuity challenges, project execution risks, physical security concerns, operational errors, and matters affecting staff health and safety.

ii. Financial risks

NBR maintains a comprehensive risk management framework addressing key financial risks, including market, credit, and liquidity risks, to support the effective management of its international reserves and the achievement of its objectives. The Bank also conducts regular reviews to ensure that reserve management practices remain consistent with international standards and prevailing market conditions.

Over the past year, global financial markets continued to face significant uncertainty due to ongoing global inflationary pressures and geopolitical risks. In response, the Bank kept adjusting its investment strategies to manage these risks and minimize potential impacts on reserve management.

In managing international reserves, the Bank balanced safety, liquidity, and returns while also considering investment-related risks. These considerations were guided by approved benchmarks, risk appetite, and investment management guidelines, ensuring long-term risk and return objectives were maintained.

iii. Strategic risks

Strategic risks arise from potential missteps in decision-making, ineffective execution, or limited preparedness for changes in the business environment. These risks could affect the Bank's ability to implement its strategic and business plans as intended.

The Bank is exposed to regulatory, concentration/quality, and disruptive technology risks, all of which remain within the established risk appetite thresholds.

During the year, the Bank continued to improve the mechanism to monitor emerging disruptive technologies, allowing the Bank to proactively identify trends and adjust strategies. This approach supports the development of innovative products, services, and operational efficiencies, ensuring continued alignment with the Bank's strategic objectives.

iv. Reputational risks

Reputational risk refers to the potential harm to the NBR's public image and credibility among stakeholders, which could affect its capacity to uphold and execute its mandate. Such risks may arise from the erosion of trust, confidence, or key business relationships.

To safeguard its reputation, the Bank placed strong emphasis on proactive engagement with stakeholders. This was achieved through multiple communication platforms, including social media, ensuring the public remained informed about key developments, decisions, and the reasoning behind them.

v. Compliance risks

NBR is exposed to compliance risk though the execution of its mandate, this is the risk of sanctions, financial loss, or reputational damage the Bank may suffer due to its failure to comply with Internal and external compliance obligations.

Adherence to internal and external requirements was constantly monitored and corrective actions were immediately taken to ensure the conformity remained within the acceptable limits.

NBR continued to strengthen its mechanisms to monitor compliance by updating its compliance universe to ensure completeness and clear classification of all compliance requirements.

NBR demonstrated strong risk governance throughout the 2024/25 financial year, achieving its strategic goals within defined risk appetite levels.

The Bank remains committed to strengthening its risk management practices by implementing different established methodologies to cope with the ever-changing business environment and its emerging risks, continuing to uphold stability, resilience, and sustainable growth through its solid Risk Governance Framework.

NBR's risk management principles will continue to foster a robust, organization-wide risk culture, with accountability at all employee levels, active support from senior management, proactive management of risks across all activities and projects, and decision-making informed by accurate and comprehensive risk information.

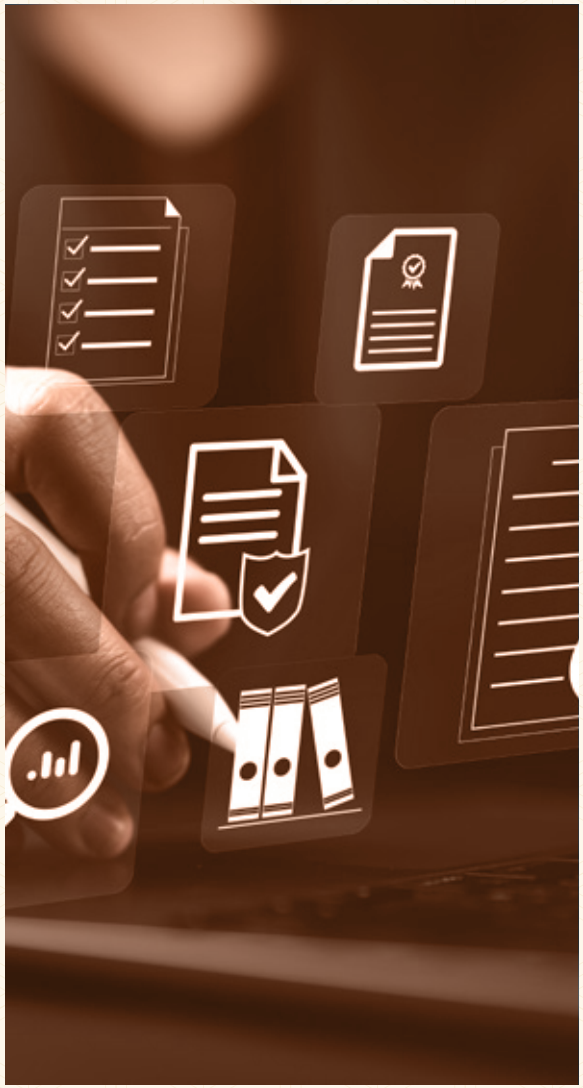
INTERNAL AUDIT FUNCTION

NBR continued its transformation journey into a proactive and agile control function, aiming to enhance the effectiveness of its internal controls.

Through the implementation of a Risk-Based Audit Approach (RBAA), the Bank concentrated its efforts on the early identification of critical and high-risk operational areas, thereby reinforcing sound governance, robust internal controls, and effective risk management.

During FY 2024/25, Audit activities were strategically aligned with the Bank's objectives, with particular focus on enhancing the accuracy of financial reporting, assessing governance frameworks, and ensuring compliance with policies and regulations. Additionally, Internal Audit conducted a review of business process effectiveness by identifying operational inefficiencies, control weaknesses, and gaps in policies and operating procedures throughout the Bank.

To this effect, timely internal audit opinions on operation and systems controls were delivered and actionable recommendations issued to the relevant auditees leading to enhanced workflow consistency, aligned decision-making mechanisms with strategic objectives, and improved efficiency. These efforts significantly contributed to proper safeguarding of the Bank's assets, increased stakeholders' confidence hence boosting financial integrity, transparency and operational resilience of the Bank.



As part of institutional strengthening, the Internal Audit function successfully developed and implemented a Combined Assurance Framework (CAF), approved by the Board in June 2025. In addition, the Internal Audit Charter was revised to align with the newly issued Global Internal Audit Standards (IIA, 2024) and NBR's strategic direction. The updated Charter strengthened the Bank's independence, clarified its mandate, and improved its responsiveness to new risks.

These updates guarantee that Internal Audit remains a strategic driver, dedicated to excellence, accountability, and ongoing improvement in line with the Bank's long-term goals. The Bank also maintained strategic collaborations with regional and global internal audit organisations and actively took part in their annual events. NBR is a member of the Institute of Internal Auditors in Rwanda (IIAR), which collaborated with others to successfully organize the inaugural African Federation of Institute of Internal Auditors

(AFIIA) conference and university, attracting over 1000 delegates from across Africa and beyond.

In terms of capacity building, substantial investments were made to enhance the skills and competencies of audit staff through targeted training, certification programs, and knowledge-sharing initiatives. Key focus areas included business continuity, foreign reserves management, cybersecurity, and artificial intelligence in auditing. These efforts kept the audit team well-equipped to handle a changing risk landscape, improving the Audit function's ability to provide relevant, forward-looking, and impactful services.

Looking ahead, the Bank will focus on key strategic initiatives to improve its effectiveness and value contribution. A main priority will be reviewing and refining the audit universe to ensure it remains aligned with the Bank's changing risk landscape, as part of strengthening the risk-based audit methodology.

The Bank will also work on advancing the implementation of the Combined Assurance Framework by actively engaging and coordinating with all assurance providers to streamline assurance activities, reduce duplication, optimise risk coverage, and enhance operational efficiency. In addition, the Bank will continue implementing digital transformation initiatives by automating core internal audit processes to improve service quality, boost efficiency, promote data-driven decision-making, and deliver greater value through more timely and insightful audit outcomes.

MONETARY POLICY

> The NBR's monetary policy aims to achieve price stability by maintaining inflation within the 2% to 8% range, targeting 5% over the medium term. This goal is pursued through a forward-looking, price-based monetary policy adopted in 2019. Under this monetary policy framework, the CBR is set based on the projected future path of inflation. The CBR and inflation projections are then communicated to the public after every MPC meeting to provide forward guidance and anchor inflation expectations.

MONETARY POLICY STANCE

Using its forward-looking, evidence-based monetary policy framework, the NBR formulated and implemented an appropriate monetary policy stance in line with global and domestic economic developments and outlook. In FY 2024/25, NBR maintained headline inflation within its target range of 2–8 percent, achieving 5.7 percent, down from 7.9 percent in FY 2023/24 and 18.2 percent in FY 2022/23. This decline was driven by a tight monetary policy stance implemented in the previous two financial years, disinflationary government measures, easing global pressures, and improved domestic agricultural conditions. With inflation expected to continue easing, NBR adopted a more accommodative stance, lowering the Central Bank Rate from 7.0 percent to 6.5 percent between July 2024 and June 2025.

GLOBAL ECONOMIC DEVELOPMENTS AND OUTLOOK

The world economy recorded a moderate growth of 3.3 percent in 2024, after a growth of 3.5 percent in 2023, and is projected to slow to 3.0 percent in 2025, but this projected growth remains below the pre-pandemic historical average of 3.7 percent, observed between 2010 and 2019. The slowdown of economic growth compared to the historical annual average growth is due to the long-term effects of shocks on the global economy, such as the covid-19, the Russia-Ukraine war as well as climate change, and the persistent heightened uncertainty stemming from trade tensions following USA's tariff policies.

According to the IMF, global economic growth is projected at

3.0%

in 2025

FROM

3.3%

in 2024

Growth for the Advanced economies stabilized at 1.8 percent in 2024 and is projected to slow to 1.5 percent in 2025, reflecting continued weakness in the manufacturing sector in some Euro area countries like Germany, as well as idiosyncratic factors.

Emerging markets and developing economies grew by 4.3 percent in 2024, lower than the growth of 4.7 percent recorded in 2023, and projected to slow to 4.1 percent in 2025, driven by weaker activity in the emerging and developing Asia, particularly China and India.

The Sub-Saharan African sub-region grew by 4.0 percent in 2024 after a growth of 3.6 percent in 2023 and is projected to remain stable at 4.0 percent in 2025, amid stable growth of the sub-region's major economy - Nigeria. Growth in Nigeria increased to 3.4 percent in 2024 from 2.9 percent in 2023, and is projected to remain stable in 2025, amid higher oil production.

Economic performance in the East African Community (EAC) countries was 5.4 percent in 2024, the same as in 2023, and is projected to slightly improve to 5.5 percent in 2025, following projected upgrades for most member countries compared to the previous year, supported by favourable weather in the first quarter of 2024 across the region.

The world annual average inflation decelerated to 5.6 percent in 2024 from 6.6 percent in 2023 and is projected to ease further to 4.2 percent in 2025, reflecting a broad-based decline in global core inflation, but remains above pre-pandemic levels of 3.4 percent (2017-19).

In advanced economies, consumer price inflation decelerated to 2.6 percent in 2024 from 4.6 percent in 2023, and is projected to ease to 2.5 percent in 2025, supported by stronger monetary policy frameworks and enhanced communications, but remaining above the target in most advanced economies.

In the emerging markets and developing economies, annual headline inflation eased to 7.7 percent in 2024, from 8.0 percent recorded in 2023, and is projected to ease further to 5.4 percent in 2025, reflecting falling energy and food prices, bringing inflation close to pre-pandemic levels for many countries.

In Sub-Saharan Africa, annual headline inflation remained in double digits rising to 18.3 percent in 2024 from 17.6 percent in 2023, following the projected higher inflation rates in some Sub-Saharan African countries, such as Zimbabwe, South Sudan, Burundi, Nigeria, Malawi, Angola and Ethiopia, where food prices have risen sharply due to local shortages and the impact of global food prices driven by exchange rate pressures.

On commodity markets, the overall commodity price index, which includes both energy and non-energy commodities, decreased in 2025, reflecting a slowdown in global demand. It decreased by 2.7 percent in 2024 after falling by 24.2 percent in 2023 and is projected to drop further by 12.4 percent in 2025, largely due to weakening global demand.

Energy prices decreased by 5.1 percent in 2024 after dropping by 29.9 percent in 2023, attributed mainly to the fall in crude oil and natural gas, and projected to decrease sharply by 17.4 percent in 2025. Crude oil prices decreased by 2.5 percent on average in 2024 compared to a drop of 16.8 percent in 2023. IMF projected oil prices to drop by 13.9 percent to USD 67.42/barrel in 2025 from USD 78.34/barrel in 2024, driven by weak Chinese demand and strong supply from outside OPEC+.

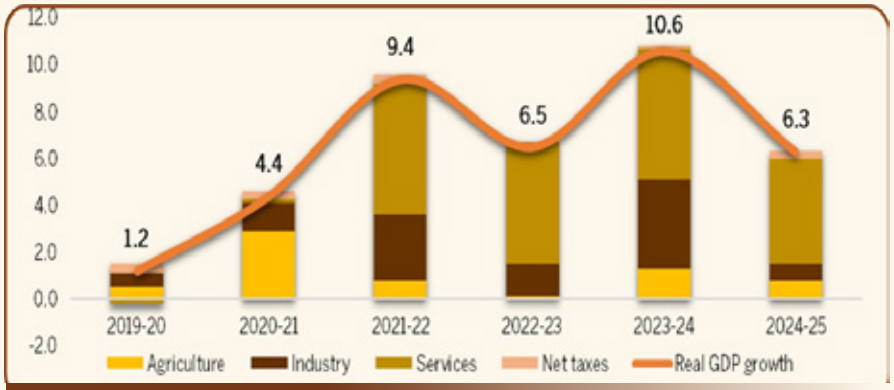
Natural gas average prices dropped by 15.0 percent in 2024 after dropping by 63.5 percent in 2023. World Bank projects natural gas average prices to increase by 4.6 percent in 2025, driven up by colder-than-expected weather and the halt of Russian gas flow to Europe through Ukraine since January 2024.

Non-energy commodity prices slightly increased by 1.9 percent in 2024 after decreasing by 9.7 percent in 2023, owing largely to higher prices across almost all components. They are projected to drop by 3.3 percent in 2025, reflecting the projected falling prices of all non-energy commodities.

DOMESTIC ECONOMIC PERFORMANCE

Rwanda's economy maintained a strong performance, underpinned by resilient domestic demand, rising investment, and steady gains across key productive sectors. Rwanda's economy continued to perform well, with real GDP growing by 6.3 percent in FY2024/25, after the 10.6 percent growth recorded in FY2023/24. The Growth in FY2024/25 was primarily driven by the services sector, which expanded by 8.6 percent on top of the 11.0 percent recorded in 2023/24. This outcome was driven by robust activity in trade, financial services, ICT, professional and technical services, and public administration.

Figure 1: GDP growth (% change)



Source: National Institute of Statistics of Rwanda

The industry sector experienced moderate growth of 3.2 percent compared to the 16.6 percent in 2023/24, supported by solid gains in manufacturing, reflecting strong demand for printing products and construction materials, partly driven by ongoing infrastructure projects. Conversely, growth in the construction sub-sector, contributing 50.0 percent to the output of industry sector, remained largely unchanged, mainly due to base effects from the completion of major projects in 2023/24, including the Amahoro Stadium.

The agriculture sector grew by 3.9 percent in 2024/25, slowing from 5.9 percent a year earlier. The outcome reflected modest harvests in Season B 2024 and Season A 2025, with food crop production increasing by just 0.3 percent, accounting for 57.3 percent of the agriculture sector. Conversely, there has been significant progress in export crops, livestock, and fishing subsectors, which grew by 10.9 percent, 12.5 percent, and 13.0 percent, respectively.

EXTERNAL SECTOR PERFORMANCE AND EXCHANGE RATE DEVELOPMENTS

The Merchandise trade deficit narrowed to 2.3 percent (to USD 2910.2 million in FY 2024/25 from USD 2844.9 million the previous FY) compared to growth of 32.6 percent from the previous FY. This Slowdown in pace was mainly driven by continued exports growth (10.5 percent), which outpaced the increase in imports (5.2 percent) As a result, the merchandise coverage of imports by exports strengthened by 1.8 percentage points, rising to 37.4 percent in 2024/2025 from 35.6 percent in 2023/2024.

Table 2: Trade Balance developments (Value in millions of USD)

	2020/21	2021/22	2022/23	2023/24	2024/25	% change FY 24/25

Source: National Bank of Rwanda

Total revenues from export of goods increased by 16.7 percent, to USD 3001.1 million in FY 2024/25, up from 2570.6 million in 2023/2024. Exports growth was largely driven by higher earnings from coffee (48 percent) and minerals (27 percent), good performance in manufacturing exports (24.2 percent) and supported by favorable global prices and higher export volumes.

On the import side, consistent with strong domestic economic activity, imports grew by 7.1 percent year-on-year in FY 2024/2025. The rise was largely attributed to an increase in food and capital goods imports. The growth in food imports was driven by core food items such as rice, sugar, and cooking oil, reflecting increasing domestic demand. The increase in capital goods imports was mainly driven by machinery and electronic imports, consistent with increasing investment and government initiative to increase telephone penetration.

The current account deficit (CAD) widened to USD million 1918.1 in 2024/2025, from USD million 1851.3 the year earlier, despite good performance of service exports and diaspora remittances. However, the balance of payments recorded sufficient capital inflows, notably government borrowings and FDI, to finance the CAD, allowing a buildup in foreign exchange reserves to reach 4.8 months of prospective imports as of end-June 2025.

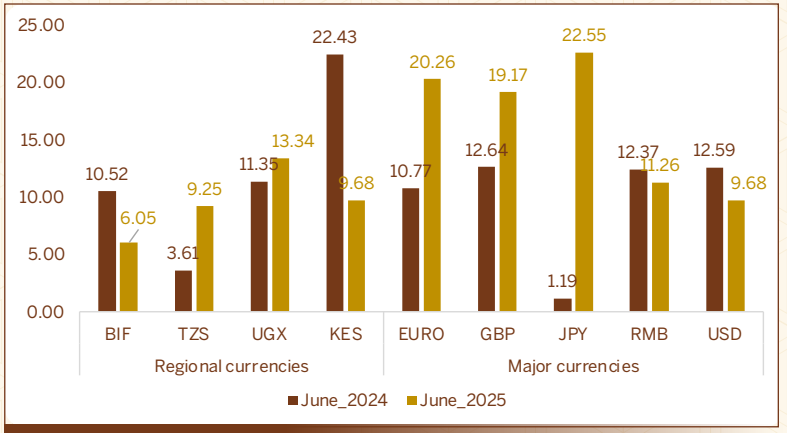
The Rwandan Franc (FRW) depreciated by 9.68 percent in FY 2024/2025 against the U.S. dollar compared to 12.59 percent in FY 2023/2024. This moderation was partially supported by improvements in the trade deficit, domestic foreign exchange market reforms aimed at addressing malpractices, and a broader weakening of the USD in global markets.

Furthermore, during the same period, the Rwandan franc experienced a faster pace of depreciation against several major currencies, weakening by 22.55 percent against the Japanese Yen, 20.26 percent against the Euro, 19.17 percent against the Pound Sterling, and 11.26 percent against the Renminbi. This trend was primarily driven by the strengthening of these currencies against the U.S. dollar, prompted by a decline in global investor confidence in U.S. assets following the announcement of new tariffs.

Compared to regional currencies, the Rwandan franc depreciated by 6.05 percent against the Burundian franc (BIF), a slower pace than the 10.52 percent recorded in the previous fiscal year. Against the Tanzanian shilling (TZS), the Rwandan Franc depreciated by 9.25 percent compared to 3.61 percent in the previous year. Against the Ugandan shilling (UGX), the depreciation slightly increased to 13.34 percent in FY2024/25 from 11.35 percent recorded during the previous year. The relative resilience of UGX was supported by strong remittance inflows, NGO receipts, offshore investments, and robust coffee export earnings.

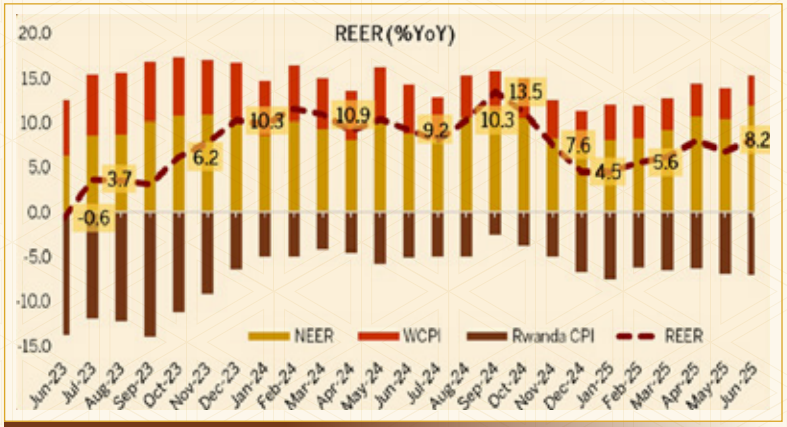
Meanwhile, the depreciation of the Franc against the Kenyan shilling (KES) decelerated to 9.68 percent, compared with 22.43 percent in the preceding fiscal year.

Figure 2 : Exchange rate (% changes Fiscal year)



Source: National Bank of Rwanda

Figure 3: Drivers of Real Effective Exchange Rate (REER) movement (y-o-y change)



Source: National Bank of Rwanda

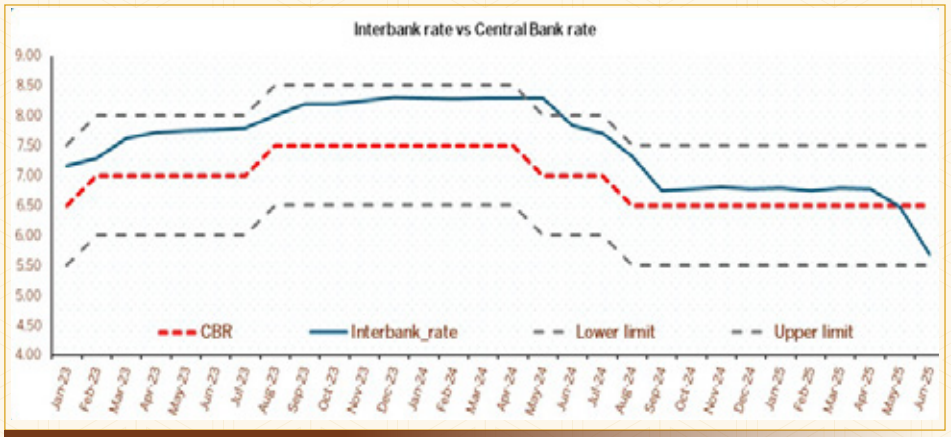
The value of FRW against a basket of currencies of 31 trading partners (nominal effective exchange rate-NEER) depreciated by 11.9 percent as of June 2025, compared to the 8.8 percent in June 2024. In terms of real effective value-REER (real effective exchange rates adjusted for inflation differentials), the FRW experienced a depreciation of 8.2 percent in June 2025, compared to the 9.2 percent observed in June 2024. This was primarily attributed to higher nominal effective depreciation and positive inflation differentials, following higher domestic inflation observed in June 2025, compared to the weighted foreign inflation of Rwanda's main trading partners.

MONETARY SECTOR AND INTEREST RATES DEVELOPMENTS

The National Bank of Rwanda relaxed its monetary policy during FY 2024/25 amid subdued inflationary pressures. Coupled with abundant liquidity in the banking sector, this resulted in a notable decline in the interbank rate, which fell by 139 basis points in FY 2024/25, averaging 6.78 percent compared to 8.17 percent in the previous year.

The deposit rate recorded a marginal decline of 1 basis point, averaging 10.02 percent in FY 2024/25. Likewise, the lending rate dropped by 14 basis points to 15.94 percent, down from 16.08 percent the previous year, largely reflecting improved liquidity conditions and a greater share of short-term corporate loans, which generally carry lower interest rates. Consequently, the spread between lending and deposit rates narrowed by 13 basis points. Furthermore, bond yields fell across all maturities during the period under review.

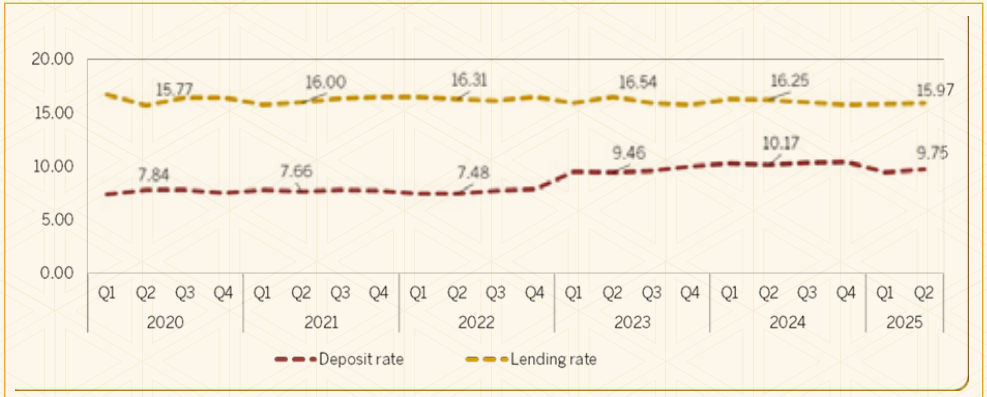
Figure 4: Money market interest rates developments



Source: National Bank of Rwanda

In Q4, 2025, the last quarter of the FY, the weighted average deposit rate dropped by 42 basis points to 9.75 percent, compared to the corresponding period last year. The decrease was mainly observed in term deposits, particularly at the 1-month, 6-month, and 12-month maturities. Similarly, lending rates decreased by 28 basis points to 15.97 percent in Q2, 2025. This downward trend was observed across short-term, medium-term, and long-term lending rates for both individual and corporate loans.

Figure 5: Deposit and lending rates



Source: National Bank of Rwanda

In line with the accommodative monetary policy, new authorized loans (NALs) continued to grow, though at a slower pace. In FY 2024/25, they increased by 6.52 percent to FRW 2,303.9 billion, compared to 33.0 percent in FY 2023/24. The slowdown reflects a base effect due to large projects financed in FY 2023/24 and moderately tighter terms and conditions applied by banks in FY 2024/25. Consequently, outstanding credit to the private sector increased by 16.8 percent by end-June 2025, from 22.4 percent growth in the same period of 2024.

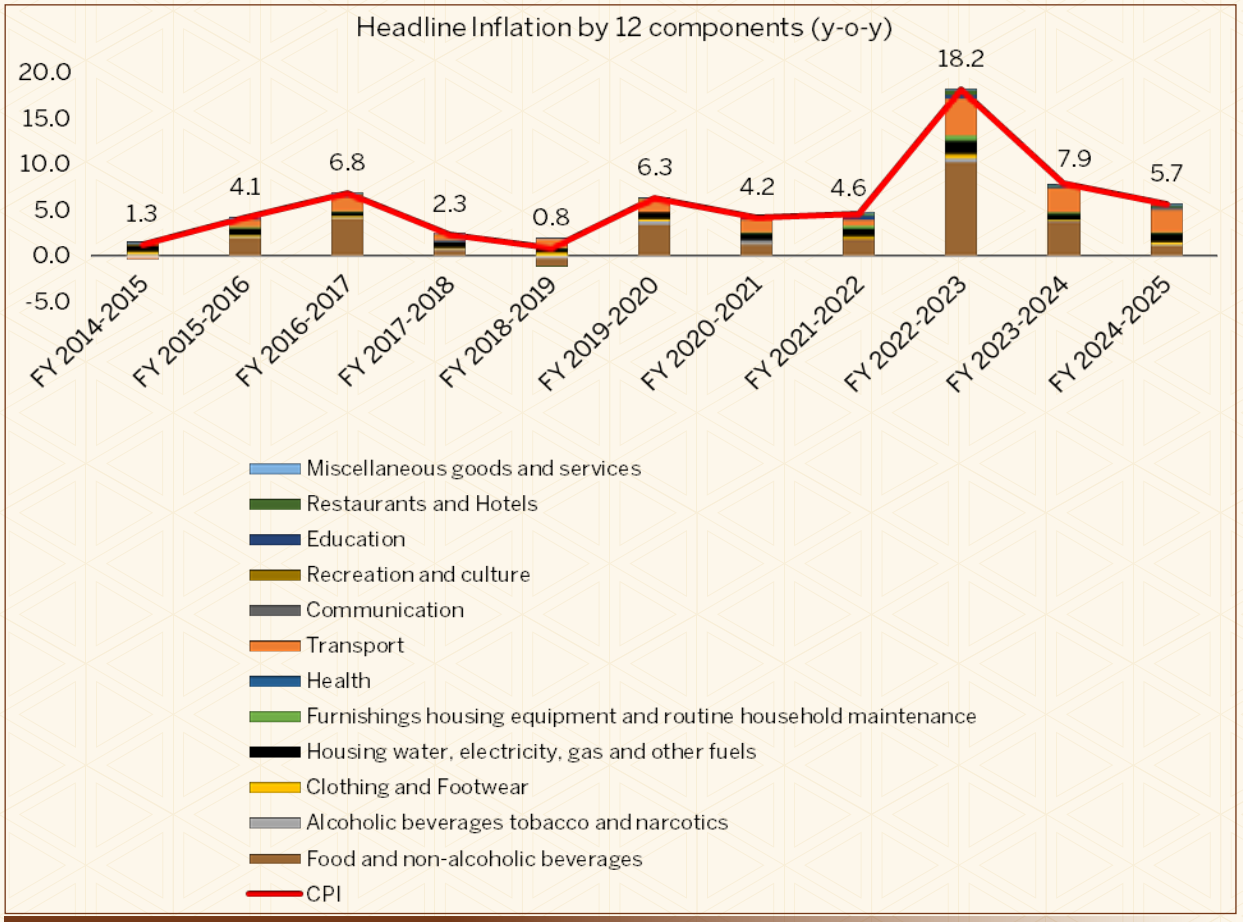
INFLATION DEVELOPMENTS

Due to some inflationary pressures from core items, such as hotels and restaurants, core inflation increased to 7.5 percent in FY 2024/25 from 5.7 percent in FY 2023/24. However, this increase was more than offset by the significant fall in fresh food inflation to 7.5 percent from 13.6 percent and energy inflation to 1.5 percent from 3.2 percent during the same period. Thus, headline inflation decreased to 5.7 percent in FY 2024/25 from 7.9 percent in FY 2023/24, thanks to a broadly tight monetary policy stance implemented in the previous two financial years, disinflationary government measures, easing global pressures, and improved domestic agricultural conditions.

Inflation is expected to remain within the 2-8 percent band in the medium term. Nonetheless, risks to the outlook remain, including potential adverse weather conditions that could disrupt domestic food supply, as well as geopolitical tensions. The NBR will continue to closely monitor both global and domestic economic conditions and stands ready to take timely actions to keep inflation low and stable.

Figure 6: Inflation developments



Source: National Bank of Rwanda

TREASURY BONDS DEVELOPMENT

PRIMARY MARKET

In FY 2024/25, the National Bank of Rwanda successfully issued on behalf of the Government of Rwanda seven new bonds and reopened seven existing bonds.

Given the market appetite of treasury bonds, an average subscription level of 292.67 percent in FY 2024/25 was recorded from 154.08 percent in FY 2023/24. The over subscription of the government bonds in FY 2024/25 is attributed to high liquidity in the banking sector resulting from the retirement of short-term government securities since January 2025, in line with the fiscal consolidation framework. As a result, bond yields declined for all maturities.

SECONDARY MARKET

In FY 2024/25, there was a significant increase in treasury bonds trading in terms of turnovers whereby it increased by 171.8 percent to FRW 146.5 billion from FRW 53.9 billion in FY 2023/24. However, the number of transactions marginally reduced by 5.0 percent to 722 transactions from 760 transactions in FY 2023/24.

The big increase in bond turnovers relative to bond deals was mainly due to bond sales made by institutional investors, especially in May and June 2025.

FINANCIAL SYSTEM STABILITY AND CONDUCT SUPERVISION

REGULATION AND LICENSING

DEVELOPMENTS IN REGULATORY FRAMEWORK

To preserve financial stability, enhance depositor and policyholder protection, safeguard market integrity, promote fair competition, and align Rwanda's financial system with international standards and best practices, the National Bank of Rwanda (NBR) undertook key legal and regulatory reforms during the fiscal year 2024–2025. These reforms encompassed the review, and development of seven (7) laws, eleven (11) regulations, and eight (8) directives and guidelines.

Legislative Developments: All seven (7) draft laws were approved by end-June 2025. Among them, the Anti-Money Laundering and Counter-Financing of Terrorism (AML/CFT) Law and the Central Securities Depository (CSD) Law were enacted and published, strengthening compliance with FATF recommendations and enhancing the capital market infrastructure, respectively. The remaining five laws governing resolution frameworks, pension reforms, virtual assets and service providers, foreign exchange operations, and third-party motor insurance have been approved and are pending publication following final legal scrutiny.

Regulatory Instruments: Out of eleven (11) initiated regulations, six (6) were gazetted and five (5) received final approval, pending publication. These regulations introduced critical prudential standards in areas such as foreign exchange operations, dishonoured cheque management, credit classification and provisioning, and corporate governance ensuring stronger risk controls and institutional soundness.

Directives and Guidelines: Of the eight (8) instruments planned, two (2) have been published: one governing foreign currency transactions with international brokers, and another aligning financial institutions with international sustainability reporting standards (IFRS S1 and S2). The remaining instruments are undergoing stakeholder consultations to ensure regulatory clarity, coherence, and sector-wide alignment.

Newly Licenced non-deposit taking financial institutions (NDFIs)

70 lending institutions

5 Trust and Corporate Service Providers (TCSPs)

3 debt collection agencies

DEVELOPMENTS IN LICENSING

The National Bank of Rwanda (NBR), in its supervisory mandate, is responsible for licensing and regulating financial institutions and service providers. These include banks, insurers and their intermediaries, deposit-taking microfinance institutions, pension schemes, forex bureaus, payment system operators, payment service providers, non-deposit-taking lending financial service providers, and other financial entities not supervised under specific laws.

In addition to licensing, the NBR oversees the approval of significant shareholding transactions, mergers and acquisitions, as well as the appointment of Board members and Senior Management of financial institutions.

In the insurance sector, the Bank licensed two (2) insurance brokers, accredited twelve (12) reinsurers, one (1) reinsurance representative office, and two (2) actuaries, NBR also licensed four (4) loss adjusters and one insurance investigator, and approved one (1) bancassurance agent to facilitate market growth and integrity.

The licensing of Payment Service Providers (PSPs) was categorized in accordance with the applicable regulatory framework. In this regard, twelve (12) out of 32 existing licenses were categorized within the four (4) license categories (Large E-money issuer, Small E-money issuer, Money remittance service provider, Payment initiation and account information service providers). Additionally, seven (7) licenses were issued to new PSPs bringing the total to 39 PSPs. Regarding payment system registration and designation, three (3) payment systems (eKash, Smartcash card system and Mastercard) were registered, and one of them (eKash) was designated as a systemically important financial market infrastructure.

In the Microfinance sector, the Bank issued two licenses to conduct DTMFs activities (COOPEC IKIRENGA, and COOPEC IKAPAGI) and approved the request for relocation and opening of 21 new branches. The NBR also approved 912 senior staff and directors of DTMFIs in line with the implementation of the Corporate Governance Regulation.

In the microfinance sector, the Bank granted two (2) licenses for DTMFs activities. Additionally, NBR licensed 78 new non-deposit-taking financial institutions. These included 70 lending institutions, 5 Trust and Corporate Service Providers (TCSPs), and 3 debt collection agencies. This expansion brings the total number of institutions under NDFSP's supervision to 152, comprising 110 lending companies, 19 TCSPs, 22 debt collection agencies, and 1 digital savings facilitator. 1 saving and credit scheme approved last year was transferred to the Ministry of Finance and Economic Planning after establishing a separate ministerial order for tontines.

PRUDENTIAL SUPERVISION

The National Bank of Rwanda (NBR) carries out financial sector supervision using both micro prudential and macro prudential analysis. Micro prudential supervision includes off-site and on-site examinations of individual financial institutions to assess their compliance to prudential norms and the effectiveness of their risk management frameworks to ensure the stability of the regulated financial institutions and ensure fair treatment of consumers, market integrity, and compliance with the consumer protection regulation . Additionally, the Bank conducts macro prudential analysis to assess the stability of the financial system and implements appropriate measures to maintain overall financial stability.

MICRO PRUDENTIAL SUPERVISION

OFF-SITE SUPERVISION ACTIVITIES

The National Bank of Rwanda carries out off-site supervision using a Risk Based Supervision Framework (RBS) to monitor and evaluate banks' operations, risk management practices, and regulatory compliance. This supervision is conducted remotely through the analysis of data and reports submitted by financial institutions including banks, DTMFIs, insurance companies and pension funds. In FY 2024/25, findings from the off-site assessments indicated that all financial sub-sectors remained compliant with prudential standards and maintained a strong capital base, providing effective buffers against key risks, particularly credit, operational, and market risks.

In the Banking sector, following the off-site analysis, the NBR conducted seven (7) prudential meetings with banks which focused on compliance, risk management practices, as well as financial mitigants to better serve customers while adapting to evolving market dynamics.

The NBR also conducted supervisory reviews of the Internal Capital Adequacy Assessment Process (ICAAP) and the Internal Liquidity Adequacy Assessment Process (ILAAP).

The reviews highlighted notable progress in how banks evaluate the adequacy of their capital against their risk profiles and appetites, as well as the sufficiency of their liquidity to meet obligations.

Furthermore, the NBR assessed banks' recovery plans, which act as early warning tools to identify vulnerabilities that require timely action to ensure that banks remain prepared to handle severe stress scenarios without threatening financial stability or relying on public support, thereby strengthening the resilience of the financial system.

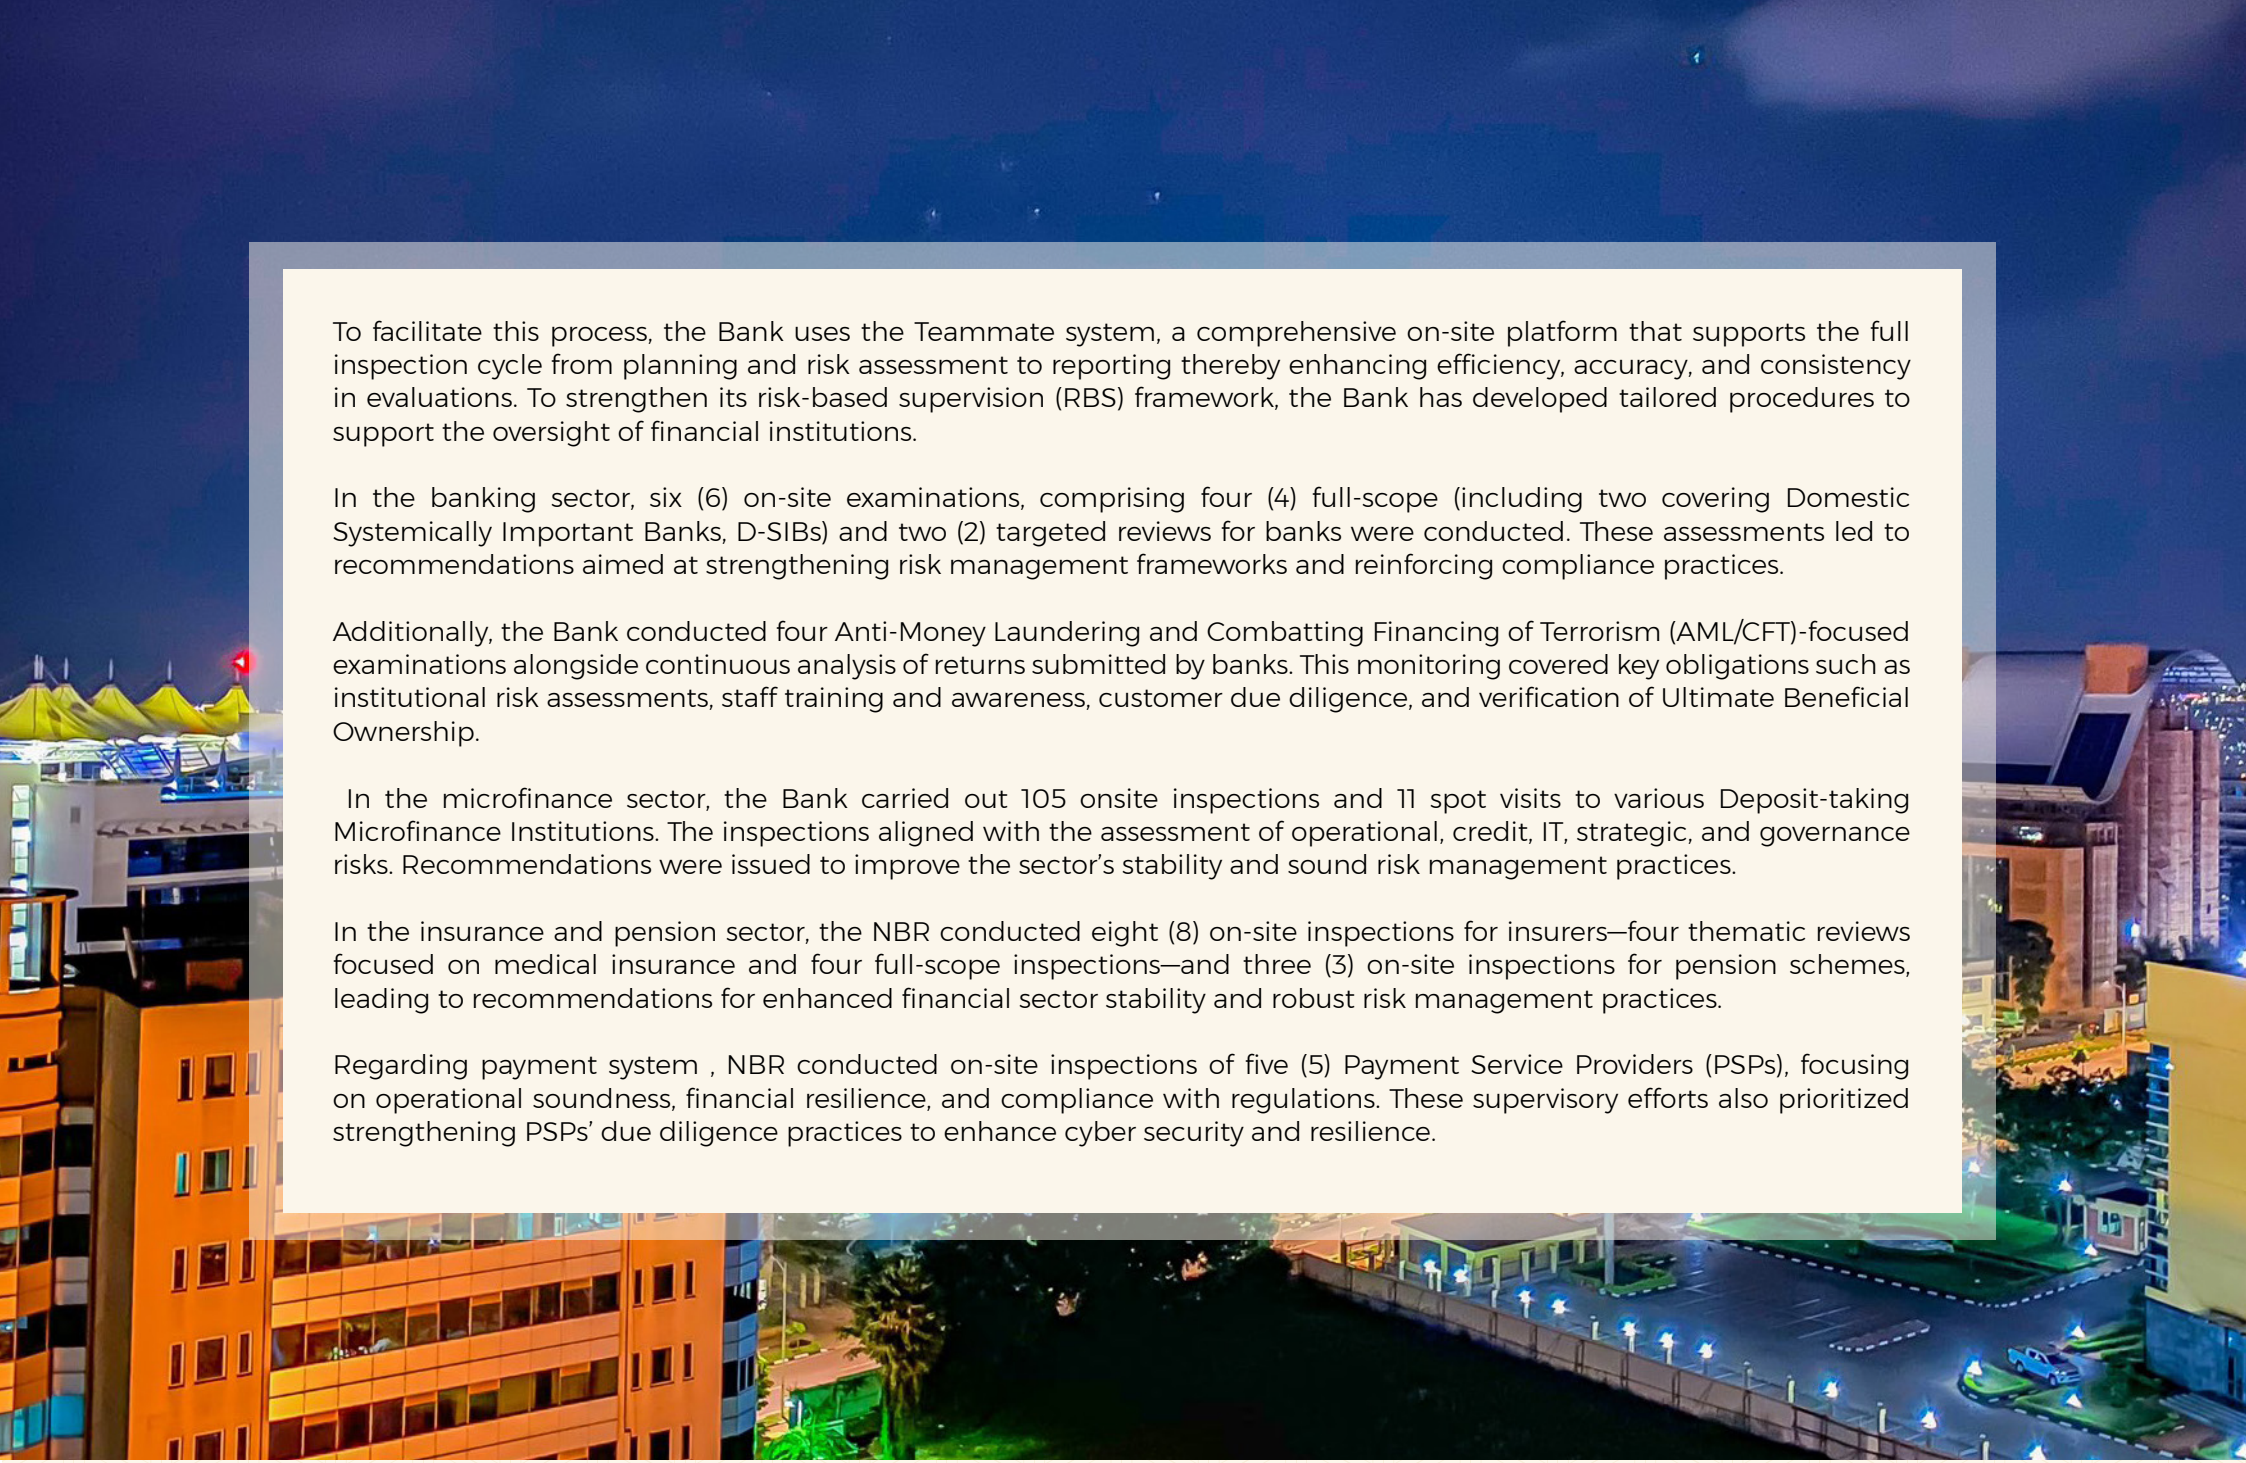
In the Insurance and Pension sector, regular off-site analysis was performed across all regulated entities addressing governance, financial performance, and system concerns. The Bank also held prudential meetings with three insurance companies and the public pension scheme, providing recommendations across strategic, insurance, pension administration, operational, and market conduct risks.

In prudential policy, the NBR analyzed the first set of IFRS 17-based audited financial statements from all insurers to assess compliance and held two stakeholder workshops on RBC-IFRS17 reporting for full adoption of the new capital regime.

In the Microfinance Sector, regular off-site reviews were conducted across all supervised Deposit-taking Microfinance institutions. Based on these findings, 129 prudential meetings were held, emphasizing credit risk management practices and measures to improve customer service and ensure stability.

ON-SITE SUPERVISION ACTIVITIES

On-site examinations remain a central supervisory approach. The Bank applies a risk-based supervision (RBS) framework, which adapts oversight to the unique risk profiles and systemic importance of each financial institution, rather than relying on a uniform regulatory approach. This ensures that supervisory intensity corresponds to the size, complexity, and risk exposure of each institution.



To facilitate this process, the Bank uses the Teammate system, a comprehensive on-site platform that supports the full inspection cycle from planning and risk assessment to reporting thereby enhancing efficiency, accuracy, and consistency in evaluations. To strengthen its risk-based supervision (RBS) framework, the Bank has developed tailored procedures to support the oversight of financial institutions.

In the banking sector, six (6) on-site examinations, comprising four (4) full-scope (including two covering Domestic Systemically Important Banks, D-SIBs) and two (2) targeted reviews for banks were conducted. These assessments led to recommendations aimed at strengthening risk management frameworks and reinforcing compliance practices.

Additionally, the Bank conducted four Anti-Money Laundering and Combatting Financing of Terrorism (AML/CFT)-focused examinations alongside continuous analysis of returns submitted by banks. This monitoring covered key obligations such as institutional risk assessments, staff training and awareness, customer due diligence, and verification of Ultimate Beneficial Ownership.

In the microfinance sector, the Bank carried out 105 onsite inspections and 11 spot visits to various Deposit-taking Microfinance Institutions. The inspections aligned with the assessment of operational, credit, IT, strategic, and governance risks. Recommendations were issued to improve the sector's stability and sound risk management practices.

In the insurance and pension sector, the NBR conducted eight (8) on-site inspections for insurers—four thematic reviews focused on medical insurance and four full-scope inspections—and three (3) on-site inspections for pension schemes, leading to recommendations for enhanced financial sector stability and robust risk management practices.

Regarding payment system , NBR conducted on-site inspections of five (5) Payment Service Providers (PSPs), focusing on operational soundness, financial resilience, and compliance with regulations. These supervisory efforts also prioritized strengthening PSPs' due diligence practices to enhance cyber security and resilience.

MACRO PRUDENTIAL SURVEILLANCE

STRUCTURE OF THE FINANCIAL SECTOR

In FY 2024/25, the number of regulated financial institutions decreased by 12, totalling 675 as of June 2025, down from 687 in June 2024. As of the end of June 2025, there were 363 microfinance institutions, compared to 457 institutions in June 2024. This decline is attributable to the ongoing consolidation of UMURENGE SACCOs into District SACCOs. Additionally, notable changes occurred within Non-Deposit Taking Financial Institutions (NDFIs) and Payment Services Providers (PSPs), where the number of NDFIs increased to 152 from 74 in June 2024 following the licensing of 78 new entities. During the same period, the number of PSPs rose to 40 from 36 after licensing four new providers. The count of other regulated financial institutions remained unchanged from the previous year.

The financial sector maintained its growth momentum despite the vulnerabilities facing the global financial system. Total assets of the financial sector expanded by 22.6 percent to FRW 14.3 trillion in June 2025 from FRW 11.6 trillion in June 2024, surpassing the growth of 20.9 percent recorded during the previous year. The growth of assets was observed across all sub-sectors. In the banking industry, assets grew by 22.5 percent, underpinned by the growth of deposits and capital increments. The assets of the pension sector expanded by 25.7 percent on account of the growth of contributions and investment income. In the insurance sub-sector, total assets expanded by 17.6 percent owing to the growth of premiums and investment income while the assets of microfinance institutions grew by 22.1 percent on account of the improved growth of deposits and capital.

Regarding size, banks continue to be the major financial institution, accounting for approximately 67.4 percent of the total assets within the financial sector. The pension sector, the second largest component, constitutes 16.1 percent. Insurance and microfinance sectors represent 8.5 percent and 7.0 percent respectively, while other financial institutions remain comparatively minor, with only 1.0 percent of the sector's total assets.

STABILITY OF THE FINANCIAL SYSTEM

BANKING SECTOR

The banking sector remained well capitalized with sufficient buffers. The Capital Adequacy Ratio (CAR) remained above the regulatory requirement supported by capital injections, retained earnings and the moderation of the growth of risk-weighted assets. The total CAR was 21.6 percent in June 2025, above the minimum regulatory requirement of 15 percent. These buffers continue to preserve banks' capacity to supply credit to the economy, reduce the likelihood of distress and absorb unexpected losses. Looking ahead, the capitalization of banks is expected to remain adequate. The stress test conducted in the banking sector confirmed the resilience of the capital buffers to a range of shocks with varying degrees of severity. The findings revealed adequate loss-absorption capacity of the banking sector even in severe scenario.

Banks' liquidity and funding positions remained resilient against potential liquidity shocks in the first half of 2025. The liquidity indicators of banks remained at adequate levels both in short and long term. In short term, the consolidated Liquidity Coverage Ratio (LCR) for the banking sector was 289 percent in June 2025, significantly surpassing 100 percent minimum requirement. This reflected a stronger ability to withstand a sudden 30-day liquidity stress scenario. Similarly, the Net Stable Funding Ratio (NSFR) was 150.5 percent at the end of June 2025, and all banks met the 100 percent minimum requirement. The NSFR complements LCR by ensuring that banks maintain a stable funding profile in relation to assets over a one-year time horizon to cater for structural vulnerabilities.

Deposits from customers remain the most important component of banks' funding, providing stable funds to finance core lending business. As at end June 2025, customers' deposits represented 78.5 percent of total liabilities of banks compared to 73.6 percent as at end June 2024. Banks' funding sources are relatively stable, with a large share of domestic deposits, which are less susceptible to flight risk.

This structure of the balance sheet places banks in good funding conditions and insulates them from funding risks associated with volatility and disruptions to international funding market conditions.

The quality of assets in the banking sector remained healthy. The ratio of non-performing loans (NPLs) to total gross loans dropped to 2.6 percent at the end of June 2025 from 5.0 percent in June 2024. The decline in the NPL ratio was driven by the growth in total loans and advances and a reduction in the stock of NPLs. Non-performing loans reduced to FRW 164 billion in June 2025 from FRW 267 billion in June 2024 on account of write offs (FRW 129.4 billion in June 2025 compared to FRW 22.7 billion of June 2024). Banks' ability to absorb potential losses from non-performing loans (NPLs) remains adequate. The provision coverage ratio, a measure of how well banks are prepared to absorb potential financial shocks from loan defaults, increased further to 110 percent in June 2025 from 91 percent in June 2024.

The banking sector remains profitable, supported by investment earning assets and prudent risk management. The consolidated net profits of banks increased by 21.6 percent to FRW 161 billion in the first half of 2025 from FRW 132 billion in the first half of 2024, against the growth of 36.7 percent in June 2024. As a result, the Return on Assets (ROA) slightly dropped to 4.8 percent in the first half of 2025 from 4.9 percent in 2024. During the same period, the Return on Equity (ROE) marginally dropped to 18.9 percent from 21.8 percent.

The deceleration of the growth in profit is largely linked to the slower growth of interest income, and an increase in overhead costs. The growth of interest income declined following the reduction of lending interest rate, slower growth of loans and investment in government securities. On the expenses' side, the increase in overhead costs is associated with an increase in staff renumerations to cover the rise in pension contributions.

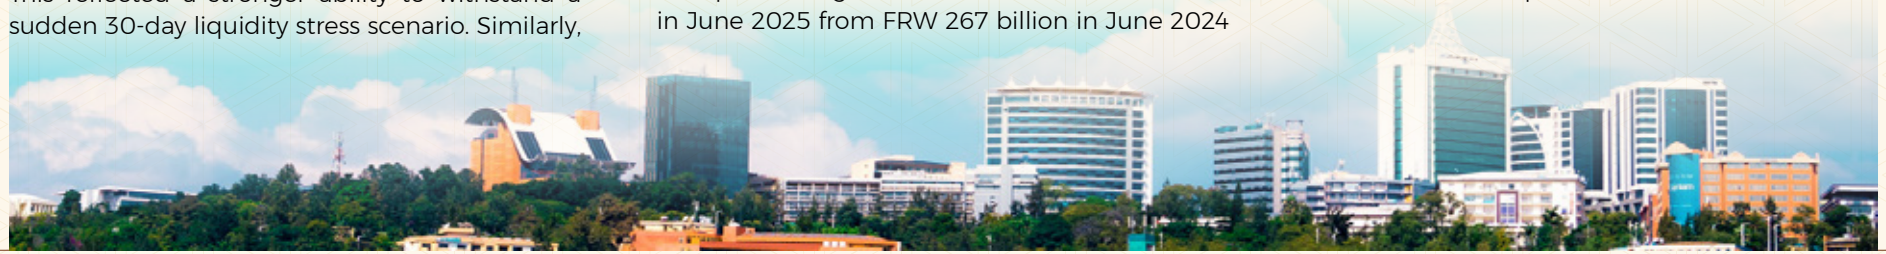

Figure 10: Capital Adequacy Ratio

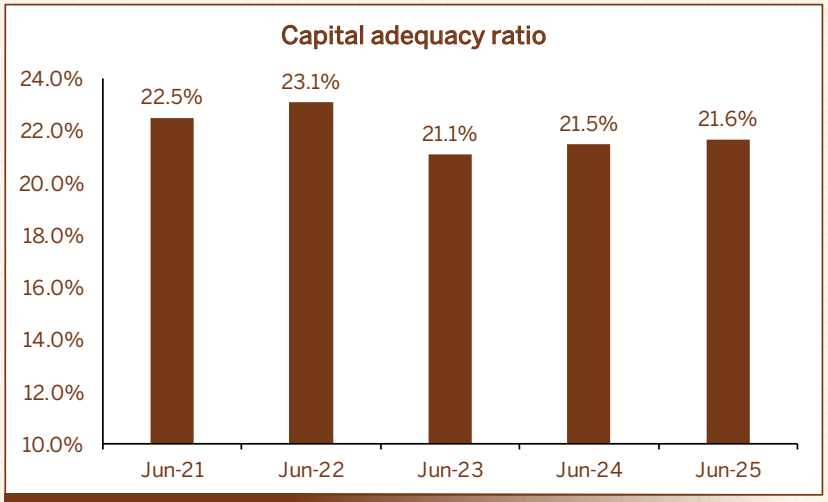
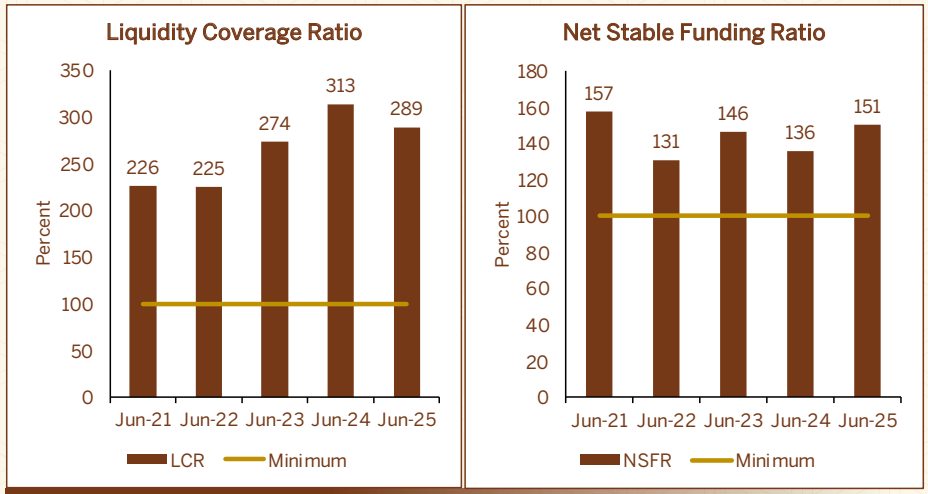


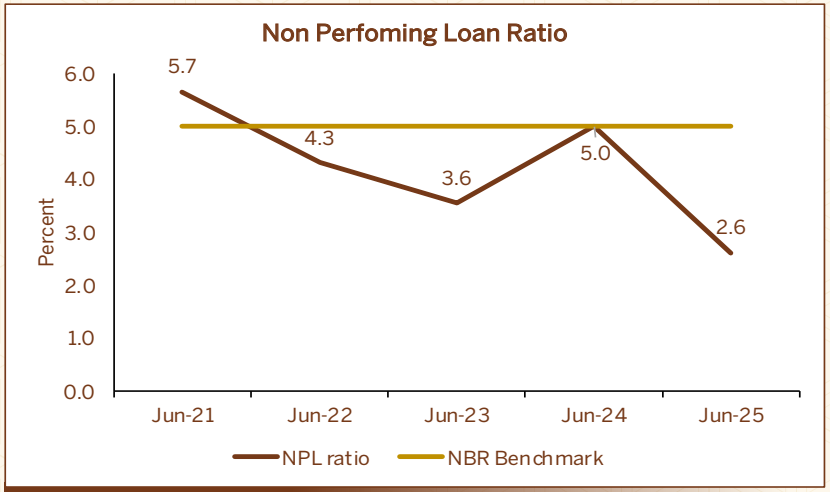
Source: National Bank of Rwanda

Figure 11: Liquidity of the Banking Sector



Source: National Bank of Rwanda

Figure 12: The Quality of Loans in the Banking Sector



Source: National Bank of Rwanda

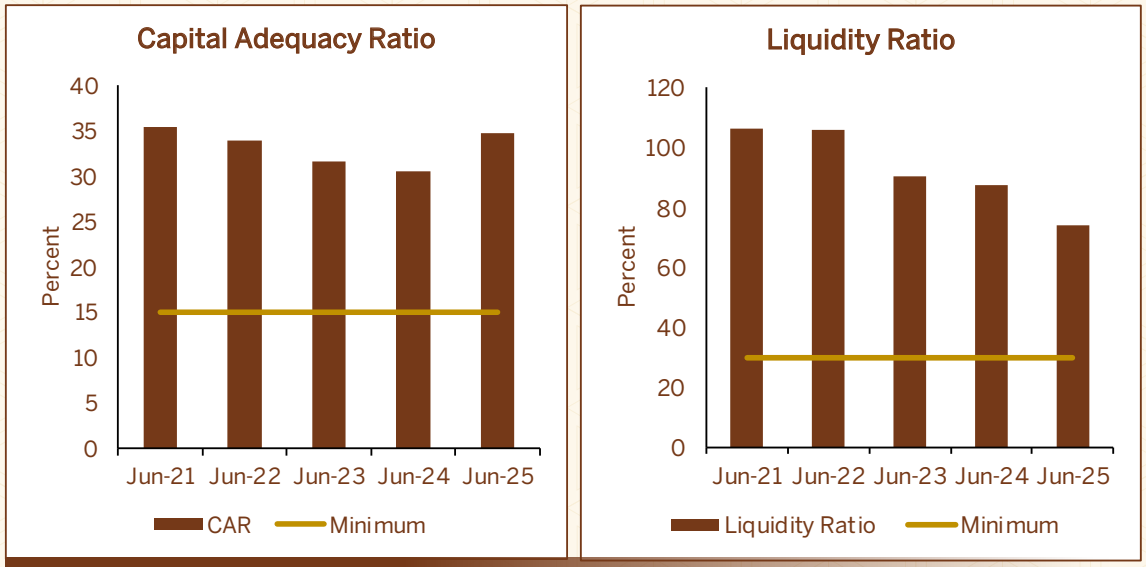
MICROFINANCE SECTOR

The Microfinance sector remained sound and resilient, maintaining enough capital and liquidity buffers. Microfinance institutions are required to maintain a capital adequacy ratio of 15 percent to support growth and absorb adverse financial shocks. As of June 2025, MFIs' capital adequacy ratio stood at 34.7 percent, well above the minimum prudential requirement and this is across all categories of the microfinance sector. The liquidity for the microfinance sector stood at 73.8 percent, surpassing the 30 percent prudential requirement, explained by deposit growth and capital increments. This exhibits the sector's ability to meet obligations and support further lending.

Credit risk remained low across all the subsectors. The Non-Performing Loans (NPLs) ratio slightly improved to 3.4 percent as of June 2025 from 3.8 percent in June 2024 due to growth of loans, improved credit risk management and recoveries.

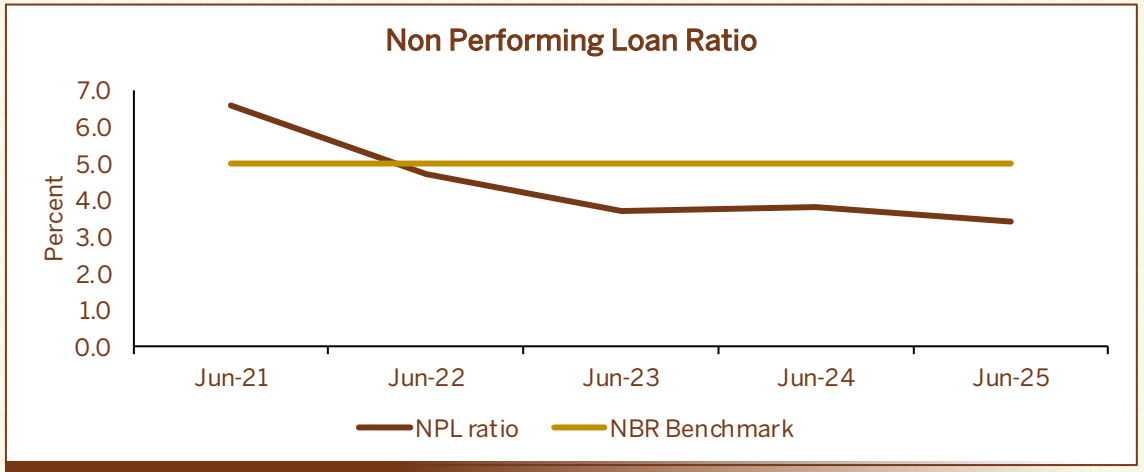
The microfinance sector also remained profitable, with net profits growing by 10.7 percent to FRW 21.8 billion as of June 2025 from FRW 19.6 billion. Return on Assets (ROA) and Return on Equity (ROE) were maintained at 5.3 percent and 14.8 percent, respectively.

Figure 13: Capital and Liquidity of the Microfinances



Source: National Bank of Rwanda

Figure 14: Asset quality of the Microfinance Sector



Source: National Bank of Rwanda

THE INSURANCE SECTOR

The insurance sector remained stable and resilient, supported by adequate capital and liquidity buffers. Insurers are required to maintain a minimum solvency ratio of 100 percent to ensure policyholder protection, sustain business growth, and absorb potential shocks.

As of June 2025, private insurers' aggregate solvency ratio declined to 215 percent as of June 2025 from 269 percent in June 2024, however still above the regulatory threshold of 100 percent, underscoring their strong capitalization and prudent risk management. With regards to liquidity, private insurers' liquidity ratio stood at 109 percent as of June 2025 compared to 114 percent in June 2024, exceeding the 100 percent prudential threshold. This position reflects sound asset allocation and high-quality investments, underpinning their capacity to meet short-term obligations.

Private insurance claims rose by 17 percent to FRW 47.6 billion in June 2025, mainly driven by motor and medical lines, which all together registered FRW 31 billion. The rise in claims was largely attributed to higher medical tariffs and a moderate increase in road traffic accidents. Consequently, the claims ratio for private insurers increased from 58.8 percent to 59.3 percent.

The aggregate **net profits of private insurers** grew by

Source: National Bank of Rwanda

The profitability of private insurers remained stable. The aggregate net profits of private insurers reached FRW 16 billion in June 2025, marking a 14 percent increase from FRW 14 billion in the previous year. During the same period, the ROA and ROE remained relatively stable at 9 percent and 19 percent, respectively.

PENSION SECTOR

The asset base of the pension sector (largely dominated by the public pension – 95%) increased by 25.7 percent to FRW 2.3 trillion in June 2025, from FRW 1.8 trillion in June 2024. This growth was driven by an increase in contributions and investment income.

The public pension fund's assets, comprising both the mandatory scheme (RSSB) and the informal long-term savings scheme (Ejo Heza), expanded by 26.1 percent, increasing from FRW 1.7 trillion in June 2024 to FRW 2.2 trillion in June 2025. This growth was supported by increases in both contributions and investment income of public pension fund. The contributions collected increased by 60 percent, from FRW 183 billion in June 2024 to FRW 293 billion in June 2025 in line with increase of contribution rate.

Similarly, investment income rose by 48 percent, from FRW 73 billion in June 2024 to FRW 108 billion in June 2025, largely driven by higher interest earnings from treasury bills, bonds, corporate papers, and bank deposits. Benefit payments to retirees rose by 38 percent from FRW 51 billion in June 2024 to FRW 71 billion in June 2025, demonstrating the fund's capacity to meet growing obligations while maintaining financial sustainability.

RSSB implemented a policy measure that raised pension contribution rates in order to strengthen the fund's capacity to meet future obligations, enhance pensioners' benefits, and support their post-retirement welfare. This policy is expected to sustain contributions growth, expand the asset base, and provide additional financing to the broader economy. As of June 2025, the public pension scheme's investment portfolio totaled FRW 2.0 trillion, comprising a diversified allocation across various asset classes as per the table below.

Ejo Heza also continued to expand supported mainly by the improved growth of contributions The total assets of EJO Heza increased by 30 percent from FRW 61 billion in June 2024 to FRW 79 billion in June 2025, demonstrating prudent fund management and robust investment performance. The contributions in EJO Heza increased by 55 percent, from FRW 7 billion in June 2024 to FRW 11 billion in June 2025, driven by the growth in contributors from 3,235,671 to 3,676,589 over the same period. This demonstrates the strong impact of targeted awareness initiatives on mobilizing contributors and boosting pension contributions. Total benefits paid increased by 389 percent, from FRW 0.6 billion in June 2024 to FRW 3 billion in June 2025, driven by the growth in beneficiaries from 8,812 to 38,193 over the same period. This reflects the fund's ability to meet increasing obligations while safeguarding long-term financial sustainability.

PERFORMANCE OF NON DEPOSIT TAKING FINANCIAL SERVICE PROVIDERS.

The total assets increased significantly to FRW 126.9 billion in FY 2024/25 from FRW 95.6 billion in FY 2023/24. The 32.7 percent increment in total assets was driven by a growing number of new entrants in the market and new capital injections by already existing institutions. On the other hand, gross loans increased to FRW 54.9 billion from FRW 42.3 billion reflecting a 29.9 percent increase, driven by higher demand for credit and expansion of lending activities by new entrants.

The outstanding loans to male and females increased by 16.8 and 41.9 percent respectively due to diverse range of services and the growing number of institutions in the NDFSP sector. However, females have registered a higher increase but less in value compared to males. Additionally, entities registered a significant increase in loans of 57.8 percent due to (Commercialization and De-risking for Agricultural Transformation Project) CDAT loans by Business Development Fund (BDF).

FOREX BUREAU FINANCIALS (GROWTH IN ASSETS AND EQUITY)

The Forex Bureau sector assets grew by 20.4 percent from FRW 12.1 billion in June 2024 to FRW 14.5 billion in June 2025. Similarly, the sector continues to be profitable, with its net profits increasing by 23.2 percent, to FRW 538.2 million as of June 2025 from FRW 436.9 million recorded at the end of June 2024. Equity increased by 15.7%, increasing from FRW10.1 billion in June 2024 to FRW 11.7 billion in June 2025.

CREDIT REPORTING SYSTEM

The National Bank of Rwanda is the supervisor and regulator of credit reporting system in Rwanda. Under its mandate, the Bank actively engaged data providers to enhance the quality of credit information managed by the credit bureau, TransUnion Rwanda Ltd.

The credit reporting system plays a pivotal role in strengthening Rwanda's financial sector by enabling the secure sharing of accurate, complete, and timely credit information from all sources. To improve efficiency, the NBR has championed the automation of reporting processes, ensuring higher data quality and faster updates.

This initiative expands access to finance, benefiting both borrowers and lenders.

As of June 2025, thirty-five data providers, including financial institutions, utilities, and telecommunications companies, have started automating their credit reporting processes to the Credit Reference Bureau and others are in the process of integrating with TransUnion Rwanda's systems. The NBR, through the Advisory Credit Reporting Council, is closely monitoring this transition to ensure full automation.

For the past two years, the NBR has been running the "CRB Customer Week" campaign, a nationwide initiative to raise public awareness about credit reporting rights and services. In FY 2024/25, the campaign reached Musanze and Huye districts, bringing credit information services closer to the people.

Through interactive sessions and on-site support, participants learnt about their rights to access credit information and the convenient channels available, including the Menyesha service (USSD *707#) on mobile phones. The sessions also offered hands-on assistance to customers facing delays in credit information updates. As a result, many individuals were empowered, with accurate and updated credit information, and a better understanding of how to manage their credit profiles.

Data from TransUnion Rwanda indicates that financial institutions continued to rely on credit information while making lending decisions, with usage rates standing at 93.08 percent in June 2025. Additionally, the coverage ratio, which is the percentage of the adult population reported to the credit bureau, rose to 44 percent in June 2025, from 39.5 percent in June 2024. The NBR will continue to collaborate with stakeholders to ensure compliance with reporting requirements and continue its public education efforts on the benefits of credit information sharing. Future awareness campaigns will extend to other districts to further enhance public engagement.

CONDUCT SUPERVISION

To ensure stakeholders' reporting compliance via Electronic Data Warehouse system, the NBR performed quarterly off-site surveillances for 52 reporting Non-Deposit Taking Financial Institutions (NDTFIs), and all the 78 forex bureaus.

Additionally, the Bank conducted five (5) full inspections and twenty (20) targeted inspections for NDTFIs and key recommendations on identified gaps were issued- to be closely monitored through supervision.

The National Bank of Rwanda conducted 48 onsite inspections in Forex Bureaus mainly covering governance, reporting transparency in pricing and adherence to Anti-Money Laundering and Counter-Terrorism Financing (AML/CFT) requirements. These inspections identified gaps in reporting, transparency and governance of forex bureaus that were shared with respective bureaus with clear actions and timelines to resolve them.

NBR in conjunction with Rwanda National Police (RNP) and Rwanda Investigation Bureau (RIB) continued to deter illegal forex transactions by carrying out joint inspections mainly in Kigali City, Rusumo (Kirehe), Kamembe (Rusizi) and Rubavu where illegal forex transactions are prevalent. Consequently, 147 individuals involved in unauthorized foreign exchange activities were identified and followed up by competent authorities.

In order to support broader regulatory reform, the Bank reviewed and published an updated regulation governing foreign exchange operations alongside a directive clarifying a list of sectors and businesses allowed to transact in foreign currencies given the nature of their businesses and source of income.

The directive also provides channels and processes to apply for authorization to transact in foreign currency, if companies have compelling reasons.

Enforcement of Financial consumer service protection legal and regulatory framework.

During FY 24/25, NBR carried out a range of supervisory activities aimed at enforcing consumer protection standards across Financial Service Providers. These activities focused on promoting transparency, fairness, accountability, and regulatory compliance in the financial sector, while safeguarding the rights of consumers.

Furthermore, NBR conducted both on-site and off-site inspections, with strong emphasis on thematic reviews designed to address specific consumer protection risks and systemic issues. The key thematic reviews and off-site analysis conducted during the year included.

• Assessment of fees charged by FSPs

To enforce regulation No 55/2022 of 27/10/2022 relating to Financial Service Consumer Protection, NBR conducted an off-site review of selected financial institutions to assess compliance with consumer protection requirements, focusing on prohibited fees, and the provision of free account statements.

The review identified recurring breaches, including the continued charging of prohibited fees, failure to issue loan clearance certificates, and the imposition of unjustified charges for account statements and SMS alerts. Consequently, the NBR issued supervisory recommendations requiring institutions to implement corrective measures and reinforce compliance with existing regulations to ensure fair and transparent treatment of financial consumers

• Digital Lending Thematic Review

NBR conducted a thematic review to evaluate whether digital lending practices are transparent, fair, and compliant with applicable regulations while ensuring that financial consumers are protected from predatory lending, data breaches, and unfair credit practices.

The review revealed that 90 percent of loans granted each quarter by volume are digital loans, marking a significant shift from traditional lending methods to digital channels.

However, challenges persist regarding transparency in the disclosure of loan terms, the absence of documents and platforms in all constitutional languages, and weak loan screening processes that have contributed to over-indebtedness.

To address the above issues identified, NBR is working towards drafting a legal instrument on digital financial services.

CRISIS MANAGEMENT AND RESOLUTION

The National Bank of Rwanda is responsible for the crisis management and resolution arrangements of the financial system to prevent systemic risks. The Bank is vested with the responsibility to ensure stability within the financial sector and that any weak or failing financial institutions are resolved in a manner that does not cause systemic risks. Despite regular supervision, a financial institution may face severe stress causing the institution to become non-viable. Consequently, resolution processes are designed to manage the failure of financial institutions with minimal impact on the financial system and economy.

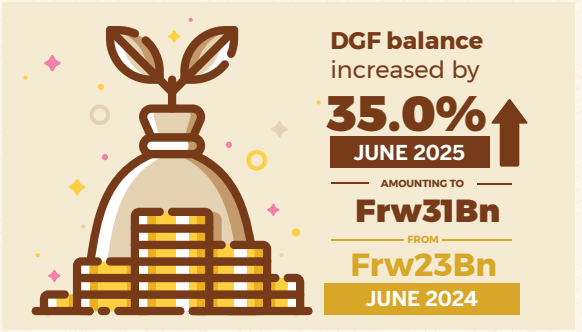
The NBR was designated as the resolution authority by the Law No. 044/2024 (for banks) and Law No. 072/2021 (for deposit-taking microfinance institutions).

Over the past financial year, NBR has strengthened its crisis management and resolution framework, particularly the operationalization of this framework by conducting resolvability assessments of Domestic Systemically Important Banks (DSIBs). Additionally, NBR conducted a crisis simulation exercise to test the effectiveness of the NBR resolution arrangements, and bridging the identified gaps. Banks continue to submit regularly their recovery plans in compliance with NBR's directive on minimum requirements for recovery plans issued in November 2022.

Depositor protection is also one of the key elements of crisis management as it helps to foster the public's confidence in the financial system and reduce the risk of bank runs. In Rwanda, the Deposit Guarantee Fund (DGF) was established by Law N° 31/2015 of 05/06/2015, determining the organization and functioning of a DGF for banks and microfinance institutions. This law has since been reviewed and replaced by Law No. 039/2024, effective March 22, 2024.

The main purpose of the DGF is:

- To protect insured depositors of a bank or a microfinance institution by providing insurance against the loss of insured deposits
- Contribute to the stability of the financial sector by ensuring that depositors have prompt access to their insured deposits in the event of failure by a bank or microfinance institution
- To provide financial assistance to a contributing bank or contributing microfinance institution in financial distress. The DGF is administered by the NBR and is funded by Banks and MFIs covered by the Fund.



The key functions of the Fund are to collect premiums from contributing institutions, investment of collected revenues, payout to eligible depositors in case any of the contributing member is liquidated and provide financial assistance to contributing member in financial distress.

As of June 2025, the fund balance amounted to FRW 31 billion from FRW 23 billion in June 2024, an increase of 35 percent. Amounts collected are invested in various investments – Primarily Government securities to generate returns and grow the fund's ability to compensate insured depositors in the event of failure of a deposit-taking financial institution. Currently, the DGF protects eligible deposits up to the coverage limit of FRW 500,000 per depositor and member bank, and microfinance institution. As of end June 2025, the insured deposits from banks amounted to FRW 241 billion, equivalent to 3.6 percent of total deposits in banks and FRW 46 billion, equivalent to 18 percent of total deposits in MFIs (PLCs).

Table 8: DGF Premium and Investment Performance Overview.

Description	Jun-22 (Million FRW)	Jun-23 (Million FRW)	Jun-24 (Million FRW)	Jun-25 (Million FRW)
Opening Balance	8,940	12,541	17,078	23,091

TOTAL	**12,541**	**17,078**	**23,091**	**30,979**

Source: National Bank of Rwanda

In line with its commitment to operational efficiency, DGF undertook a strategic initiative to automate all its operating processes and functions. The project is currently in its final phase, with contributing members already using the system to declare premiums and make payments. Full implementation is targeted for completion by the end of December 2025.

To implement the new DGF Law enacted in March 2024, the DGF regulation was revised and approved by the Board in December 2024. The implementation of both legal Instruments will start after publication of the revised DGF regulation.

Looking ahead, in the next financial year, the Bank plans to finalize the resolution law which will include other financial institutions such as the Insurance sector and payment service providers. Additionally, the Bank will conduct the resolvability assessments and prepare resolution plans of DSIBs, to strengthen further the NBR resolution function.

FINANCIAL SECTOR DEVELOPMENT AND INCLUSION

The National Bank of Rwanda aims to develop an inclusive financial sector and strengthen sector conduct, ultimately contributing to the well-being of Rwandan citizens and supporting the achievement of the Vision 2050 National Goals.

This chapter presents an overview of the key achievements and provides insights into the progress made in developing the financial sector, advancing financial inclusion, and strengthening consumer protection. In line with its core objectives, the Bank intensified its engagement with stakeholders and supported policy reforms aimed at ensuring the financial system remains resilient, inclusive, and conducive to long-term investment.

FINANCIAL INCLUSION

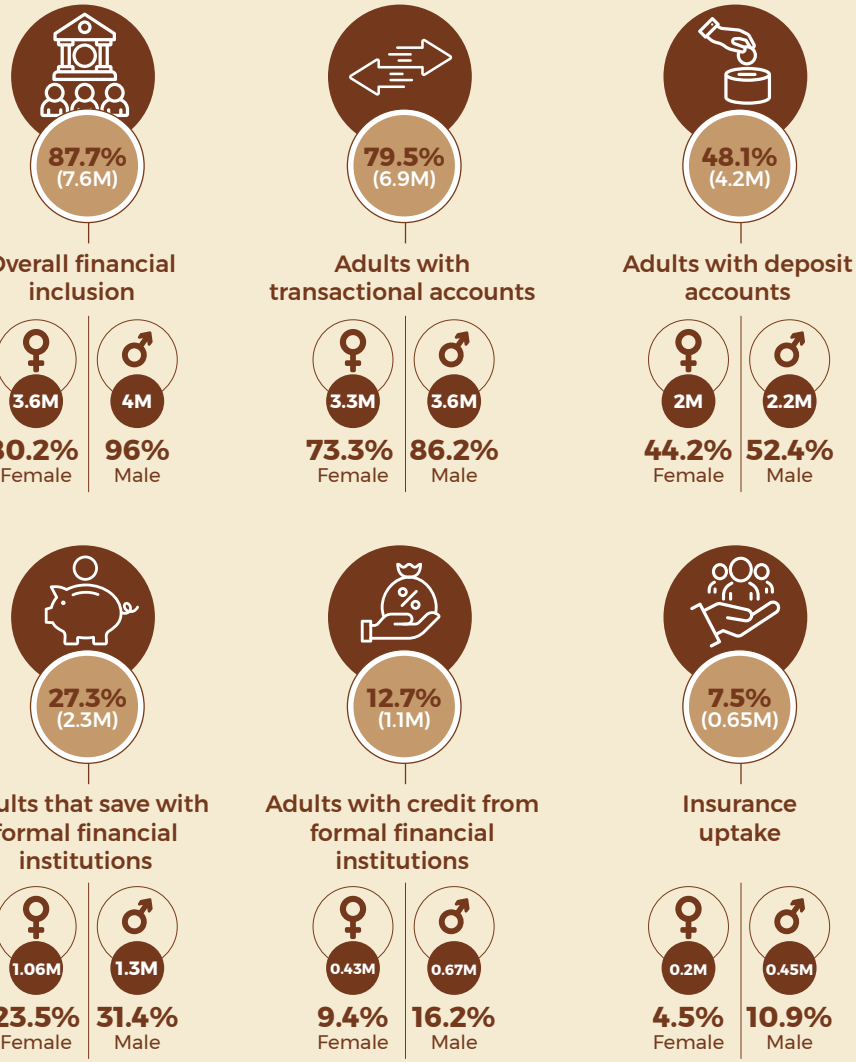
Rwanda has achieved remarkable success in financial inclusion, with the 2024 Finscope survey showing that 92% of adults now have access to financial services. To better track this progress and address the remaining challenges, The NBR recently launched an innovative financial inclusion dashboard that provides weekly updates using supply-side data from the NBR Electronic Data Warehouse, collected from all supervised institutions. While supply-side(data submitted by regulated financial institutions) and demand-side data (Finscope survey) differ in methodology (total population versus sample-based approaches) both tell a consistent story of progress.

The NBR Financial Inclusion Dashboard serves as the primary tool for measuring financial inclusion levels and complements the Finscope Survey, which is conducted every four years. This report presents financial inclusion statistics based on the following methodology:

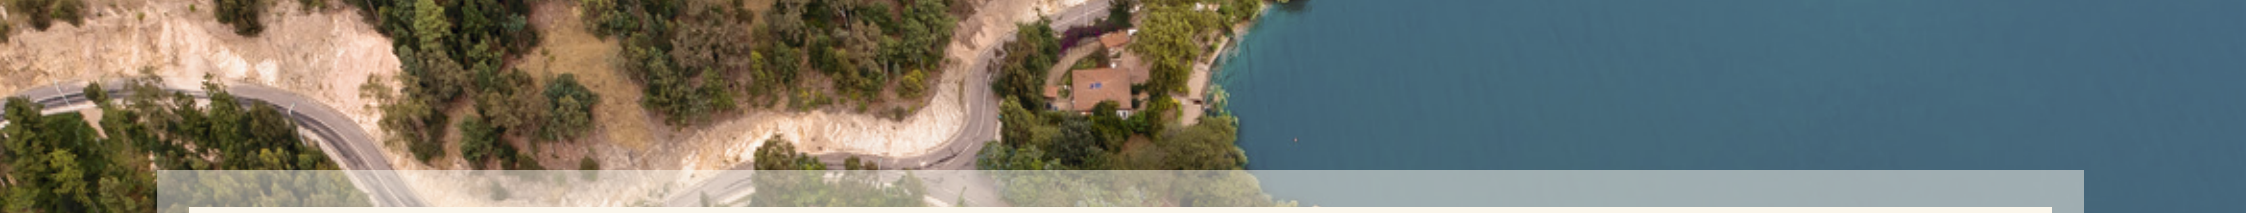
- **Data Source:** NBR Financial Inclusion Dashboard
- **Coverage:** Individual customer data only
- **Unique Identifier:** National Identity Number to ensure accurate customer counting
- **Account Status:** Active accounts exclusively

As of June 2025, the dashboard reveals that 87.7 percent of Rwanda's adult population, or 7.6 million people, have active accounts across banks, Microfinance institutions (MFIs-PLCs), savings and credit cooperatives(SACCOs), mobile money platforms, and insurance policies in their names. It is worth noting that 68.5 percent or 6 million adults have mobile money accounts, 27 percent have bank accounts, 24 percent have accounts in SACCOs and 8.9 percent have accounts in microfinance institutions.

Table 8: Key financial inclusion numbers



Source: NBR Financial Inclusion Dashboard (consideration of only customers with active accounts)



IMPLEMENTED PROJECTS TO ADVANCE FINANCIAL INCLUSION IN THE FY 2024-2025

NBR continued to advance financial inclusion through targeted interventions designed to develop an inclusive financial sector. The Bank's key initiatives included financial literacy programs, implementation of gender-inclusive programs, leveraging financial inclusion data for informed decision-making, supporting financial innovation, and building capacity within the financial sector.

Bridging Financial Literacy Gaps

The NBR strengthened its efforts to bridge financial literacy gaps by empowering diverse groups through targeted education and supportive initiatives, empowering consumers with knowledge about their rights and obligations regarding consumer protection and ensuring that more people have the tools and knowledge to make informed financial decisions.

The following key programs were undertaken to advance financial literacy and inclusion across various segments of the population:

- Under the RISE (Rwanda Imbaraga SME Ecosystem) project, implemented in collaboration with Business Development Fund of Rwanda (BDF) and alongside other financial literacy programs, a total of 7,200 micro, small, and medium-sized enterprises (MSMEs) were successfully trained to strengthen their business management skills and enhance their financial capabilities. Prior to the MSME financial literacy programs, 403 master trainers were equipped with relevant knowledge to educate the MSMEs in their communities.
- The Bank conducted the 7th Edition of the NBR Quiz challenge competition, which engaged 175 secondary school students from across the country. This program enhances students' understanding of the various areas of the Bank's mandate and broader economic and financial concepts. The 2025 champion was Collège Saint Ignace.
- Through the BNR Visit Day program, the Bank hosted 261 students. This program provides an opportunity for schools and accompanying teachers to engage/understand the process and approach taken by NBR to achieve its mandate of ensuring price stability and a sound financial system contributing to sustainable and inclusive growth.
- The Bank conducted a community outreach through Radio and Inteko z'Abaturage to raise awareness about consumers' rights and obligations, as well as to guide them on how to submit financial service-related complaints.
- Consumer Rights Week was organized to provide immediate assistance to customers facing issues related to inaccurate and/or outdated credit information stored in the TransUnion Rwanda database (the operator of the credit bureau), as well as other concerns related to financial products. The objectives were to:
  - Resolve their issues immediately.
  - Educate the public on credit reporting practices, data sharing, and dispute resolution.
  - Raise awareness of financial service customers' rights and obligations as outlined in consumer protection laws and regulations.

During this activity conducted in Musanze and Huye Districts, a total of 953 complaints were received from various financial service consumers, 84% of which were successfully resolved on spot.

Financial Inclusion Data

» In March 2025, NBR launched the Financial Inclusion dashboard to support policymakers and financial service providers (FSPs) by providing high frequent financial inclusion data through Electronic Data Warehouse. Since its launch, the dashboard has attracted over 2,500 users from 101 countries.

Below is a snapshot of the Financial inclusion dashboard;

DRIVING INNOVATION AND SUPPORTING THE FINTECH SECTOR

» The Bank started the second phase of the Central Bank Digital Currency (CBDC) exploration. Following the first phase of the feasibility study that indicated 4 potential CBDC use cases (payment resilience, payment innovation, enabling cross-border payment and accelerating digital payments) in Rwanda, NBR launched the e-FRW proof-of-concept to test technical feasibility, evaluate payment system integration, and develop recommendations for the legal framework prior to the overall technical design phase.

These tests are being conducted in partnership with selected financial service providers, and the results will determine NBR's next steps in the CBDC project implementation. Given the importance of this project, NBR decided to follow a phased approach, starting with feasibility study; followed by a PoC and a pilot to inform the Government on Rwanda's stance on developing a CBDC. In all phases, consultation with the private sector and policy makers will be emphasized.

It's important to note, the Bank has not decided to deploy a digital currency (E-FRW), it's rather exploring and experimenting this digital currency to inform Rwanda's strategic position on this matter.

» NBR in collaboration with Rwanda Finance Limited (RFL), Global Finance and Technology Network (GFTN) co-hosted the Inclusive Fintech Forum 2025 in February. This global forum convened over 3,000 leaders, investors & fintechs to discuss policies & regulations that advance financial inclusion through fintech.

» In support of tech enabled innovation, NBR launched three regulatory sandbox cohorts' applications, out of which 4 new participants were admitted in the sandbox, providing them an opportunity to experiment with tech solutions in a live, but controlled environment. The sandbox was substantiated with ecosystem support initiatives namely the demo day, regulatory awareness webinars and office support hours to fintechs.

» NBR organized the first sandbox demo-day which showcased 10 fintech innovations (6 from NBR and 4 from CMA) to other financial institutions to encourage collaboration for fintech growth. The demo day alongside the fintech strategy launch gathered high level government officials, heads of FIs and other fintech development bodies in total of about 250 participants.

» In a bid to democratize data sharing across the financial sector eco-system, NBR, in consultation with the private sector and public

policy makers adopted an open finance position paper and its implementation road map. The position paper stipulates the objectives of open finance in Rwanda, the approach, participants, prerequisite regulatory requirements and governance frameworks. In line with the 5-year road map, NBR also trained heads of IT in the Financial sector on Application Programming Interface (API) standards. This strategic initiative is designed to facilitate the secure sharing of financial data among all stakeholders within the financial ecosystem.

Capacity Building for the Financial Sector

- Banks and MFIs were trained on women-centered product development, defining challenges and designing products to address access to finance challenges for women, while heads of IT from banks, MFIs, Insurance and Fintechs received training on open finance, preparing the institutions for a more connected future.

- To strengthen the capacity of the microfinance sector, the Bank organized corporate governance and risk management training for SACCOs, covering 350 board members and managers across SACCOs, including newly consolidated entities. In addition, 436 SACCO officers were trained on the Electronic Data Warehouse system.

- To strengthen institutional capacity across Non-Bank Financial Institutions (NBFIs), NBR delivered targeted training to 100 loan officers from licensed lending only institutions. These sessions focused on key competencies, including credit analysis, credit risk management, loan classification, and regulatory reporting. In parallel, 20 licensed Trust and Corporate Service Providers (TCSPs) received specialized training in Anti-Money Laundering and Countering the Financing of Terrorism (AML/CFT), addressing critical compliance gaps highlighted during the Eastern and Southern Africa Anti-Money Laundering Group (ESMAALG) mutual evaluation.

INCLUSIVE FINTECH FORUM™ | 24-26 FEB 2025
KIGALI, RWANDA
Kigali International Financial Centre

CONSOLIDATION OF UMURENGE SACCOs

To ensure the continuous professionalization of UMURENGE SACCOs, the National Bank of Rwanda in collaboration with other stakeholders completed the automation of U-SACCOs in June 2024. The Bank then embarked in supporting their consolidation at the District Level. As of end June 2025, nine D-SACCOs have been formed from 131 U-SACCOs with five districts yet to be onboarded eventually with a target to cover all 30 districts. The merger of UMURENGE SACCOs is expected to enhance efficiency, provide convenient access to financial services, improve customer service delivery through a wide range of products and services, and ensure the sustainability of the SACCOs. Regarding other SACCOs, five (5) non-USACCOs of Rulindo district were merged into one strong financial institution named COOPEC IKIRENGA to enhance the social and economic impact on their members' lives.

As part of accompanying measures of the newly established District SACCOs, the NBR delivered an induction training for the 318 newly elected leaders and appointed senior staff of District SACCOs, on risk management, corporate governance, internal control, and AML/CFT. Since strong Corporate Governance is key to the success of any business, the NBR has a big role to play and ensure that the governing organs have the adequate skills and capabilities to perform their responsibilities. Similar training was given to three Deposit Taking Microfinance Institutions (DTMFIs) companies. To support the adoption of digital financial services encouraging a cashless economy and therefore deepening the reach of financial inclusion, four additional DTMFIs were onboarded to RIPPS reaching a total of 15 DTMFIs. To enhance the protection of sensitive data, prevent financial losses that may result from cyberattacks, and increase customer trust and confidence within the DTMFIs, the Bank conducted a cybersecurity awareness campaign covering the USACCOs.

CONSUMER PROTECTION AND EMPOWERMENT

CONSUMER SATISFACTION SURVEY 2024

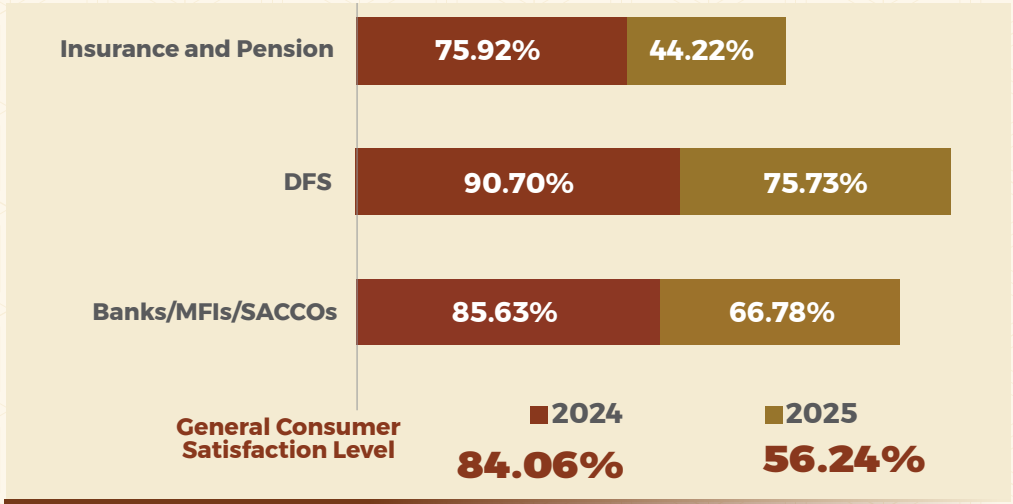
In the FY 2024/2025, the National Bank of Rwanda carried out the second General Financial Service Consumer Satisfaction Survey, following the initial survey conducted in 2021. The primary objectives of the survey were to assess changes in consumer satisfaction levels in response to various consumer protection initiatives implemented over the past three years.

The survey targeted financial service consumers from various financial service providers and financial service providers' representatives from both supply and demand side.
Data was collected from financial service consumers in both rural and urban areas across all 30 districts of the country. The respondents included clients of Banks, Microfinance Institutions (MFIs), Savings and Credit Cooperatives (SACCOs), Digital Financial Services (DFS), Insurance companies, and Pension schemes. The data collection methods involved face-to-face interviews and online questionnaires.

SURVEY FINDINGS

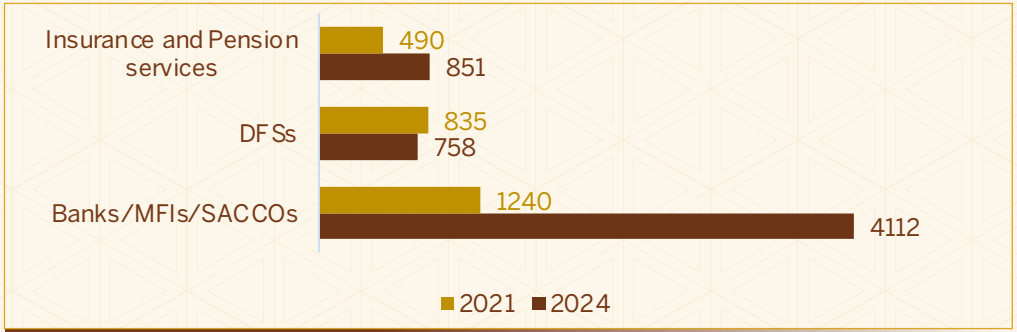
The 2024 Financial Service Consumer Satisfaction Survey covered 5721 consumers, which is more than the 2,565 covered in 2021, and 819 financial service provider staff compared to 261 in 2021.

Figure 15: General Consumer Satisfaction Level



Source: National Bank of Rwanda

Figure 16: Total Respondents from survey that targeted financial service consumers



Source: National Bank of Rwanda

GENERAL CONSUMER SATISFACTION LEVEL

The survey results indicated that there is a positive trend in the general financial service satisfaction level. This favorable outcome is largely attributed to the robust regulatory framework that ensures consumer protection, the effective supervisory framework that promotes compliance and fair practices, and active stakeholder engagement that fosters collaboration, trust, and continuous improvement in service delivery.

Among the areas covered in the survey, consumers shared their perceptions on transparency, fair treatment, complaints handling by financial service providers, and their overall confidence and trust in these institutions.

Table 9: Details of Consumers' perceptions

Sectors	Transparency			Fair treatment			Consumer Confidence and Trust			Complaint handling		
	2024		2021	2024		2021	2024		2021	2024		2021
Banks	80.80%	83.50%	62.79%	88.10%	89.90%	72.21%	79.90%	85.60%	62.79%	66.00%	62.10%	35.71%
MFIs	90%		93.50%		91.40%	60%						
SACCOs	84.60%		90.40%		85.50%	63.09%						
DFSs	**89.70%**		**51.88%**	**94.30%**		**65.31%**	**88.10%**		**56.00%**	**70.10%**		**47.73%**
Insurances	70.50%	72.90%	40.61%	79.50%	81.85%	49.24%	71.20%	72.90%	40.61%	55.10%	55.10%	26.53%

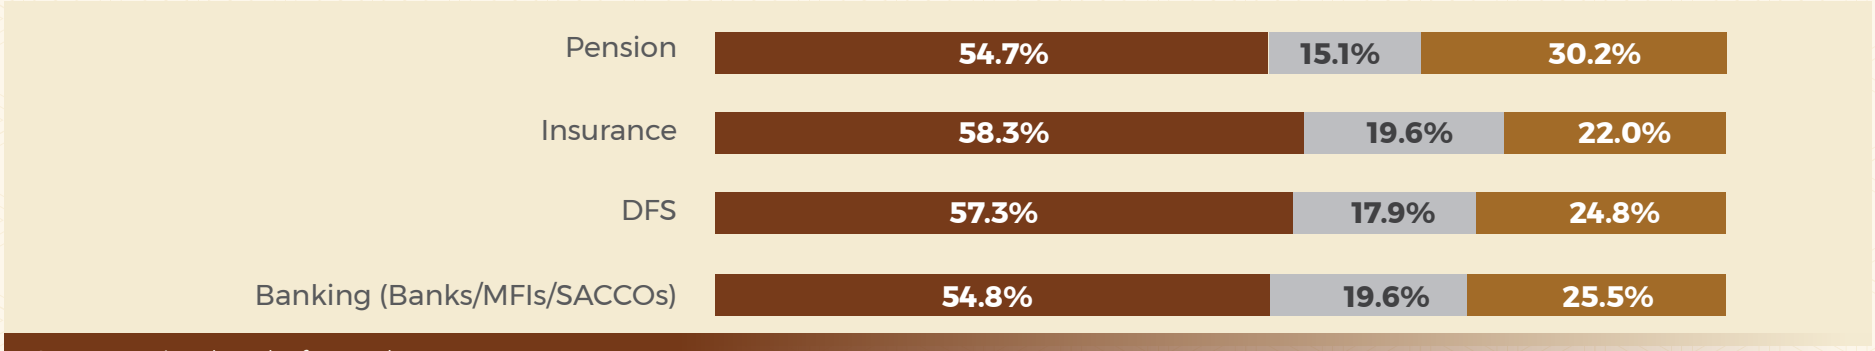
FSPs	**98.40%**		**99.24%**	**97.80%**		**98.84%**	**97.30%**		**98.84%**	**94.50%**		**95.40%**

Source: National Bank of Rwanda

Figure 17: Customers' awareness of their rights and responsibilities



Source: National Bank of Rwanda

The survey indicated that financial service consumers have a low level of awareness regarding their rights and obligations, as well as their application in daily interactions with various financial service providers. This underscores the need for strengthened awareness programs to enhance consumer understanding and to exercise their rights and obligations.

The survey revealed several challenges that financial service consumers continue to encounter in relation to the products and services offered by their providers, including:

- Documents that are still in languages customers do not understand.
- CRB issues (delays in updating CRB, wrong information, insufficient knowledge to check and interpret CRB reports, limited trust by FSPs due to CRB category, and others)
- Loan security savings requested by SACCOs and MFIs that are not remunerated; instead, the client has to pay interest on that amount, even though the funds are retained by the FSP.
- System and network issues, Mobile money fraud and scams and limited digital-related skills.
- Collateral valuation issues (unfair property valuation and significant gaps between forced value and auction price, and reliance on valuation reports provided by valuers appointed by FSPs)
- Expensive insurance premiums for motorbikes
- Delays in claims settlement
- Pension benefits that do not reflect the current market conditions
- Delay in complaints handling issues

In response to the concerns highlighted by financial service consumers in the survey, NBR is dedicated to bolstering its regulatory oversight, enhancing consumer education, and rigorously enforcing policies. By implementing new legal frameworks and actively collaborating with a range of stakeholders to ensure that customer concerns are effectively addressed. This comprehensive approach reinforces its commitment to safeguarding consumer interests and strengthening trust in Rwanda's financial system.

OTHER CONSUMER PROTECTION INITIATIVES.

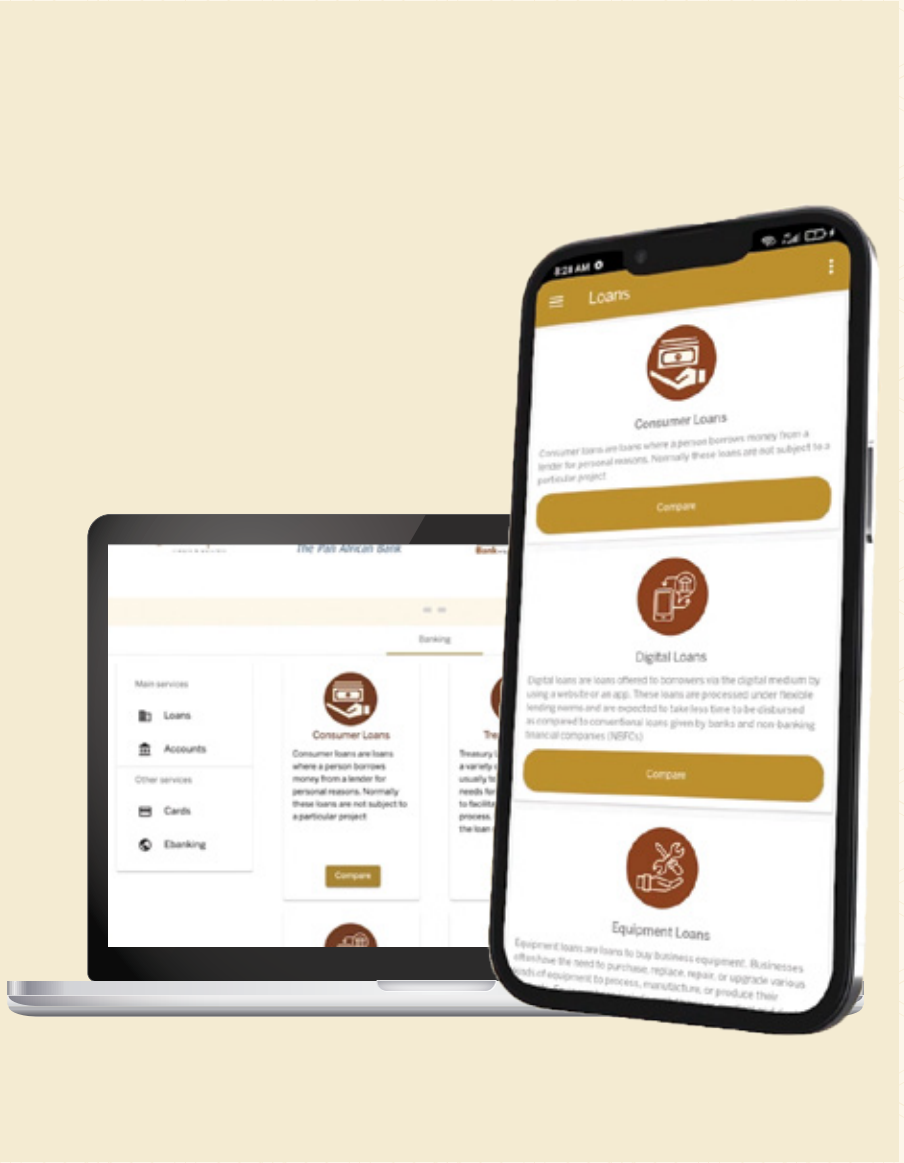
SUP TECH TOOLS

During the year under review, the National Bank of Rwanda upgraded the web comparator (GERERANYA) that assists consumers to compare tariffs of different financial institutions. Previously, the tool was accommodating only commercial banks but other institutions including MFIs/SACCOs, Insurance companies and pension funds, Non Deposit Taking Financial service Providers (NDFSPs), Payment Service Providers (PSPs) and Forex Bureaus were added. The platform is expected to enhance transparency and improve the consumers' ability to make informed decisions.

The NBR also introduced GENZURA, a platform that enables consumers to verify licensed financial service providers through a mobile application and USSD code. This initiative was introduced in response to the growing presence of fraudulent actors in the Rwandan market seeking to defraud consumers. Through GENZURA, consumers can easily confirm whether the financial institutions they engage with are duly licensed.

Ad hoc Technical Committee on forced loan recovery and auctions.

The Bank, together with other members of the Ad hoc Technical Committee—including the Ministry of Justice, Rwanda Bankers' Association, Association of Microfinance Institutions in Rwanda, Rwanda Consumers' Association, Private Sector Federation, Institute of Real Estate Valuers, among others—concluded an assignment to examine challenges in forced loan recovery, particularly unfair auctioning practices and malpractices in collateral valuation. A high-level meeting of these institutions, held in June 2025, adopted the Committee's report. The report outlined a series of recommendations, and an implementation plan was developed scheduled through December 2025.



Financial Sector Conduct and Consumer Protection Forum (FSCCPF)

The Financial Sector Conduct and Consumer Protection Forum (FSC&CPF) was created by the NBR to allow engagement and consultation on different topics that need joint discussions among stakeholders. Members of the Forum are representatives from relevant institutions, selected for their expertise to help achieve its objectives. Key stakeholders include MINECOFIN, NBR, industry associations, the Office of the Ombudsman, RDB, RICA, NCSA, RURA, CMA, and others.

NBR convened the second Financial Sector Conduct and Consumer Protection Forum meeting. The Forum commended key achievements like the formation of a Technical Committee on collateral valuation and forced recovery, enhanced regulatory enforcements, public awareness campaigns, staff capacity-building initiatives, automation advancements in credit reporting and significant improvements in consumer satisfaction compared to 2021, particularly in areas such as transparency, fair treatment, and complaints handling.

Complaints Management

In FY 24/25, the Bank handled escalated complaints and closely followed up the resolution of other complaints submitted directly to financial service providers as shown below.

Table 10: Complaints management

#	Types of complaints		Number of complaints (last financial year2024-2025)	Status			
				Resolved	Percent	Pending	Percent
1	Complaints escalated to NBR for handling.		198	160	80.8%	38	30%
2	Complaints for Follow-up	Complaints to FSPs but BNR was copied	113	88	78%	25	22%
		Complaints to FSPs through Intumwa Chatbot	4,705	3,129	61%	1,576	39%
		Complaints to FSPs via Social Media	34	34	100%	-	0%
		Complaints monitored through Off-Site reports	1,084,693	1,040,906	96%	43,787	4%
	Total		**1,089,743**	**1,044,317**	**95.8%**	**45,426**	**4.2%**

Development in Insurance and Pension Sector

In the insurance sector, the NBR significantly advanced strategic development and oversight. The Bank developed an insurance sector diagnostic report and drafted a National Insurance Strategy (NIS) in consultation with key stakeholders ensuring broad input (demand and supply sides) and sector alignment and the Bank is now finalizing both the NIS and its implementation roadmap.

Regarding the pension sector, the NBR organized a Pension Engagement Week, featuring employer outreach and stakeholder workshops to educate employers and employees on pension benefits and enhance pension coverage. These initiatives underscored the remarkable growth in pension coverage, which surged from 10 percent in 2017 to 48 percent in 2025, largely driven by private schemes and the Ejo Heza program. The Pension Engagement week also highlighted sector innovations like Environmental, Social and Governance (ESG) integration, digital solutions, and new pension products for underserved populations.

PAYMENT SYSTEM DEVELOPMENT

Rwanda's payment system keeps improving to better serve the needs of everyone, focusing on efficiency, resilience, and inclusiveness. The Rwanda retail interoperability system, known as eKash, saw an impressive 219 percent increase in volume, with retail e-payments reaching 321 percent of GDP in June 2025, up from 211 percent in June 2024.

RWANDA FINANCIAL MARKET INFRASTRUCTURE PERFORMANCE

The Automated Transfer System (ATS), Central Securities Depository (CSD), and Rwanda National Digital Payments System (RNDPS/eKash) form the core of Rwanda's financial market infrastructures. To safeguard their stability, NBR conducted on-site inspections of five (5) Payment Service Providers (PSPs), focusing on operational soundness, financial resilience, and compliance with regulations. These supervisory efforts also prioritized strengthening PSPs' due diligence practices to enhance cyber resilience and security.

PERFORMANCE OF THE AUTOMATED TRANSFER SYSTEM (ATS)

In FY 2024/25, the ATS recorded mixed trends:

- Customer transfers increased by 13 percent in volume, reaching 5.4 million from 4.8 million in FY 2023/24, while their value rose by 15 percent to FRW 18 billion from FRW 16 billion. This reflects growing public confidence in digital fund transfers and increased adoption of online banking services.
- Bank transfers experienced substantial growth, with transaction volume increasing by 91 percent to 27,077 from 14,163, while value rose by 31 percent to FRW 14.7 billion from FRW 11.3 billion in June 2024. This expansion was mainly driven by higher interbank settlement activity and the growing use of electronic payment solutions by corporates.
- Cheque usage declined by 6 percent in volume to 229,894 from 245,784, while their value increased by 3 percent to FRW 1.3 billion from FRW 1.26 billion in June 2024. The drop in volume reflects a broader shift toward digital payments, while the rise in value suggests cheques are increasingly reserved for high-value transactions.

PERFORMANCE OF CENTRAL SECURITIES DEPOSITORY (CSD)

The Central Securities Depository (CSD) plays a vital role in enabling the secure trading, settlement, and ownership of securities such as treasury bonds and equities.

- In FY 2024/25, secondary market activity for treasury bonds recorded a slight decline in the number of trades, down 4 percent from 778 to 759. However, the total value traded rose significantly by 159 percent from FRW 54.7 billion to FRW 141 billion, reflecting increased participation by institutional investors in large-value transactions.
- Equities trading showed a mixed performance: the number of trades rose by 9 percent from 620 to 677, while the total value of trades fell sharply by 73 percent, declining from FRW 15 billion to FRW 4 billion. This trend points to heightened retail participation in lower-value transactions, likely reflecting reduced investor appetite for equities amid changing market conditions.

PERFORMANCE OF THE RWANDA NATIONAL DIGITAL PAYMENT SYSTEM (RNDPS)

In FY 2024/25, the Rwanda National Digital Payment System (RNDPS), through its interoperable eKash platform, recorded strong performance.

- As of June 2025, active users stood at 2,160,876, indicating growing platform adoption across financial institutions.
- Transaction volume rose by 219 percent , from 8 million in June 2024 to 25 million transactions in June 2025, while transaction value increased by 251 percent, from FRW 30 billion in June 2024 to FRW 105 billion, compared to June 2024.

This growth was driven by improved interoperability, wider institutional integration, and regulatory support promoting real-time digital payments.

PERFORMANCE OF THE RWANDA NATIONAL DIGITAL PAYMENT SYSTEM (RNDPS)

In FY 2024/25, the Rwanda National Digital Payment System (RNDPS), through its interoperable eKash platform, recorded strong performance.

- As of June 2025, active users stood at 2,160,876, indicating growing platform adoption across financial institutions.
- Transaction volume rose by 219 percent , from 8 million in June 2024 to 25 million transactions in June 2025, while transaction value increased by 251 percent, from FRW 30 billion in June 2024 to FRW 105 billion, compared to June 2024.

This growth was driven by improved interoperability, wider institutional integration, and regulatory support promoting real-time digital payments.

PAYMENT ACCEPTANCE POINTS

Payment access points facilitate payment for products and services by allowing money to enter and exit the payment ecosystem. During the period under review, the number of modern POSs increased by 75 percent from 440,771 to 625,489. Modern POSs includes Virtual POSs (0.1 percent of total modern POSs) and Mobile POSs (99.9 percent).

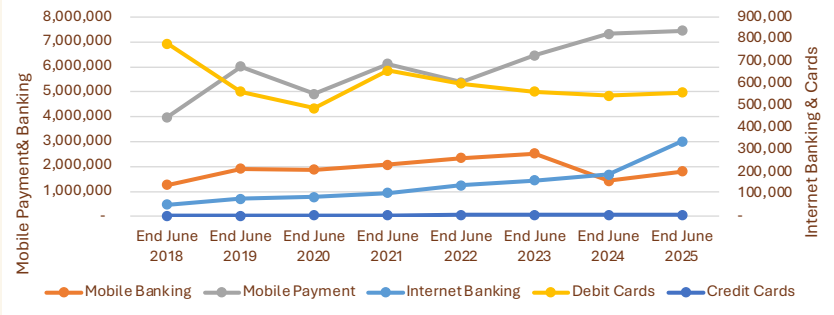
PAYMENT INSTRUMENTS ISSUANCE

With regards to the issuance of payment instruments, active mobile payment subscribers increased by 2 percent from 7,322,881 in June 2024 to 7,457,114 in June 2025. Conversely, mobile banking subscribers increased by 25 percent from 1,436,134 to 1,800,473 over the same period internet banking subscribers grew by 78 percent from 189,809 in June 2024 to 337,950 in June 2025. Usage of payment cards increased in June 2025, debit cards increased by 2 per cent to 558,980 from 545,780 and credit cards also increased by 2 per cent from 6,779 to 6,946.

MERCHANTS PAYMENTS

- Mobile merchant payments grew strongly during the reporting period, with transaction volumes rising by 40 percent from 420 million to 588 million and values increasing by 36 percent from Frw 2,252 billion to Frw 3,065 billion.
- Card-based payments presented mixed results: the number of transactions declined by 23 percent falling from 2.1 million to 1.6 million, while the value of transactions rose by 18 percent from Frw 133 billion to Frw 157 billion.
- Overall, the data highlights faster growth in mobile merchant payments compared to card-based transactions.

Figure 21: Payment Instruments Subscribers



Source: National Bank of Rwanda

Figure 22: Mobile & Card Based Merchant Payments

Source: National Bank of Rwanda

FUNDS TRANSFER

- The value of mobile money based transfers expanded sharply by 56% to Frw 24,931 billion, from Frw 15,951 billion. The volume of these transactions also rose by 40 percent, reaching 1,034 million from 736 million.
- Mobile banking registered the highest growth, with transfer value more than doubling by 112 percent (from Frw 6,645 billion to Frw 14,088 billion) and the number of transactions nearly doubling by 92 percent (from 28.2 million to 54 million).
- Internet banking also maintained steady growth, with transaction values increasing by 36 percent (from Frw 13,937 billion to Frw 18,939 billion) and the volume of transactions up by 16 percent (from 5,239 million to 6,058 million).

These upward trends highlight the impact of rising smartphone access, stronger financial literacy efforts by NBR and providers, and growing trust in the efficiency and convenience of digital channels.

OVERALL PERFORMANCE OF RETAIL E-PAYMENTS TO GDP

In FY 2024/25, retail e-payments demonstrated strong growth, rising by 52 percent from 211 percent to reach 321 percent of GDP

This surge was mainly driven by:

- Mobile payments at 167 percent of GDP,
- Internet banking at 88 percent, and
- Mobile banking at 65 percent
- POS at 1 percent

The increase reflects deeper digital financial inclusion, improved access to payment platforms, and growing consumer preference for cashless transactions.

OUTREACH PROGRAM ON PAYMENT SYSTEM

- **Combating Fraud through Stakeholder Coordination:** NBR strengthened its efforts to combat payment fraud by coordinating the Fraud Prevention Forum (FPF), which brings together banks, PSPs, and other stakeholders in quarterly meetings. These forums serve to exchange information, identify emerging threats, and implement collective mitigation measures. In addition, NBR actively managed fraud incidents by triggering coordinated response mechanisms and holding involved parties accountable. This approach led to improved incident resolution timelines, strengthened internal controls among PSPs and banks, and enhanced trust in the national payment system.

- **The efficiency of the Rwanda National Payment System (RNPS)** was further strengthened through the approval of a new Strategy by the National Payment Council (NPC). The NPC, which provides guidance on the safety and efficiency of the RNPS, approved the 2025–2029 Strategy built around six pillars summarized under the acronym TRACID: Trust and Confidence, Regulatory Capacity, Affordability, Choice and Inclusion, International Trade and Remittances, and Decentralized Finance. The TRACID framework reflects the essential features of a world-class payment system and is directly aligned with the needs, opportunities, and challenges faced by payment users, service providers, and other participants

- **Strengthening Cross-Border Cooperation:** NBR continued to play a leading role in advancing cross-border collaboration to promote efficient and inclusive digital financial services. Regionally, the Bank contributed to the development of the EAC Cross-Border Payment System Masterplan, which was approved by the EAC Monetary Affairs Committee in May 2025. The Masterplan provides a five-year strategic roadmap to improve the efficiency, accessibility, and security of cross-border payments across the EAC.

- **Customer service** was enhanced through a survey conducted across all licensed payment service providers. The objective of the survey was to gain insights into how NBR's services, including licensing, approvals, development of legal instruments, and overall communication are perceived by payment service providers, in order to inform targeted service enhancements. The survey findings revealed that NBR has made commendable progress, particularly in the areas of professionalism and regulatory support.

CURRENCY AND BANKING OPERATIONS

The National Bank of Rwanda (NBR) maintains currency stability and trust through prudent management and strategic policies, supporting sustainable growth. This chapter covers strategies, achievements, and policy issues in currency and banking operations. The Bank ensures commercial banks are well supplied with cash by issuing banknotes and coins, processing deposits, and overseeing cash movement across branches.

NBR enhances banknotes and coins with durable substrates and security features to extend their lifespan and boost public confidence in the Rwandan franc, promoting economic stability and national pride.

BANKING OPERATIONS DEVELOPMENTS

CENTRALIZED QUERY MANAGEMENT SYSTEM (NBR ARCIB)

To enhance customer and stakeholder satisfaction, the Bank continued using a centralized query management system, NBR ArcIB, designed to deliver prompt responses to customer inquiries. Supported by a 24/7 Internet Banking Support team and a dedicated email group (BNR_ARC-IB@BNR.rw), the system significantly improved reliability and stability. As a result, most customer complaints were resolved on the same day (T+0), and overall customer satisfaction increased from 95% in 2023/24 to 98% in 2024/25. Furthermore, the response time for customer queries was reduced from 2 days to 1 day, enabling faster feedback and higher satisfaction levels.

DESIGN OF NEW BANKNOTES

The Bank introduced new designs for the Frw 5000 and Frw 2000 banknotes. Over time, banknote designs have continually changed, driven by advances in technology and shaped by economic, political, and cultural influences. Usually, denominations that have been in circulation for over five years are considered for redesign.

By 2024, the previous series of the Frw 5000 and Frw 2000 denominations had reached ten years in circulation in Rwanda. To enhance the quality of currency in use, the National Bank of Rwanda issued new series of these denominations, featuring upgraded security measures, refreshed color schemes, and refined thematic elements.

For that purpose, the National Bank of Rwanda (NBR) in designing new notes applied below main changes for both denominations:

- Upgrade of old design (Mix of colors and placement of features on the banknotes, including main theme to mark Rwanda's aspiration to Social Economic Development).
- Upgrade of the banknote security features (Security threads and the spark).
- Upgrade of banknote technology design including strong and durable substrates.
- Align security features on the banknote to facilitate the public with the easy readability of features.

FIVE THOUSAND RWANDAN FRANCS (FRW 5000):

A dominant color is Lilac, on the front there is a design of a building “Kigali Convention Center” located in Kigali City to represent modern Rwanda and the government of Rwanda’s aspiration to promote Conference tourism. There is also a Gorilla spark security feature that changes colors depending on the direction in which the note is taken. On the back there are images of small baskets to represent the government of Rwanda’s effort to promote crafts and history. There is also a vertical security thread changing colors depending on the direction in which the note is taken.

FRONT SIDE

BACK SIDE

TWO THOUSAND RWANDAN FRANCS (FRW 2000):

A dominant color is Clear Violet, on the front, there is an image of Lake Kivu Mountains to represent the Government of Rwanda’s effort to promote the beauty of Rwandan mountains and lakes in line with the natural attractions of Rwanda. There is also an image of a small basket spark security feature changing colors depending on the direction in which the note is taken. On the back, there are images of coffee beans to represent the government of Rwanda’s aspiration to promote agriculture for export. There is also a vertical security thread changing colors depending on the direction that the note is taken.

Both new designed banknotes for Frw 5000 and Frw 2000 denominations are circulating together with the other existing banknote series which are legal tender in Rwanda.

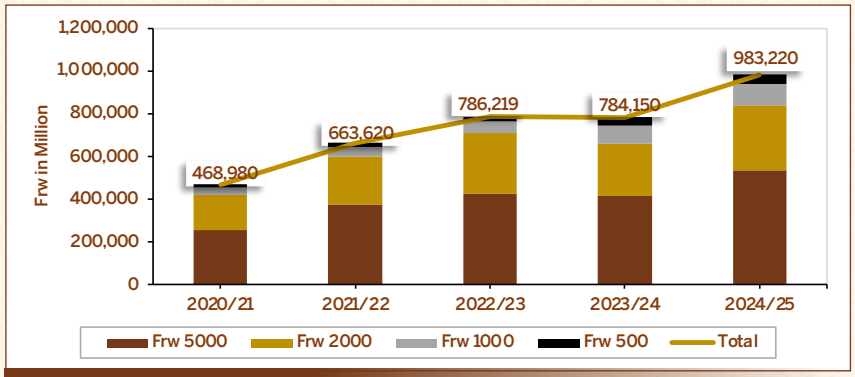
IMPROVED CASH CYCLE MANAGEMENT

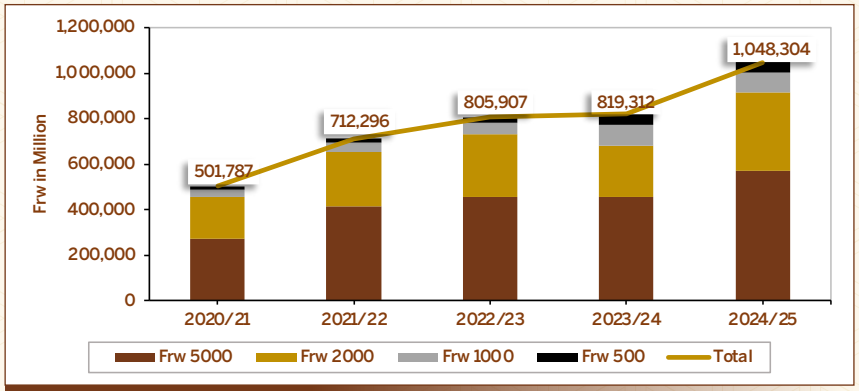
The charts below show the trend in deposits and withdrawals for the previous five years:

Figure 22: Banknotes Deposits



Source: National Bank of Rwanda

Figure 23: Withdrawals of Banknotes



Source: National Bank of Rwanda

- **Cash Deposits:** In the FY 2024/25, total cash deposits of banknotes rose by 25.39 percent, reaching FRW 983.20 billion, up from FRW 784.15 billion in the FY 2023/24.
- **Cash Withdrawals:** Contrary to this, total cash withdrawals increased by 27.95 per cent, reaching FRW 1,048.30 billion, up from FRW 819.31 billion in the previous year. This increase in cash deposits and withdrawals is linked with the improvement in economic growth.

ADDRESSING BANKS' CASH DEMANDS:

In response to the evolving requirements of financial institutions, the Bank consistently supplied banknotes to satisfy liquidity demands. During the financial year 2024/25, approximately 464.38 million banknotes were circulated, reflecting a significant increase of 16.73 percent compared to the preceding year, 2023/24.

COMBATING COUNTERFEITING:

Dedicated to safeguarding the integrity of the monetary system, the Bank upheld a vigilant stance against counterfeiting. Its banknotes integrated advanced security features, leading to an exceptionally low counterfeit rate of just below 0.00001 percent per denomination. Furthermore, the Bank's ongoing collaboration with law enforcement agencies has fortified a resilient defense against counterfeiting activities.

CURRENCY PROCESSING ADVANCEMENTS:

Focusing on efficiency and improving services, the Bank increased its currency processing volume by 20.11%, handling 316.57 million banknotes in the 2024/25 financial year, up from 263.56 million the year before. This result highlights the Bank's dedication to advancing currency processing technologies and practices.

Cash processing improved by 20.11 percent, and its contribution to cash re-issuance grew by 24.00 percent. This growth was driven by several initiatives, including extended processing hours through shift work and the utilization of outsourced cash processing services.

STABILIZATION OF THE UPGRADED T24

- The upgrade of T24 core banking system was aimed at strengthening operational efficiency and minimizing downtime. This upgrade facilitated the implementation of new modules, including R23 for 24/7 transactions, TCIB for internet banking, and the AA lending module for improved loan management.
- Overall, the T24 Core Banking System, along with Internet Banking, cheque-clearing, and Vault Automation Systems, continued to streamline the operations of NBR branches, commercial banks, and public institutions. These systems have reduced manual data entry, enabled real-time monitoring, optimized cash movement, and supported seamless integration with other platforms, including financial reporting systems.
- The total volume of transactions with internet banking grew by 19.29 percent to 4.13 million, up from 3.46 million in the previous year. This growth was largely driven by the Government's ongoing efforts to promote a cashless economy.
- The daily average payments also grew, reaching Frw 7.9 billion in financial year 2024/25 compared to Frw 7.2 billion in 2023/24. This growth was supported by the system's efficient operations covering 17 hours a day including weekends (from 7:00 AM to 11:59 PM), as well as higher government budget allocations and effective implementation during the reporting year.
- Banking operations continued to be conducted through online platforms, with all payments processed via both Internet Banking and the Integrated Financial Management Information System (IFMIS).

Table 12: Cash processing performance

Financial Year	Quantity of Bank notes processed	Growth (percent)	Value of Re-issue output	Growth (percent)
2019/20	97,557,047		80,779,092	
2020/21	124,581,306	27.70 percent	106,651,319	32.03 percent

RESERVES MANAGEMENT

The National Bank of Rwanda plays a vital role in protecting and managing the country's foreign exchange reserves.

The Bank operates within a Reserves Management Framework that seeks to ensure efficient oversight and proper use of these reserves. The main objectives are to maintain sufficient reserves to cover import needs, enhance the country's resilience to external shocks, and maximise investment returns.

GOVERNANCE FRAMEWORK

The Bank's Governance framework for reserves management is well-structured and ensures clear objectives, risk management, and compliance. The Board of Directors is responsible for approving the Strategic Asset Allocation (SAA), which outlines the Bank's reserves management goals and risk tolerance. The investment policy derived from the SAA provides guidelines for delegation of authority and a system of checks and controls to ensure compliance throughout the hierarchy. The Reserves Management Committee (RMC) oversees the daily operations of reserves management.

PERFORMANCE OF NATIONAL RESERVES

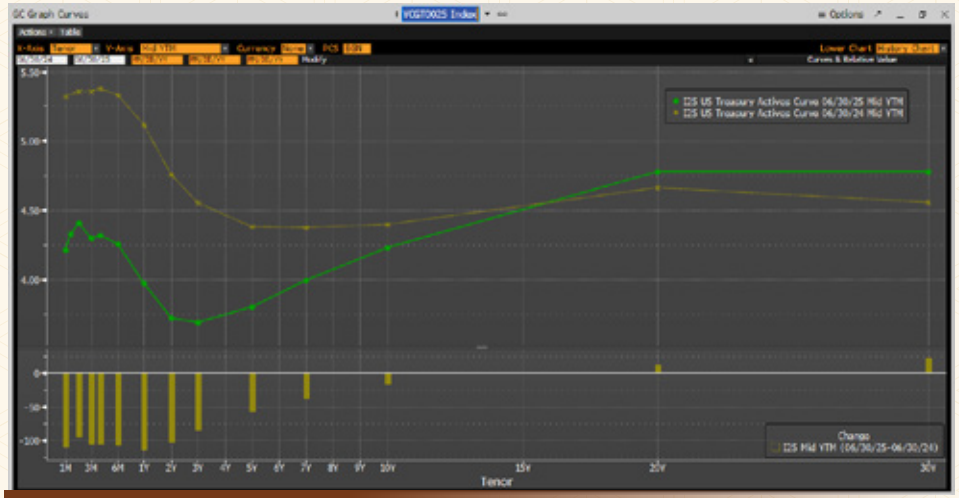
The U.S. headline inflation averaged 2.63 percent over the financial year, gradually declining to 2.47 percent by the end of June 2025. Core CPI decreased to 2.9 percent in June 2025 from 3.3 percent in June 2024. With inflation measures below 3 percent for much of FY2024/25, the US Fed implemented three consecutive rate cuts between September and December 2024, totalling 100 basis points, lowering the Fed's target rate to a range of 4.25-4.50 percent from 5.25-5.50 percent observed throughout the previous FY 2023/24.

Figure 25: US Policy Rate Development (June 2023 – June 2025)

Source: Bloomberg

Following the US Fed's policy stance, the US treasury market showed strong performance as yields dropped across nearly all tenors. The short-term segment (1 month to 2 years) experienced a decline of over 100 basis points, while the 5-year and 10-year yields decreased by 60 and 17 basis points, respectively. Overall, the market reaction to the Fed's stance resulted in a notably flatter US yield curve.

Figure 26: US Yield Curve Change (YC end June/24 vs YC end June/25)



Source: Bloomberg

Despite these market volatilities, the NBR managed to preserve capital, and achieved a total portfolio return of positive 6.315 percent, above the benchmark return of 6.251 percent.

THE BANK'S
FOREIGN RESERVES
STOOD AT

USD 2,322 M

June 2025

FROM
USD 2,039 M
June 2024

In terms of reserves adequacy, the NBR maintained an adequate level of foreign exchange reserves to ensure resilience against external shocks. As of end June 2025, the level of Bank's foreign exchange reserves stood at USD 2,322 million from USD 2,039 million recorded at end June 2024, covering 4.8 months of prospective imports. The overall increase in the level of reserves is a result of inflows from different partners during FY 2024/25 coupled with the good performance of both internally and externally managed portfolios.

Ensuring sufficient liquidity to meet potential liabilities remained a crucial aspect of reserves management. The NBR maintained a careful balance between short-term and longer-term investments to ensure the ability to respond swiftly to unexpected events or demands by maintaining the liquidity and investment tranches. As of June 2025, liquidity and investment tranches were maintained at 25 percent and 75 percent respectively, aligning with the benchmark and the Strategic Asset Allocation (SAA) policy.

The NBR worked closely with fund managers and international institutions to share information and best practices related to reserves management. Risk management remained a top priority, with the NBR employing various risk assessment techniques to identify, measure, and mitigate potential risks associated with the reserves portfolio.

RESERVES MANAGEMENT AUTOMATION

The NBR made significant progress in automating the reserves management process during FY 2024/25. The integration of automation across the entire investment cycle, including trading, risk management, and transaction settlement, enhanced operational efficiency. This integration also extended to the Bank's core banking system, ensuring a cohesive operational framework. In addition, the Bloomberg Asset Investment Management tool (Bloomberg AIM) was fully implemented during FY 2024/25.

This advancement broadened the Bank's market reach, facilitating access to diverse asset classes. Additionally, the automation of market data input led to the timely availability of live market data.

ECONOMIC AND POLICY RESEARCH

The National Bank of Rwanda strengthened its evidence-based decision-making through quarterly economic analyses that guided monetary policy actions to ensure price stability and a sound financial system. Complementing these efforts, the Bank produced research and policy briefs that informed policy formulation and provided strategic economic advice to the Government.

The Bank's research focused on a diverse range of topics, including the effectiveness of monetary policy, financial stability, regional integration, external sector sustainability, and gender equity in economics, reinforcing the Bank's role in evidence-based policymaking and advisory support to the Government.

ECONOMIC RESEARCH

The Bank's research covered a wide range of topics. The first paper investigated the "Drivers of the Demand for Cash in Rwanda." The paper found that while agent banking and mobile payments reduce reliance on cash, other channels such as ATMs and POS channels, have little long-term effect, with demand still shaped by interest rates and overall economic activity. The paper on the "Drivers of Digital Payments in Rwanda" confirmed that financial inclusion has reached 96 percent, with convenience and security driving usage, though high costs and rural residence continue to limit adoption. These papers unpacked the current challenges in the journey to fully adopt digital payments that can shape policies going forward.

Several papers advanced understanding of inflation dynamics. Firstly, the paper on "Short-term inflation forecasting using novel machine learning approaches" recommended the adoption of new methods including using machine learning tools to improve NBR's economic forecast. Secondly, the paper on "Commodity Price Shocks, Inflation, and Monetary Policy amid Uncertainty" showed that international food prices pass through quickly and strongly to domestic inflation, while oil prices have a slower effect, with impacts intensifying during supply chain disruptions and geopolitical shocks. Thirdly, a paper on "Deal with Devils: Weather Shock, Supply Chain Pressure, and Food Inflation Dynamics in Sub-Saharan Africa" found that climate variability, when combined with global supply chain pressures, significantly raises and sustains food inflation across the region. At the household level, fourthly, the paper on "Factors Influencing Demand for Food in Rwanda" revealed that demand for key staples is not price sensitive, with demographic factors such as household size, income, and location are major determinants of consumption. These papers helped to better understand the sources of inflation and how to improve short-term inflation forecasting.

Other studies assessed monetary policy communication and transmission. The paper on "Rwanda Monetary Policy and Financial Stability: Insights from Twitter Interaction Networks and Public Engagement" demonstrated that the tone and clarity of communication strongly influence public perceptions and policy expectations, with positive sentiment overall. Another paper on "Tracking the Operational Transmission of Monetary Policy in Rwanda: A Novel PCA-Based Approach" confirmed that interest rate and exchange rate channels respond significantly to changes in the central bank rate, while the bank lending channel shows weak responsiveness due to structural constraints.

Internationally published work included one paper on "Adverse Weather Shocks and Monetary Policy in Rwanda" which found that stabilizing core inflation after weather shocks reduces welfare losses by about 17 percent, and a second paper on the "Monetary Policy Reaction Function in Emerging Economies", which showed that central banks in emerging markets follow an expanded Taylor rule that incorporates not only inflation and output gaps but also external financial conditions and commodity prices.

Finally, a paper on how institutional quality and AI readiness affect economic growth in 30 sub-Saharan African countries (including Rwanda) was produced and presented at an international research conference held at the University of Nairobi. The findings of this study revealed that strong institutions, especially in the form of regulations and accountability, boost capital formation and trade. The paper also empirically supported

the view that financial development and education promote growth, while the interaction between good governance and AI readiness accelerates economic progress. Top-performing countries showed that better institutions enhance AI adoption and its benefits. Policy recommendations include improving regulations, promoting AI across different economic sectors, expanding digital literacy, education, and financial access to support inclusive growth.

OTHER POLICY RESEARCH

The Bank produced eight (8) policy briefs that provided timely insights into domestic and international policy issues. One brief highlighted that monetary policy is less effective during inflation driven by weather shocks, recommending a focus on core inflation to avoid overreacting to volatile food prices. Another brief examined monetary policy reaction functions in emerging economies, emphasizing the need for adaptable policy frameworks that account for external shocks such as global commodity price changes and policy shifts in major economies. A regional brief on income convergence in the East African Community (EAC) concluded that full integration remains premature due to weak convergence among member states.

Furthermore, two briefs explored Rwanda's transition from cash to digital payments, noting mobile money's dominance while stressing the need for secure, affordable, and inclusive platforms to deepen usage. A policy brief on the comparative analysis of Argentina's stabilization efforts offered lessons for Rwanda, particularly the importance of central bank independence and targeted social programs. Two additional briefs focused on Rwanda's external sector and exchange rate policies, underscoring persistent current account deficits, structural trade imbalances, and the importance of export diversification and exchange rate flexibility. Finally, a brief on women in economics highlighted the critical role of inclusivity in strengthening the quality and impact of economic research and policymaking. Collectively, these briefs broadened the scope of analysis and reinforced the Bank's capacity to provide forward-looking policy advice.

ENABLING THE BANK

PEOPLE AND CULTURE

In pursuit of becoming a world-class central bank, we recognise that our greatest strength is our people. Our employees are key to fulfilling the Bank's mandate of maintaining price stability and financial stability for the benefit of the Rwandan population.

In FY 2024/25, the overall workforce is 585; two-thirds male (66.6% male vs. 33.4% female). Male representation is consistently higher than female representation across most categories, except in Management, where it is equal (50% each). NBR acknowledges the inherent gap, established a gender main streaming strategy and progressive actions, and aims to undertake policy reviews that intentionally promote stronger gender diversity in leadership and throughout the organisation.

Over the past year, the Bank has taken bold steps to position itself as an Employer of Choice. This initiative demonstrates NBR commitment to attracting and retaining top talent, embracing diversity and inclusion, fostering a positive organizational culture, promoting work–life balance, and upholding the highest ethical standards. By prioritizing employee well-being and professional development, the Bank is building a resilient and capable institution that is prepared to face today's challenges while also preparing for the opportunities of tomorrow.

HOLISTIC ORGANISATIONAL RESTRUCTURING

Guided by the NBR Strategic Plan 2024–2029 and the Digital Transformation Strategy launched in July 2024, the Bank undertook a comprehensive Organisational restructuring exercise—the first full review since 2014.This was to ensure the structure that delivers the strategy.

The monetary and financial sector has transformed considerably over the past decade, driven by technological innovation, greater financial inclusion, more robust consumer protection frameworks, changing communication roles, and increased concerns about money laundering and cybersecurity. The swift move towards digitalisation has introduced new complexities, highlighting the need for a renewed organisational structure.

Key outcomes of this restructuring include:

- Adoption of a new organizational structure that delivers the strategy, aligned with emerging sector needs and operational efficiency.
- Workload analysis which determined the staffing levels required to meet both current and medium term demands.
- These reforms are vital for improving staff satisfaction, boosting retention, and ensuring the Bank is well-placed to fulfil its mandate in a fast-changing economic environment.

COMPENSATION AND BENEFITS

To remain competitive in the labour market, the Bank conducted a comprehensive salary survey, which informed the design of an updated salary structure. This ensures that a compensation framework that remains aligned with industry standards, enabling us to attract and retain high-calibre professionals.

Furthermore, the Bank implemented a Compensation and Benefits Policy that provides a transparent framework for fair, competitive, and performance-oriented rewards. This policy underlines our dedication to fairness and responsibility, while also enhancing employee engagement and satisfaction.

ORGANISATIONAL CULTURE

Recognising the importance of culture in influencing performance, the Bank created a Culture Change Management Plan to enhance alignment with its long-term vision and values.

Key initiatives included:

- Leadership Development Programmes to cultivate visionary and inclusive leaders.
- Performance Incentive Programmes designed to motivate excellence and accountability.
- A Psychological Safety Framework to promote openness, trust, and well-being across the organisation.

To ensure wide engagement, all leaders and staff took part in focused training sessions on culture and their role in fostering change. Additionally, a group of Culture Ambassadors was appointed to lead and support the implementation of the plan.

PEOPLE DEVELOPMENT

Building staff capacity continues to be a top priority for the Bank. Through the Annual Capacity Building Plan, we identified training needs and provided targeted programmes that enhance staff's technical, digital, and leadership skills.

Learning and development goals are integrated into individual staff KPIs and are monitored extensively. In 2024–2025, key initiatives included:

- Implementation of the NBR Training Curriculum through in-house programmes.
- Management Development Programme (MDP) for managers.
- Leadership Development Programme (LDP) for senior leaders.
- Mentorship initiatives to strengthen knowledge sharing and professional growth.
- Workshops on Culture Change Management, which received highly positive feedback from staff.

As reflected in staff feedback, these initiatives have had a measurable impact, reinforcing the Bank's commitment to building a skilled, motivated, and future-ready workforce. However, remains an intentional journey of growth.

INITIATIVES UNDER PEOPLE AND CULTURE

Annual Capacity Building Plan

The Bank implemented its annual capacity building, employees have access to a range of learning opportunities for career growth. Capacity building plan mainly included professional certifications, workshops/conferences, digital literacy, and technical training, all conducted abroad, in-house, or online.

The execution of the annual capacity building plan was implemented with the support of different partners, such as;

- IMF, MEFMI, World Bank-RAMP, AFI, ICPAR, ACCA, CFA, ISACA, CISA, PMI, ICF to mention a few, offering continuous professional development opportunities
- Online platforms such as FSI Connect and Toronto Centre subscriptions provide regulatory and supervisory skills to staff in the financial sector, and the Kubicle Learning Platform provides Data, Tech and AI training.
- Knowledge Resource Centre that provides access to both E-Library and E-Learning platforms to enable continuous learning across the Bank through SharePoint.
- The Culture Factor offering Culture transformation-related training.

Training Curriculum implementation through in-house trainings

Building on the success of the Training of Trainers programme conducted in FY 2022-23, training has become an additional responsibility for the NBR internal trainers and is explicitly included in their individual KPIs. In FY 2024-25, the implementation of the in-house training curriculum made significant progress. Out of 57 planned trainings, 50 (87.72 percent) were completed. The training scope encompassed both technical and soft skills training. Post-assessment surveys showed positive results, including improved technical efficiency, behavioural changes, and the acquisition of new knowledge and skills. Participants highly praised the expertise of internal trainers and appreciated the programme for considering the local context.

International Sustainability Standards (In-house training) 2025

Q&A Session during the general staff meeting

LEADERSHIP DEVELOPMENT TRAININGS

Culture Change Management Workshop

The Bank, in partnership with The Culture Factor, embarked on a Culture Change Management Journey to enhance performance, collaboration, and teamwork as vital values in support of the digital transformation strategy, the five-year strategic plan, and the new organisational structure.

The Culture Change Management Course was compulsory for all staff, covering culture awareness, results from the May 2023 culture scan, and key shifts needed to align the current culture with the Bank's strategic goals. Using Hofstede's 6-D Model, the training highlighted how culture influences communication, performance, and decision-making.

The sessions pinpointed priority change levers: strengthening professionalism, aligning individual purpose with organisational vision, fostering openness to global trends, encouraging diversity, and improving leadership behaviours for healthy conflict and continuous learning.

Following the workshops, a Culture Change Management Plan was created and approved for inclusion in the FY 2025–2026 Business Plan. Staff feedback showed strong appreciation for the engagement and interactive learning process.

Management Development Program (MDP)

To meet the increasing demand for adaptable and effective leadership in a progressively complex business environment, the Bank, in collaboration with the African Management Institute (AMI), launched a six-month Management Development Programme (MDP) for 14 middle managers. The programme aimed to equip them with practical leadership, emotional intelligence, and strategic management skills, tailored to real-world challenges. It was organised into three progressive stages: defining leadership identity, strengthening team connections, and maximising team performance.

The MDP combined in-person learning laboratories with an online platform, guiding participants through personalised Change Challenge projects to ensure practical application of skills. The programme delivered strong results: 100% enrolment and graduation, a 93 percent completion rate, and a high Net Promoter Score of 92, reflecting its perceived value. Feedback highlighted notable improvements in core competencies, with 92 percent reporting better communication and influencing skills, 84 percent indicating enhanced feedback and coaching abilities, and 83 percent experiencing stronger leadership.

Challenges such as limited internal collaboration, resistance to technology, and stress-related issues due to ongoing organisational restructuring were acknowledged during the programme. Overall, the MDP made a tangible impact on both individual and organisational growth, fostering a more agile, collaborative, and strategically aligned management culture within the Bank and encouraging more managers to enrol in future programmes.

Mentoring Programmes

This year, the Bank launched Cohort 4 of the Mentoring Programme, with 82 NBR staff enrolled: 36 mentors and 46 mentees. The ongoing participation demonstrates the value and impact of the programme within the Bank. Through this initiative, mentees shared how mentorship connected them with inspiring leaders, created learning opportunities, and fostered lasting professional relationships. They reported consistent positive changes in behaviour, boosted confidence, improved decision-making skills, and professional growth.

Mentors also highlighted the benefits of sharing their expertise, giving back, developing leadership skills, and gaining new perspectives in form of reverse mentorship as key advantages of the programme. This mutual growth and learning continue to make the initiative influential and capable of delivering sustainable results.

> Having a mentor is like having a lifeline, someone who not only supports your work at the Central Bank but also helps you navigate life, drawing from their own lived experiences.
>
> Mentorship equips you with the confidence and perspective needed to grow, both professionally and personally, while providing a strong support system along the way.
>
> **~ Mentee**

Financial education Program

The National Bank of Rwanda, in collaboration with the National Financial Education Programme (NEP), has made significant progress in promoting financial literacy in the workplace. In this FY 2024-25, over 70 percent of NBR staff took part in a financial education programme organised in March 2025.

The training reached various groups, including NBR staff aged 50 and above. Pre- and post-training assessments showed notable improvements in confidence, readiness, and financial knowledge, especially in budgeting, savings, investments, retirement planning, and long-term financial security. Feedback highlighted the value of practical sessions, expert involvement, and the need for more in-depth, personalised training formats, with older staff stressing emotional preparedness for retirement and accessible, action-oriented learning approaches.

Induction training program

In FY 2024/25, the Bank recruited and successfully onboarded 42 new staff members: 71.4% were male and 28.6% female.

As part of the ongoing recruitment process, induction training is organised twice a year, in December and June, to equip new staff with the fundamentals of central banking functions, the Bank's strategic direction, and an understanding of organisational culture and HR policies. The new recruits expressed positive feedback on gaining an understanding of the Bank and its functions, as well as their responsibilities as employees to help achieve the Bank's strategic goals in their respective roles.

ICDL Certification Program

To support the digital transformation strategy, the Bank formed a partnership with ICDL Africa to enhance the digital skills of its staff. Fourteen staff members nominated as trainers were certified through the ICDL programme and underwent trainer training to acquire the necessary skills to deliver the ICDL certification programme across the Bank. After completing their training, the National Bank of Rwanda was assessed and designated as an accredited centre capable of training and certifying its staff. Priority was given to ICDL workforce modules covering computer and online essentials, Documents 365, Spreadsheets 365, PowerPoint Presentation, Teamwork, Data Protection, and Cybersecurity.

This year, 36 staff were trained and passed their certification exams in addition to 42 that were certified in FY 2023-24. The Bank will continue to enroll more staff to ensure that all staff are trained and certified in the workforce module.

> Thanks to coordinated policy efforts, Rwanda's economy recorded robust real **GDP growth of 6.3 percent** for the year. At the same time, the financial sector remained stable and well-capitalized, with **total assets** growing by **22.6 percent.**
>
> **~Soraya M. Hakuziyaremye,**
> Governor of the National Bank of Rwanda

Project Management Program

Recognising the importance of having competent professionals to manage projects, the Bank partnered with the Worldwide E-Learning Campus to provide training and certification for nominated staff. This initiative has enhanced the Bank's project management capacity, with sixteen (16) staff members certified as Project Management Professionals (PMP) and two (2) staff members certified as Agile Certified Practitioners (ACP).

Promoting Employee Well-Being

A central pillar of our people's strategy is to ensure health and well-being of all employees. The Bank has implemented holistic initiatives that promote physical, mental, and social wellness while fostering a supportive and inclusive workplace culture.

Health Promotion and Disease Prevention

The Bank advanced employee well-being through regular health education sessions, annual medical check-ups, and accessible mental health services, fostering informed lifestyle choices and early disease prevention.

Physical Activity and Recreation

Active lifestyles were promoted through inter-directorate sports tournaments, subsidised access to fitness centres, and weekly group sports, strengthening teamwork and a culture of wellness.

ADVANCING CORPORATE SOCIAL RESPONSIBILITY (CSR)

During the FY 2024/25, the Bank strengthened its commitment to Corporate Social Responsibility (CSR) by promoting inclusivity and community development. During the year, it provided financial support to Ibuka and Solid Africa, extending essential care to vulnerable groups, and completed Ndera Early Childhood Development (ECD) projects that contribute to long-term human capital development and social welfare. Through these initiatives, the Bank demonstrated its dedication to improving community well-being and reaffirmed that social responsibility remains a core element of its mandate, complementing its central role in fostering economic stability and inclusive growth.

ICT DEVELOPMENT

In FY 2024/25, the Bank collaborated on different initiatives in alignment with the Bank's digital transformation strategy, business automation, cybersecurity resilience and infrastructure enhancement.

CYBERSECURITY AND ICT GOVERNANCE, RISK AND COMPLIANCE:

Cybersecurity Awareness

A major milestone was the scale-up of cybersecurity awareness for internal staff, NBR internet banking users and over 500 U-SACCO staff were trained in all districts in cybersecurity best practices. This initiative established a strong foundation for long-term cybersecurity resilience and effectively equipped staff for the automation and consolidation of U-SACCOs. .

FinSOC Integration

The integration of financial institutions into the Financial Security Operations Center (FinSOC) progressed significantly. The number of beneficiaries (commercial banks) increased to 81 percent in FY 2024/25 from 55 percent in FY 2023/24. This expansion enhanced sector-wide visibility, enabled real-time threat intelligence sharing, and improved coordinated incident response capabilities.

ISO 27001 Certificate maintained, and Standard upgraded

As part of the Bank's commitment to cybersecurity resilience, NBR successfully maintained its ISO 27001 certification, upgrading to the current version (2022) from the 2013 standard and passing the scheduled recertification audit. Vulnerability management remained a key focus, with structured internal and external assessments conducted to mitigate risks and enhance resilience. The Bank also transitioned to COBIT19 from COBIT5, aligning IT governance with global best practices to support innovation and transformation. These efforts reinforce NBR's leadership in cybersecurity and its dedication to safeguarding Rwanda's financial sector, while preparing to expand threat intelligence and meet emerging global standards.

DIGITAL TRANSFORMATION AND IT SERVICE IMPROVEMENT.

The Bank is coordinating the execution of the digital transformation strategy, a program planned to run for the next 4 years. In the first year, the Bank planned 27 initiatives with a completion rate of 75 percent, while other initiatives are crosscutting to FY 2025/26.

Leveraging data:
To enhance the Bank's capability to leverage data, NBR established a central environment for business intelligence (BI) through which transaction data is analyzed in near real time. NBR also established a Forex API, a new service enabling financial service providers to consume exchange rates in real time.

Upgrade of the core banking in compliance to ISO20022
NBR upgraded its core banking system to the new cross-border payments standard to ISO 20022 (MX) from ISO 15022 (MT), which brings a modern and versatile messaging standard in the financial industry. This will ensure cross-border transactions of NBR customers are not disrupted come the cut-off date of November 2025.

Improving service delivery to participants on RIPPS
NBR enhanced the quality of service provided to participants on the Rwanda Integrated Payment Processing System (RIPPS) by upgrading the STPA. This upgrade addressed several issues that previously hindered smooth inter-bank transactions. Additionally, the introduction of clearing sessions during weekends and public holidays has further reinforced the system's 24/7 operational capability.

In-house developed solutions
NBR developed a state-of-the-art recruitment platform optimizing the recruitment processes, improving user experience, data ownership and control, and smoothing the entire recruitment process. This in-house developed solution led to saving costs on annual license fee, and flexible customization.

OUTREACH AND PARTNERSHIPS

In FY 2024/25, the Bank made significant strides in strengthening the visibility, accessibility, and transparency of its policies and operations . Through a strategic mix of digital, traditional, and face-to-face platforms, the Bank deepened public understanding of monetary policy, financial stability, and regulatory initiatives while positioning itself as a credible, people-centered institution.

OUTREACH INITIATIVES

Expanding Digital Reach and Transparency

Over the course of the year, the Bank harnessed the power of digital communication to bring complex economic topics closer to the public. Sixty-one explainer videos were produced and shared across platforms, tackling issues that matter most to citizens from inflation and savings to the Central Bank Rate, consumer protection, and even emerging innovations like CBDC research. These videos reached more than 642 million people and generated over 407 million impressions, transforming financial education into something accessible and relatable, while strengthening trust in the Bank's role.

Alongside these efforts, communication around the Monetary Policy Committee (MPC) and Financial Stability Committee (FSC) took on new prominence. For every quarterly decision, press releases and presentation decks were issued in both English and Kinyarwanda, ensuring accessibility to all Rwandans. The response was remarkable: more than 511 million social media impressions—a fourfold increase from the previous year and extensive, accurate coverage by 26 national and international media outlets. These engagements helped cement the Bank's reputation as a transparent and proactive communicator of monetary and financial stability decisions.

The Bank also modernized its digital gateway: the official website. Following a full redesign focused on speed, responsiveness, and easy navigation, daily visitors jumped from just 34 to over 250 per day, with more than 23,000 new users recorded. This surge reflected not only improved functionality but also growing public interest in directly accessing the Bank's resources and updates.

Strengthening Stakeholder Engagement

Beyond digital reach, the Bank placed strong emphasis on direct engagement with its stakeholders. The Governor's flagship Monetary Policy and Financial Stability Statement (MPFSS) presentations stood out as moments of transparency and accountability. Delivered twice during the year, these town hall-style sessions brought together more than 1,300 participants in person and online, ranging from financial institutions and government officials to students and civil society. With a 75% clarity rating, the presentations supported by simple visuals and plain language helped demystify complex policy decisions, making the Bank's outlook and priorities fairly understandable to all.

The drive for accessibility continued on interactive platforms. On X-Spaces, the Bank hosted 15 live conversations that reached over 741,000 listeners, while the newly launched podcast series attracted over 9,000 listens across Spotify and Apple Podcasts. These platforms opened a two-way dialogue with citizens, youth, and diaspora communities, allowing them to pose questions, voice concerns, and hear directly from central bank experts in a conversational tone.

The Bank also expanded its thought leadership through the "BNR in Conversation" series, a multimedia initiative featuring curated discussions with experts on timely issues such as FX regulation, consumer protection, and financial inclusion. With 124,000 views, the series not only sparked national dialogue on policy reforms but also underscored the Bank's role as a transparent and people-centered institution.

Building Public Understanding and Confidence

The Bank's commitment to building trust went beyond information-sharing—it invested directly in people. Youth engagement remained a cornerstone, with the 2025 Monetary Policy Challenge drawing 650 participants from Rwanda and abroad. The competition not only sharpened students' understanding of monetary policy but also nurtured future leaders; three winners were welcomed into the Bank's Young Economist Program, strengthening the pipeline of local talent.

At the community level, the Bank reached citizens where they are. Through Inteko z'abaturage and tailored dialogues with parliamentarians, university students, and bank treasurers, more than 2,000 people were engaged in conversations about their financial rights, monetary policy, and the stability of Rwanda's financial system. These platforms provided opportunities for citizens and decision-makers alike to ask questions, share concerns, and better understand the Bank's role in safeguarding economic stability.

To ensure that information about the financial sector is conveyed accurately and consistently, the Bank also invested in the media. Over 60 journalists were trained, and a dedicated media learning platform was launched to give reporters continuous access to financial training resources. These initiatives improved the quality of financial reporting across the country and strengthened the Bank's relationship with the press, making journalists more effective partners in public education.

Impact at a Glance

These efforts delivered measurable results. The Bank's digital platforms reached more than 642 million people, ensuring that financial knowledge and policy updates were more accessible than ever before. Public trust also grew stronger, with positive sentiment around MPC and FSC communications rising from 37% to 41%, while negative sentiment remained low at just 5 percent.

Internationally, the Bank's voice carried further, thanks to strategic partnerships. Stories shared by Reuters, which reached 291 million readers, and by TradingView, with 133.7 million views among global traders and investors, placed Rwanda's financial story firmly on the international stage.

Social engagement followed the same upward trend. Followers across platforms grew significantly, with Twitter increasing from 96,000 to 124,800, LinkedIn from 6,800 to 20,700, and Instagram more than doubling. These milestones demonstrate not only the scale of the Bank's communication reach but also the resonance of its message with both local and global audiences.

Through multi-platform engagement, and strong media partnerships, the NBR is positioned as a transparent, credible, and forward-looking institution. By simplifying complex economic concepts, encouraging two-way dialogue, and expanding its digital reach, the Bank has deepened public understanding, strengthened stakeholder trust, and elevated Rwanda's voice in regional and global financial conversations.

Looking ahead, the Bank will place greater emphasis on building a firm foundation of stakeholder engagement through dialogue. The focus will be on listening more closely, fostering mutual understanding, and walking this journey together with citizens, institutions, and partners. In particular, future efforts will concentrate on creating greater clarity around the Bank's policies and regulations, ensuring that stakeholders not only receive information but also feel part of the process of building a world-class central bank.

COMMUNICATION IMPACT

Media Sentiment

Positive sentiment around MPC & FSC increased to **41%**

Negative sentiment remained low at just **5%**

2,061 online media **articles** and over **8,440** social media **posts** were published

Partnerships

As Rwanda's foremost financial authority responsible for overseeing monetary policy and ensuring financial stability, the NBR acknowledges the critical role of forging influential regional and global partnerships. These collaborations are essential for leveraging collective expertise and resources to drive sustainable development, enhance financial resilience, and improve the well-being of Rwandans.

The following outlines the key strategic areas of partnership for the National Bank of Rwanda:

Partnership with IMF

During the FY under review, the National Bank of Rwanda, in collaboration with MINECOFIN and the IMF, has been instrumental for the successful conclusion of two IMF missions under the Policy Coordination Instrument (PCI). The PCI, a non-financing instrument, provides close monitoring and support of Rwanda's economic and financial policies, enhancing credibility with development partners and investors.

Previously, Rwanda successfully completed programs under the Rapid Credit Facility (RCF) and the Standby Credit Facility (SCF), which provided balance of payments support and helped the country address external shocks. The current PCI arrangement builds on those achievements by emphasizing strong policy frameworks, reforms, and sustainable growth without additional IMF financing. These missions are crucial as they provide an external assessment of Rwanda's policies, ensuring the country remains on a stable and sustainable growth path.

Moreover, the NBR intensified its partnership with the IMF, particularly in the realm of the Forecasting and Policy Analysis System (FPAS). FPAS capacity-building program equips staff with tools to produce consistent medium-term projections, assess policy trade-offs, and evaluate the impact of shocks. Through technical assistance, training, and workshops, the IMF has strengthened NBR staff capacity in modeling and forecasting, thereby improving the quality of monetary policy formulation in Rwanda and aligning practices with international standards. The introduction of new modeling tools marks a significant step forward in enhancing the accuracy of Rwanda's economic forecasting.

NBR benefited from capacity development and knowledge sharing on financial sector surveillance. The main areas covered in FY 2024/25 entailed the implementation of IMF FSIs 2019 compilation guide, central banking and climate change as well as macro stress testing.

Regional integration

In line with Rwanda's commitment to regional integration, the NBR has consistently played a vital role in the monetary affairs of the regional communities to which Rwanda belongs. This active engagement reflects Rwanda's dedication to fostering economic stability and cooperation across the continent. Notably, the NBR has continued its active membership in the Association of African Central Banks (AACB), where it collaborates with other central banks to address common monetary challenges and promote financial integration across Africa.

Furthermore, Rwanda's involvement in the East African Community (EAC) Monetary Affairs Committee (MAC) demonstrates its commitment to advancing the region's goal of monetary union, which aims to strengthen economic ties among member states. The NBR is an active member of the East African Community (EAC) Crisis Management Working Group (CM-WG).

This technical working group aims to enhance preparedness for and facilitate the management and resolution of cross-border financial institutions across the EAC. The CM-WG includes all safety net players across EAC jurisdictions that are home to or host supervisors and regulators of financial institutions within a financial group that are significant for the resolution process.

In addition, the CM-WG promotes knowledge sharing and capacity building to enhance individual and regional capabilities in crisis preparedness, management, and resolution arrangements. The CM-WG meets biannually on a rotational basis among EAC member states, and the NBR's crisis management team participates regularly in these meetings.

The NBR's participation in the Common Market for Eastern and Southern Africa (COMESA) highlights its role in promoting economic integration and enhancing monetary cooperation within one of Africa's largest regional economic blocs.

NBR's partnership with the Macroeconomic and Financial Management Institute of Eastern and Southern Africa (MEFMI) highlights the Bank's dedication to enhancing the skills and capacity of its staff. In the 2024/25 financial year, NBR benefited from various in-person and online training sessions provided by MEFMI, which was crucial in developing and strengthening its human resources.

Partnership with the Riksbank

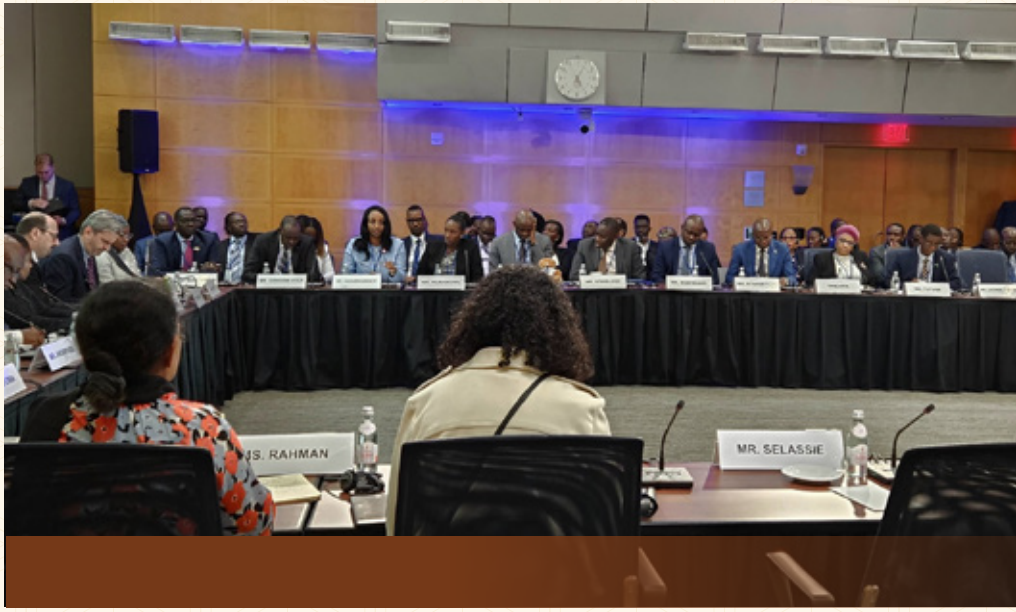
NBR continued its partnership with the Swedish Central Bank (Riksbank), which is a strategic collaboration aimed at enhancing the NBR's capabilities in monetary policy, communication, and governance through peer learning. This partnership is particularly significant given the NBR's adoption of a price-based regime in 2019, a framework that the Riksbank has decades of experience managing. The Riksbank, with its long history and advanced frameworks, provides insights that help NBR refine its relatively new monetary policy strategies. This peer learning approach ensures that NBR can adapt and implement effective policies in the Rwandan context, considering both local and global economic conditions. Among others, this partnership also helps NBR develop more advanced communication tools and techniques, which are critical in a regime where managing expectations is as important as the policy itself.

Toronto Center

The NBR maintained a long-term partnership with the Toronto Centre, which has consistently provided supervisors with training on risk-based supervision frameworks and capacity building. This collaboration remains instrumental in applying risk-based supervisory practices and strengthening Rwanda's regulatory capacity.

Global Institute for Macroprudential Modeling (GIMM)

The NBR continued the partnership with GIMM in areas of macroprudential modeling. This partnership started in March 2023 and aims at enhancing forward looking aspect of the financial sector stability assessment with macroeconomic scenarios. GIMM brings together central banks and other institutions tasked with financial stability with a primary purpose of creating a platform for collaboration, experience sharing and dissemination of practical tools for macroprudential modeling and policy analysis. It is made of prominent experts with vast experience in helping central banks and international institutions (including the IMF and World Bank), in implementing analytical and forecasting frameworks to support monetary and macroprudential policy making.



COMESA Monetary Institute (CMI)

The cooperation with CMI was mainly in area of macroprudential analysis and crisis management. CMI organized a one-week workshop on crisis management and resolution framework in February 2025 that provided NBR staff with the knowledge and skills to identify, prevent, and manage financial crises in an undeveloped marketplace with weaknesses in the legal and institutional arrangements to facilitate bank resolution. Furthermore, between 10th and 14th March 2025, NBR staff participated in training on the applications of data science for financial sector stability analysis. This training aimed at enhancing the modelling and forecasting skills for assessing vulnerabilities to financial stability and their evolution over time.

Africa Reinsurance Corporation-Africa RE.
During FY 2024/2025, the National Bank of Rwanda signed a Memorandum of Understanding with Africa Re, which, among other areas of collaboration, includes providing financial support to develop a comprehensive Rwanda's National Insurance Strategy, a process that is nearing completion.

International Association of Insurance Supervisors (IAIS) and ZEP-RE
During FY 2024/25, the IAIS assisted the NBR in aligning Rwanda's legal and regulatory framework with the Insurance Core Principles through self-assessments. ZEP-RE supported insurance market development through training programs for both market participants and regulatory staff while collaborating on public asset protection through the 2025 Annual East Africa Insurance Regulators & ZEP-RE Annual Strategic Forum.

FSD Africa
FSD Africa maintained its strategic partnership with BNR throughout 2025, delivering comprehensive technical assistance for the development of Rwanda's Risk-Based Capital (RBC) framework. This collaboration spans multiple areas of capacity building and institutional strengthening across the insurance sector.

World Bank, AFD and GIZ

The Bank has also strengthened partnerships with the World Bank, French Development Agency (AFD), and GIZ, which provided technical support on disclosure guidelines, climate risk assessment, ESG data templates, and supervisory practices.

In partnership with the French Development Agency (AFD), NBR developed a manual to implement the 2023 Guidelines on Climate-Related and Environmental Financial Risk Management, along with ESG data collection and rating templates for banks, MFIs, and insurers. With support from the World Bank, NBR is conducting a climate-related financial risk assessment for the banking sector, which will provide critical insights to enhance data, scenario design, and supervisory practices. Furthermore, working with GIZ, NBR developed disclosure guidelines aligned with international sustainability standards, reinforcing efforts to improve transparency and market discipline across the financial sector.

I appreciated the trainers' expertise, clarity in explaining concepts, and their ability to engage participants effectively. Their support and willingness to assist were commendable. **~ Participant**

I found all six modules we covered—Collaboration Tools, Spreadsheets, Word Processing, Presentations, and Computer and Online Essentials—highly relevant to our work. **~ Participant**

SUSTAINABILITY INITIATIVES

SUSTAINABLE FINANCING

The National Bank of Rwanda acknowledges that challenges related to Sustainability pose significant risks to both price stability and financial stability. This section outlines the monetary policy, regulatory and supervisory frameworks, as well as other NBR interventions undertaken to green both the central bank's operations and the wider financial sector.

The Finscope report (2024) indicates that more than two-thirds of Rwandans (69 percent or 5.6 million) have experienced a climate change-related event, and only 30% or 2.45 million of those who experienced climate change-related risks have put up mitigation measures. In recognition of these growing threats, the NBR continues to undertake urgent policy reforms aimed at adapting its monetary policy, regulatory and supervisory frameworks to better support a green, inclusive, and resilient financial system.

The NBR seeks not only to safeguard financial stability but also to contribute to the global and Rwanda's broader development goals.

GREEN FINANCE INITIATIVES

Monetary Policy frameworks - Climate-related risk modelling

Monetary Policy frameworks - Climate-related risk modelling
Extreme weather events, such as droughts and floods, pose significant risks by disrupting food production and energy supply chains, leading to price spikes and volatility, particularly in key sectors such as food and energy, which are important components of the consumer price index (CPI). Understanding these macroeconomic implications was crucial for formulating effective monetary policy in a country where agriculture accounts for a substantial share of GDP.

In the FY 2024/25, the Bank developed a small satellite VAR-based macro-econometric model to assess the impact of weather shocks on Rwanda's economy (Satellite Model: Weather Shocks and Macroeconomic Indicators). The analysis focused on empirically investigating the relationships between weather shocks, agricultural production, and price formation. The model incorporates weather and fiscal shocks while capturing monetary policy transmission mechanisms.

The outputs of this model provided key inputs for economic analysis and near-term inflation projections. Furthermore, scenario analyses of weather shocks help guide judgments in short-term inflation models and GDP nowcasting tools, offering valuable insights for policy formulation and sustainable finance planning.

Policy and regulatory frameworks

The absence of a clear climate disclosure framework and green taxonomy creates inconsistencies in how financial institutions report, classify, and manage climate-related risks and sustainable activities. This lack of standardization hampers transparency, limits comparability across institutions, undermines investor confidence, and constrains the flow of capital toward genuinely green and climate-resilient projects. Establishing these frameworks is therefore critical to ensure credible disclosures, align market practices with international standards, and channel finance effectively toward Rwanda's sustainability and resilience goals.

For the FY 2024/25, the National Bank of Rwanda published guidelines on the disclosure and reporting of sustainability-related financial information and played a leading role in developing strategic policies, including Rwanda's Green Taxonomy and its implementation roadmap.

a) Guidelines on the disclosure and reporting of sustainability related financial information

The primary objective of the guidelines was to establish a standardised framework for the disclosure and reporting of sustainability-related financial information by financial institutions. The guidelines on the disclosure and reporting of sustainability related financial information were developed based on International Sustainability standards commonly known as IFRS S1 and S2. The guidelines are designed to enhance transparency, ensure comparability across institutions, and support informed decision-making by stakeholders.

To support regulated financial institutions in implementing the above guidelines, the National Bank of Rwanda has developed tailored manuals for each subsector, namely banks, microfinance institutions, insurance companies, pension schemes, and payment service providers, detailing how to effectively apply the guidelines.

Rwanda Green Taxonomy

A taxonomy, in the context of sustainable finance, is an essential domestic framework and classification system that enables the identification and classification of sustainable economic activities. Taxonomies are used globally to create a uniform standard for sustainability in the financial sector and to establish transparency and comparability of sustainable investments. This helps prevent greenwashing and channels capital into sustainable economic activities.

Taxonomy also creates a direct link between the economy and the financial market on the one hand and climate effects on the other, which can help a country attract climate-conscious international investors, achieve its Nationally Determined Contributions (NDCs) goals, and adapt its economy to the inevitable impacts of climate change.
For the FY 2024/25, the Bank in collaboration with the Ministry of Finance and Economic Planning and stakeholders led the completion of the Rwanda Green Taxonomy. This milestone is a strong foundation for the country's green transformation and new industry growth. The Rwanda Green Taxonomy includes agriculture and embeds adaptation measures which provide significant benefits for investors, policymakers, bankers, and society.

SUPERVISORY FRAMEWORKS

Climate Risk Self-Assessments by Financial Institutions

In line with the 2023 Guidelines N° 2600/2023 - 00036 [616] Of 29/11/2023 On Climate-Related and Environmental Financial Risks Management for Financial Institutions, NBR received climate risk self-assessment reports from Tier I and Tier II financial institutions. The climate-related reports from financial Institutions reflect the institutions' initial steps in recognizing climate-related risks and their potential impact on financial stability. Additionally, financial institutions are actively identifying capacity-building needs to strengthen their understanding and management of these risks.

Climate Risk stress testing

Climate risk scenarios and stress testing provide a forward-looking lens to assess vulnerabilities and strengthen resilience within the financial sector. In line with the NBR 2023 Guidelines on Climate Risk, Tier I financial institutions are required to conduct climate scenario analysis and stress testing to better understand, quantify, and manage the potential impacts of climate change on their operations and on the wider financial system. These requirements are expected to take effect in 2026.

To prepare for this transition, the National Bank of Rwanda has initiated a pilot climate stress testing exercise with a sample of financial institutions. The objective is to apply severe but plausible forward-looking climate scenarios in order to:

- Build awareness across institutions,
- Enhance capacity to manage climate-related risks, and
- Generate insights into systemic vulnerabilities.

In FY 2024/25, NBR identified climate scenarios most relevant to Rwanda, developed a conceptual model to guide the stress testing exercise, and designed data collection templates, which have since been refined and completed by the sampled institutions. The next phase will involve data analysis and preparation of a stress testing report, which will provide lessons and guidance for the broader rollout across all Tier I institutions in the years ahead.

SUSTAINABLE ORGANIZATION

The National Bank of Rwanda (NBR) is a global community participant and follows the IFRS framework of reporting, thus in addition to the IFRS – Accounting, is also pursuing IFRS S1 Sustainability Disclosures, IFRS S2 Climate Disclosures Standards and ESG related initiatives implementation. For Governance and accountability, the NBR established a Sustainable Finance Group whose steering committee is composed of Executive Directors of the Bank and Pillar Task Forces composed of senior managers in various departments of the Bank. The three pillars, namely Financial Sector Sustainability Task Force, Monetary Policy & Financial Markets Task Force and Net Zero central Bank Task Force oversee the sustainable finance initiatives across the Bank.

NET ZERO CENTRAL BANK

In FY 2024/25, NBR implemented several initiatives to support the sustainability and greening of NBR's corporate operations, among other efforts underway. In line with the Sustainable Finance Group mandate, the National Bank of Rwanda introduced principles into its project and product management policy framework. This policy reflects the Bank's commitment to advancing Rwanda's sustainability agenda, mitigating environmental and social risks, and maximizing long-term positive impacts to the economy. By aligning with the best international practices, NBR ensures that all projects under its oversight contribute meaningfully to sustainable development across the country. Other Bank policies and Governance instruments continue to be aligned to sustainability in quest to embracing the sustainability culture across the Bank.

ENERGY USE, WASTE AND WATER MANAGEMENT

Under the green infrastructure and resources efficiency, the Bank's ongoing construction initiative of the building extension was designed as a green facility with a minimal carbon footprint. The building prioritizes the use of unprocessed local materials, with 70% of its structure composed of brick, thereby reducing embodied carbon, supporting local industries, and minimizing reliance on imports.

Environmentally, it will integrate green building innovations, that include on-site solar panels to supply 30% of energy needs for the building, and architectural strategies that maximize natural lighting and ventilation. The Bank continues to enhance use of green energy on its premises in pursuit to becoming a green Central Bank. It's worth mentioning that the Bank's green spaces have solar energy installations. Efforts to install motion sensor bulbs are underway to ensure consumption management of electricity from the National electricity grid distribution.

Under waste management initiatives, solid waste sorting will further promote recycling and responsible waste management. In addition, NBR prohibited the single use of plastic bottles during meetings and other activities for both staff and external stakeholders to minimize plastic waste and related management efforts. Currently the Bank harvests rainwater and also recycles used water. These efforts have reduced demand for processed water from the national supply infrastructure.

Collectively, these measures demonstrate a strong commitment to energy efficiency, circular resource use, and climate resilience.

OTHER SUSTAINABILITY INITIATIVES

As the bank continues to implement sustainability initiatives, it's worth noting that on the total of 63,571 square meters of premises occupancy, approximately 51% of the space has been designated for green space activities such as green gardens with flowers which not only creates good working environment but also acts as a good carbon sink facility to net the impact of the bank's carbon footprint.

Under financing initiatives, the Bank has promoted green energy adoption through financing for hybrid vehicles. During the year, loans for hybrid vehicles reached FRW 0.9 billion, representing 40% of total car loans financing (FRW 2.8 billion). This initiative not only supports environmentally friendly mobility but also demonstrates the Bank's dedication to aligning financial products with its sustainability pursuits.

NBR advanced its digital sustainability initiatives during the first year of implementing its Digital Transformation Strategy. The Bank established a dedicated function to drive technological innovation, emphasizing big data analytics and data science to generate insights from data. Key digital systems such as e-Correspondence, e-Procurement, Internet Banking, and a new Survey Management System, have enhanced efficiency, reduced emissions, minimized paper use, and improved stakeholder engagement.

Financially, NBR has demonstrated strong performance, with its balance sheet growing by an average of 16% over five years, and income from foreign investment securities, net interest, and trading income increasing by 36% and 34%, respectively. Supported by a robust investment policy and cost optimization efforts, the Bank achieved an average 30% growth in profitability, strengthening its capital to cover at least 10% of monetary liabilities.

These achievements underscore NBR's sustainable financial model, reinforcing its operational and financial autonomy while embedding Environmental, Social, and Governance (ESG) principles into its strategy, positioning the Bank as a leader in sustainable and inclusive economic development.

SUSTAINABLE WORKFORCE

The Bank being a service organization, implements Capacity Building initiatives to grow the competence of its human Capital. Training investment in staff development is composed of a broad training spectrum that includes Leadership, Big data, ESG, cyber security, risk management, Internal Audit, Artificial Intelligence and other Continuous Professional Development (CPDs) courses. The Bank increased the financing of this initiative by 15% Year on year, including domestic, virtual, abroad training and membership subscriptions for International bodies. This is viewed to be a key culture of embracing continuous learning given the rapid changing business environment.

Furthermore, the bank invests in welfare initiatives that include but are not limited to medical care, lifestyle to health, mental wellness, sports subscription and related activities. The related policy initiatives focus on disease prevention among the Bank's workforce.

IMPACTS OF SUSTAINABLE FINANCE INITIATIVES

The National Bank of Rwanda's initiatives have strengthened financial institutions' capacity to understand and manage sustainability risks, complemented government efforts in sustainable finance, and delivered impact through capacity building, policy and regulatory reforms, mobilization of climate finance, and greening of central bank operations, as summarized below, reaffirming NBR's role in driving sustainable economic transformation.

Capacity Building

3 rounds of training:

61 BNR & 92 sector staff (R1)

42 BNR & 100 sector staff (R2)

20 BNR & 110 sector Staff (R3)

Collaborated Publications

2 publications Collaboration with other central banks under NGFS

Greening NBR Operations

35.000 plastic bottles are avoided annually

100% water dispensers and glass bottles are used in meetings

600+ reusable bottles issued to staff

Policy & Regulatory Initiatives

2 guidelines issued + Participation in Green Taxonomy development

Contribution to Mobilising Climate Finance

IMF RSF: S319M (completed)

AFD Green PFM: €50M (ongoing)

FUTURE OUTLOOK AND STRATEGIC GOALS ON GREEN FINANCE

The National Bank of Rwanda (BNR) has continued to align its operations and policies with sustainability imperatives while safeguarding Price and Financial Stability . In the coming years, the Bank will continue to prioritize integrating sustainable management initiatives into the financial sector, supported by forward-looking macro-financial linkages, climate risk and inflation modelling, and incorporating weather parameters into short- and medium-term forecasting models.

Soon, among others, the following initiatives will be implemented:

- Develop an exhaustive Bank's Sustainability Strategy
- The continuous follow-up of the implementation of the guidelines on climate-related and environmental financial risk Management for regulated financial institutions.
- Implement integrated reporting for NBR.
- Development and piloting of climate stress testing and scenario analysis guidelines
- Development of guidelines for the implementation of Rwanda's Green Taxonomy.
- Conduct a study on the macroeconomic impact of climate change and the role of the central Bank.
- Completing the proof of concept of Central Bank Digital Currency and promoting cashless economy solutions.
- Determine the Bank's Carbon footprint and related sustainability initiatives

At the institutional level, BNR is advancing its sustainability agenda by exploring possible environmental management system (EMS) certifications, Business Continuity Management (BCM) Certifications, implementing sustainable procurement practices, and more.

Internationally, NBR representatives in the NGFS Task Force on Adaptation are collaborating with other members to develop a concept paper on the role of central banks and supervisors in fostering an enabling environment for adaptation finance. The paper will explore how these central banks and supervisors can support the scaling up of adaptation finance, recognizing the urgent need to mobilize investment for climate resilience.

Regionally, NBR is working closely with East African Central Bank's under the Monetary Affairs Committee, to establish methodologies and benchmarks for use in the IFRS Sustainability and ESG implementation efforts.

GENDER MAINSTREAMING AND INCLUSION

CHAMPIONING GENDER INCLUSION

In May 2025, The National Bank of Rwanda co-hosted the Financial Alliance for Women Summit in partnership with Access to Finance Rwanda (AFR), bringing together over 580 participants who endorsed the Women Entrepreneurs Finance Initiative (WE-Fi) Code. The WE-Fi Code is a global initiative that unites financial service providers, regulators, and financial institutions to increase funding for women-led micro, small, and medium enterprises (WMSMEs).

Rwanda demonstrated strong commitment as the first signatories included 11 banks, the Rwanda Bankers' Association, the Association of Microfinance Institutions (AMIR), Access to Finance Rwanda, the Ministry of Trade and Industry, and the National Bank of Rwanda. This comprehensive commitment is expected to significantly boost access to finance for MSMEs in Rwanda and contribute to achieving the NST2 and Vision 2050 goals.

The project on "Strengthening the use of Mobile Money to Address Women's Financial Needs – Gendana Konti", was scaled to cover two more districts i.e. Ngoma and Rulindo. The initiative provided financial literacy training on mobile money to 25,000 women, successfully onboarding 7,000 to begin using mobile money for the first time. These achievements built on earlier efforts in Nyaruguru and Nyamasheke, where 10,000 women were trained and 3,500 onboarded to mobile money. These milestones contribute towards the goal of promoting inclusive financial access.

GENDER MAINSTREAMING INITIATIVES

As part of the Bank's Gender Mainstreaming Strategy, a comprehensive Action Plan was developed to embed gender inclusion into institutional culture and to promote gender-responsive practices across Rwanda's financial sector.

- In partnership with the Gender Monitoring Office, a targeted Gender-Based Violence (GBV) Awareness Programme was delivered to senior management, strengthening leadership capacity to address and prevent GBV.
- A survey on GBV and workplace sexual harassment was conducted to inform future preventive actions.
- Awareness sessions for young mothers focused on maternal health, stress management, and work-life balance.
- A fully equipped pumping room was maintained to provide dignity and privacy for nursing mothers.

GENDER FINANCING INITIATIVES

The Bank has further implemented gender financing within its workforce. Assessment indicates that loan products under mortgages and vehicle loans, key loan products offered to staff under the bank's welfare program, 30% of the financing facilities were offered to female employees while their male counter parts stood at 70%, this is consistent with the Bank's demography and thus cements the inclusive financing stance.

Through these initiatives, the Bank reinforced its commitment to creating a safe, inclusive, and supportive workplace that empowers all employees.

CHALLENGES & WAY FORWARD

During FY 2024/25 NBR faced challenges and policy issues that require attention going forward.

S/N	Challenges	Way forward
1	Emerging Risks: Increasing climate change impacts and cyber threats, are creating new vulnerabilities that existing frameworks may not adequately address.	» Enhance mechanisms to respond effectively to emerging risks and address compliance gaps across the financial sector. » Enhance incident management and response plans. » Continue improving economic models to better capture risks including the climate change impact on our domestic economy.
2	Corporate Governance issues in Microfinances	» Implementation of D-SACCOs Capacity Building Plan especially on Corporate Governance and emerging risks including Climate risk management, AML/CFT, and Cybersecurity
3	Low Market Penetration: Limited uptake of insurance and pension products across the population, indicating significant gaps in financial protection coverage.	» Implement the National Insurance strategy as well as develop the Private Pension Sector Strategy to provide clear direction and coordination for sector growth.
4	Data limitations, especially on climate risks, ESG performance, and adaptation finance flows, constrain modelling and effective supervision:	» Development of ESG data-gathering methodology. » Automating ESG data collection and rating templates Via EDWH.
5	Volatile markets and challenging environment for reserves management as players tried to cope with several factors including the US FED monetary policy response to inflation, increasing geopolitical tensions with the new administration in the US (change in immigration policy, tariffs and taxes), wars in Middle East (Israel and Hamas), and between Russia and Ukraine.	» Continue to implement the new Strategic Asset Allocation (SAA), incorporating investment in Gold as approved by the Board of Directors. This strategy aims to improve portfolio returns and enhance asset diversification. » Implement the completed PORT Enterprise as part of Bloomberg AIM tool to further automate the reserves management reporting, thereby enhancing overall efficiency.

S/N	Challenges	Way forward
6	Low level of reserves which is largely caused by a structural trade balance deficit. This low level of reserves limits the NBR's investment size, thus impacting the return and the bank's profit, but also affects its ability to obtain the best counterparts in global market.	» Optimize returns, maintain reserves adequacy, and implement technological advancements to position the Bank for continued success in managing the country's official foreign exchange reserves.
7	Fraud and scams especially using digital financial services	» Enhance awareness campaigns on digital financial services
8	Consumers still not aware of their rights and obligations towards financial services	» Enhance consumer education, supervision as well as enforcement on financial consumer protection, laws and regulations
9	Weaknesses in forced loan recovery especially auctioning and valuation of collaterals	» Review of the related laws and regulations as well as the processes and procedures.
10	High level of complaints in using services of the credit reference bureau.	» Automation of data providers' systems and awareness campaigns.

LOOKING FORWARD IN FY 2025/26

The NBR will:

- Strengthen response to emerging risks and address compliance gaps across the financial sector.
- In light of the accelerating digital transformation and automation within the financial sector, the NBR will focus mainly on operational resilience, strategic risk assessments, compliance oversight and emerging risks such as climate risk management, AML/CFT, and cybersecurity.
- Develop the capacity of financial sector staff, focusing on the D-SACCOs, strengthening corporate governance and addressing emerging risks such as climate risk management, AML/CFT, and cybersecurity.
- Continue improving economic models to better capture risks including the climate change impact on our domestic economy.
- Establish comprehensive National Insurance and Private Pension Sector Strategies to provide clear direction and coordination for insurance and pension sub sector growth
- Continue efforts in fintech development and explore the establishment of a BNR innovation hub.
- Contribute to the strengthening of Rwanda's capital market
- Prioritize institutional transformation and performance excellence by fostering a high-performance culture.

FINANCIAL POSITION AND PERFORMANCE

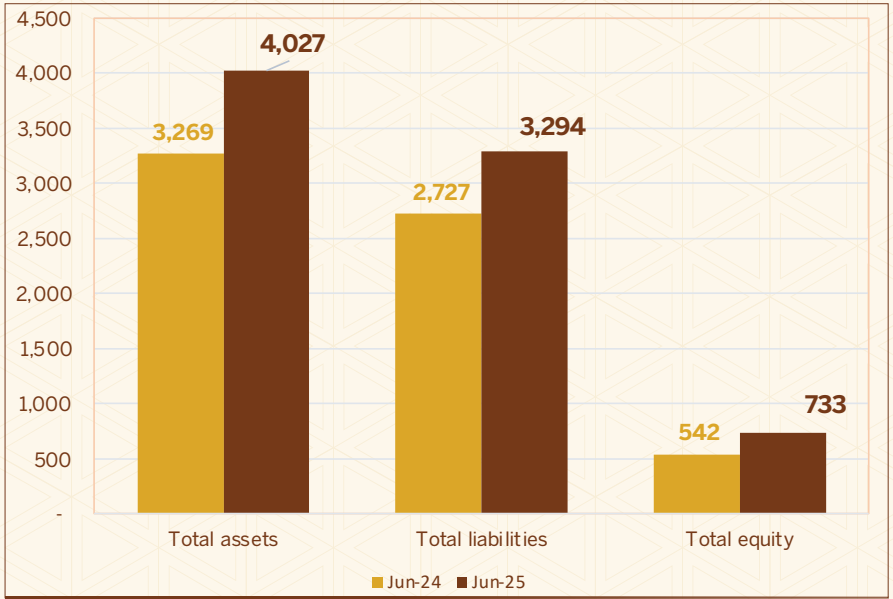
FINANCIAL POSITION

In the financial year 2024/25, the National Bank of Rwanda (NBR) experienced significant balance sheet growth, with total assets rising by 23 percent, to Frw 4.03 trillion in June 2025 from Frw 3.27 trillion in June 2024. This growth was largely driven by strategic investments decisions in both domestic and international markets.

The global and regional markets exhibited mixed dynamics during the period. Sovereign bond markets transitioned from a peak-rate phase into an easing cycle, although performance varied across maturities. Short- to mid-term government bonds rallied on expectations of imminent policy rate cuts, whereas long-dated sovereign bonds faced selloffs amid concerns of persistent inflation pressures and fiscal uncertainty.

The Bank's investment climate assessment and corresponding asset allocation strategies were guided by a focus on capital preservation and prudent reserve management. Consequently, foreign investment securities, classified as Fair Value Through Profit or Loss (FVTPL) and Fair Value Through Other Comprehensive Income (FVTOCI), expanded by 30 percent year-on-year, reaching Frw 2.5 trillion. This growth reflects the effective execution of the Bank's strategic asset allocation framework and its disciplined approach to optimizing returns while maintaining financial stability.

Figure 28: Financial Position (Frw Billions)



Source: National Bank of Rwanda

Domestically, the Bank's investments with domestic and regional banks grew by 11 percent, with notable expansion in fixed-rate loans. In addition to financial investments, the Bank made capital investments in computer equipment to enhance the performance of its operational ecosystem and significant revaluation gains in the revalued land.

Total liabilities grew by 21 percent, driven by growth in currency in circulation by 17 percent to Frw 483 billion, Government Deposits that went up by 19 percent to Frw 693 billion. Equity grew by 35 percent, reflecting retained earnings from the annual performance and mark-to-market impact of the fair value through other Comprehensive Income (FVTOCI) portfolio.

FINANCIAL PERFORMANCE

The National Bank of Rwanda delivered a strong financial performance in the financial year FY2024/25, characterized by substantial inflows from interest income, commissions, fees, and foreign exchange revaluations. This growth was primarily supported by a 56 percent increase in interest income, attributable to higher investments in strategic assets and favorable international investment conditions.

As a result, Net Interest Income (NII) rose by 54 percent, from FRW 71.4 billion to Frw 110 billion, underscoring the company's enhanced asset yield and prudent balance sheet management. Additionally, Net Operating Income recorded a 6 percent year-on-year growth, reflecting sustained revenue diversification and operational resilience amid a dynamic market environment.

The Bank delivered strong results supported by favorable investment conditions across both domestic and international markets. These conditions contributed to enhanced returns on invested assets and positive revaluations of the largely foreign currency–denominated balance sheet.

However, total expenses increased by 19 percent, reaching Frw 81.8 billion compared to Frw 68.6 billion in the previous year. This rise was mainly attributed to a higher staff count following organizational restructuring, the amortization of legal printing costs, and increased software license expenses.

National Bank of Rwanda
Directors' report
For the year ended 30 June 2025

1. Introduction

The directors have the pleasure of submitting their report together with the audited financial statements for the year ended 30 June 2025, which disclose the state of affairs of National Bank of Rwanda (the "Bank").

2. Incorporation

The Bank was incorporated on 24 April 1964 and is governed by Law No. 016/2021 of 03/03/2021 amending Law No. 48/2017 of 23/09/2017 Governing the National Bank of Rwanda.

3. Principal activities

The Bank is established and administered under the law with the principal objective of formulating and implementing monetary policy directed at achieving and maintaining stability in the general level of prices. It is also the responsibility of the Bank to foster liquidity, solvency and proper functioning of a stable and competitive market-based financial system.

4. Results

The results for the year are set out on page 8.

5. Dividend

The directors propose a dividend payment of Frw "000" **18,322,520**, as per note 38(i) of the financial statements (2024: Frw "000" **10,194,424**).

6. Directors

The Directors who held office during the year and to the date of this report are set out on page 1.

7. Auditors

GPO Partners Rwanda Ltd's term comes to an end with the submission of the annual activities report to the President of the Republic of Rwanda and both Chambers of the Parliament in accordance with Law No. 016/2021 of 03/03/2021 amending Law No. 48/2017 of 23/09/2017 Governing the National Bank of Rwanda.

By order of the board

Governor

Date: 27th October 2025

National Bank of Rwanda
Statement of directors' responsibilities
For the year ended 30 June 2025

Law No. 016/2021 of 03/03/2021 amending Law No.48/2017 of 23/09/2017 Governing the National Bank of Rwanda (the "Bank") requires the directors to prepare financial statements for each financial year that give a true and fair view of the state of affairs of the Bank as at the end of the financial year and of its profit or loss. It also requires the directors to ensure that the Bank keeps proper accounting records that disclose, with reasonable accuracy, the financial position of the Bank. They are also responsible for safeguarding the assets of the Bank.

The directors accept responsibility for the annual financial statements, which have been prepared using appropriate accounting policies supported by reasonable estimates, in conformity with International Financial Reporting Standards and the requirements of Law No. 016/2021 of 03/03/2021amending Law No. 48/2017 of 23/09/2017 Governing the National Bank of Rwanda.

The directors are of the opinion that the financial statements give a true and fair view of the state of the financial affairs of the Bank and of its surplus in accordance with International Financial Reporting Standards. The directors further accept responsibility for the maintenance of accounting records that may be relied upon in the preparation of financial statements, as well as designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement.

Nothing has come to the attention of the directors to indicate that the Bank will not remain a going concern for at least twelve months from the date of this statement.

Approval of the financial statements

The accompanying financial statements on pages 7 to 81 were approved for issue by the Board of Directors on 25th September 2025 and signed on its behalf by:

Governor

REPORT OF THE INDEPENDENT AUDITOR TO THE SHAREHOLDER OF NATIONAL BANK OF RWANDA
Report on the audit of the financial statements

Our opinion

We have audited the financial statements of National Bank of Rwanda ("the Bank") which comprise the statement of financial position as at 30 June 2025, the statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including material accounting policies information.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Bank as at 30 June 2025, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards and the requirements of Law No. 016/2021 of 03/03/2021 amending Law No.48/2017 of 23/09/2017 Governing the National Bank of Rwanda.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Bank in accordance with the Institute of Certified Public Accountants of Rwanda Code of ethics (ICPAR Code of Ethics). We have fulfilled our other ethical responsibilities in accordance with the ICPAR Code of Ethics and in accordance with other ethical requirements applicable to performing audits in Rwanda. The ICPAR Code of Ethics is consistent with the International Ethics Standards Board for Accountants Code of Ethics for Professional Accountants (IESBA Code). We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current year. We have determined that there are no key audit matters to communicate in our report for the current year.

Other information

The directors are responsible for the other information. The other information comprises Directors' report and the other information that will be included in the Annual Report but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

When we read the Annual report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance.

REPORT OF THE INDEPENDENT AUDITOR TO THE SHAREHOLDER OF NATIONAL BANK OF RWANDA (continued)

Responsibilities of the directors for the financial statements

The directors are responsible for the preparation of the financial statements that give a true and fair view in accordance with International Financial Reporting Standards and the requirements of Law No. 016/2021 of 03/03/2021 amending Law No.48/2017 of 23/09/2017 Governing the National Bank of Rwanda and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Bank or to cease operations, or have no realistic alternative but to do so.

The directors are responsible for overseeing the Bank's financial reporting process.

Auditor's responsibilities for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the planning and performance of the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Bank to cease to continue as a going concern.

REPORT OF THE INDEPENDENT AUDITOR TO THE SHAREHOLDER OF NATIONAL BANK OF RWANDA (continued)

Auditor's responsibilities for the audit of the financial statements (continued)

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- We communicate with the Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The notes set out on pages 12 to 80 form an integral part of these financial statements.

1. Reporting entity

The National Bank of Rwanda (the "Bank") is domiciled in Rwanda. The Bank's registered office is at:
KN 6 Avenue, 4
P.O Box 531,
Kigali, Rwanda

The Bank is wholly owned by the Government of Rwanda. The Bank is established by and derives its authority and accountability from Law No. 016/2021 of 03/03/2021 amending Law No.48/2017 of 23/09/2017 Governing the National Bank of Rwanda. The Bank also acts as Banker, advisor and fiscal agent of the Government of Rwanda.

2. Basis of preparation

(a) Statement of compliance

The financial statements of the Bank have been prepared in accordance with International Financial Reporting Standards (IFRS) and interpretations issued by the IFRS Interpretations Committee (IFRS IC) applicable to companies reporting under IFRS. The financial statements comply with IFRS as issued by the International Accounting Standards Board (IASB) and in the manner required by Law No. 016/2021 of 03/03/2021 amending Law No.48/2017 of 23/09/2017 Governing the National Bank of Rwanda.

(b) Basis of measurement

The financial statements have been prepared on a historical cost basis, except for the following;

- Financial Instruments at fair value through profit or loss
- Financial assets at fair value through Other Comprehensive Income (FVTOCI)
- Certain classes of property, plant and equipment, and investment property – measured at fair value or revalued amount.

(c) Functional and presentation currency

The financial statements are presented in Rwandan Francs (Frw), which is the Bank's functional currency. All amounts have been rounded to the nearest thousandth, except when otherwise indicated. Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions.

(d) Use of estimates and judgements

The preparation of financial statements requires the use of accounting estimates, which, by definition, will seldom equal the actual results. The directors also need to exercise judgement in applying the Bank's accounting policies.

This note provides an overview of the areas that involve a higher degree of judgement or complexity, and of items which are more likely to be materially adjusted due to estimates and assumptions turning out to be wrong.

Detailed information about each of these estimates and judgments is included in other notes, together with information about the basis of calculation for each affected line item in the financial statements. In addition, this note also explains where there have been actual adjustments this year as a result of an error and of changes to previous estimates.

Significant estimates and judgements

The areas involving significant estimates or judgements are:

- Impairment of financial assets – note 4 (a)
- Estimated fair value of certain financial assets – note 5

- Accounting treatment of economic recovery funds from the government of Rwanda – note 34.

Estimates and judgements are continually evaluated. They are based on historical experience and other factors, including expectations of future events that may have a financial impact on the Bank and that are believed to be reasonable under the circumstances.

3. Material accounting policies

The accounting policies set out below have been applied consistently to all years presented in these financial statements and have been applied consistently by the Bank.

3.1 New Standards, amendments and interpretations

3.1.1 New standards, amendments and interpretations effective and adopted by the Bank

The Bank has applied the following standards and amendments for the first time for the annual reporting year commencing 01 July 2024:

The pronouncements became effective for the Bank during the annual reporting period commencing 01 July 2024. These standards and amendments did not have a material impact on the financial statements.

Number	Effective date	Executive summary
IFRS 16 – Leases	Annual periods beginning on or after 1 January 2024 (Published September 2022)	These include requirements for sale and leaseback transactions in IFRS 16 to explain how an entity accounts for a sale and leaseback after the date of the transaction. Sale and leaseback transactions where some or all the lease payments are variable lease payments that do not depend on an index or rate are most likely to be impacted.
IAS 1 – Non-current liabilities with covenants	Annual periods beginning on or after 1 January 2024 (Published January 2020 and November 2022)	These clarify how conditions with which an entity must comply within twelve months after the reporting period affect the classification of a liability. The amendments also aim to improve information an entity provides related to liabilities subject to these conditions.
IAS 7 and IFRS 7 on Supplier finance arrangements	Annual periods beginning on or after 1 January 2024 (Published May 2023)	These require disclosures to enhance the transparency of supplier finance arrangements and their effects on an entity's liabilities, cash flows and exposure to liquidity risk. The disclosure requirements are the IASB's response to investors' concerns that some entities' supplier finance arrangements are not sufficiently visible, hindering investors' analysis.
Amendments to IAS 21 - Lack of Exchangeability	Annual periods beginning on or after 1 January 2025 (early adoption is available) (Published August 2023)	An entity is impacted by the amendments when it has a transaction or an operation in a foreign currency that is not exchangeable into another currency at a measurement date for a specified purpose. A currency is exchangeable when there is an ability to obtain the other currency (with a normal administrative delay), and the transaction would take place through a market or exchange mechanism that creates enforceable rights and obligations.
IFRS S1: General Requirements for Disclosure of Sustainability-related Financial Information	Reporting periods beginning on or after 1 January 2024. This is subject to endorsement of the standards by local jurisdictions. (Published June 2023)	This includes the core framework for the disclosure of material information about sustainability related risks and opportunities across an entity's value chain.
IFRS S2: Climate-related Disclosures	Reporting periods beginning on or after 1 January 2024. This is subject to endorsement of the standards by local jurisdictions. (Published June 2023)	This is the first thematic issued that sets out requirements for entities to disclose information about climate-related risks and opportunities.

National Bank of Rwanda
Notes to the financial statements
For the year ended 30 June 2025

3.1.2 New standards and interpretations not yet adopted by the Bank

Certain new accounting standards and interpretations have been published that are not mandatory for 30 June 2025 reporting periods and have not been early adopted by the Bank.

Number	Effective date	Executive summary
Amendment to IFRS 9 and IFRS 7 - Classification and Measurement of Financial Instruments	Annual periods beginning on or after 1 January 2026 (early adoption is available) (Published May 2024)	These amendments: • Clarify the requirements for the timing of recognition and derecognition of some financial assets and liabilities, with a new exception for some financial liabilities settled through an electronic cash transfer system; • Clarify and add further guidance for assessing whether a financial asset meets the solely payments of principal and interest (SPPI) criterion; • Add new disclosures for certain instruments with contractual terms that can change cash flows (such as some instruments with features linked to the achievement of environment, social and governance (ESG) targets); and

Number	Effective date	Executive summary
		Make updates to the disclosures for equity instruments designated at fair value through other comprehensive income (FVOCI).
Annual improvements to IFRS- Volume 11	Annual periods beginning on or after 1 January 2026 (Published July 2024)	Annual improvements are limited to changes that either clarify the wording in an Accounting Standard or correct relatively minor unintended consequences, oversights or conflicts between the requirements in the Accounting Standards. The 2024 amendments are to the following standards: • IFRS 1 First-time Adoption of International Financial Reporting Standards; • IFRS 7 Financial Instruments: Disclosures and its accompanying Guidance on implementing IFRS 7; • IFRS 9 Financial Instruments; • IFRS 10 Consolidated Financial Statements; and • IAS 7 Statement of Cash Flows.
IFRS 18 Presentation and Disclosure in Financial Statements	Annual periods beginning or after 1 January 2027 (Published April 2024)	This is the new standard on presentation and disclosure in financial statements, with a focus on updates to the statement of profit or loss. The key new concepts introduced in IFRS 18 relate to: • The structure of the statement of profit or loss; • Required disclosures in the financial statements for certain profit or loss performance measures that are reported outside an entity's financial statements (that is, management-defined performance measures); and • Enhanced principles on aggregation and disaggregation which apply to the primary financial statements and notes in general.

National Bank of Rwanda
Notes to the financial statements
For the year ended 30 June 2025

3. Material accounting policies (Continued)

3.1 New Standards, amendments and interpretations (Continued)

3.1.2 New standards and interpretations not yet adopted by the Bank (Continued)

IFRS sustainability disclosure standards

The International Sustainability Standards Board (ISSB) has issued **IFRS S1**: General Requirements for Disclosure of Sustainability-related Financial Information and **IFRS S2**: Climate-related Disclosures to establish a global baseline for sustainability reporting. These standards are effective for annual periods beginning on or after 1 January 2024, subject to local adoption. During the financial year 2024/2025, the National Bank of Rwanda initiated steps toward implementing these standards by integrating sustainability and corporate social responsibility (CSR) considerations into its reporting framework. The related disclosures are presented in the *Sustainability and CSR* section of these financial statements.

3.2 Foreign currency translation

a) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions, and from the translation of monetary assets and liabilities denominated in foreign currencies at year-end exchange rates, are generally recognised in profit or loss. They are deferred in equity if they relate to qualifying cash flow hedges and qualifying net investment.

Foreign exchange gains and losses that relate to borrowings are presented in the statement of profit or loss, within finance costs. All other foreign exchange gains and losses are presented in the statement of profit or loss on a net basis within other gains/(losses).

Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. Translation differences on assets and liabilities carried at fair value are reported as part of the fair value gain or loss. For example, translation differences on non-monetary assets and liabilities, such as equities held at fair value through profit or loss, are recognised in profit or loss as part of the fair value gain or loss, and translation differences on non-monetary assets such as equities classified as at fair value through other comprehensive income, are recognized in other comprehensive income.

Gains resulting from a revaluation of reserve exchange holdings or international commitments recorded in the balance sheet of the Bank due to a revision of the foreign exchange system or a modification of the exchange value of the Frw decided by the Government are appropriated to a special account titled “Foreign exchange revaluation reserve” account in equity.

b) Interest income

Interest income is recognised in the profit or loss statement using the effective interest rate method for all interest-bearing financial instruments except for assets measured at fair value through profit and loss.

c) Fees and commission

Fees and commission income include; commission on foreign currency transactions, commission received on guarantees, T24-Internet Banking commissions, commission on letters of credit commissions on credit management, and are recognised as the related services are performed.

Fees are recognised as the service is provided, as this is the point at which the performance obligation, with the identified customer, is considered to be satisfied. Fee income from regulatory activity is recognised as the service to regulated entities occurs.

d) Net trading income

‘Net trading income’ comprises gains less losses related to foreign investment securities and includes all realised and unrealised fair value changes and foreign exchange movements.

National Bank of Rwanda
Notes to the financial statements
For the year ended 30 June 2025

3. Material accounting policies

e) Financial assets and liabilities

Measurement methods

Amortised cost and effective interest rate

The amortised cost is the amount at which the financial asset or financial liability is measured at initial recognition minus the principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount and, for financial assets, adjusted for any loss allowance.

The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial asset or financial liability to the gross carrying amount of a financial asset (i.e. its amortised cost before any impairment allowance) or to the amortised cost of a financial liability. The calculation does not consider expected credit losses and includes transaction costs, premiums or discounts and fees and points paid or received that are integral to the effective interest rate, such as origination fees. For purchased or originated credit-impaired (`POCI') financial assets — assets that are credit-impaired at initial recognition — the Bank calculates the credit-adjusted effective interest rate, which is calculated based on the amortised cost of the financial asset instead of its gross carrying amount and incorporates the impact of expected credit losses in estimated future cash flows.

When the Bank revises the estimates of future cash flows, the carrying amount of the respective financial assets or financial liability is adjusted to reflect the new estimate, discounted using the original effective interest rate. Any changes are recognised in profit or loss.

Interest income

Interest income is calculated by applying the effective interest rate to the gross carrying amount of financial assets, except for:

- POCI financial assets, for which the original credit-adjusted effective interest rate is applied to the amortised cost of the financial asset.
- Financial assets that are not 'POCI' but have subsequently become credit-impaired (or 'stage 3'), for which interest revenue is calculated by applying the effective interest rate to their amortised cost (i.e. net of the expected credit loss provision).

Initial recognition and measurement

Financial assets and financial liabilities are recognised when the Bank becomes a party to the contractual provisions of the instrument. Regular way purchases and sales of financial assets are recognised on trade-date, the date on which the Bank commits to purchase or sell the asset.

At initial recognition, the Bank measures a financial asset or financial liability at its fair value plus or minus, in the case of a financial asset or financial liability not at fair value through profit or loss, transaction costs that are incremental and directly attributable to the acquisition or issue of the financial asset or financial liability, such as fees and commissions. Transaction costs of financial assets and financial liabilities carried at fair value through profit or loss are expensed in profit or loss. Immediately after initial recognition, an expected credit loss allowance (ECL) is recognised for financial assets measured at amortised cost and investments in debt instruments measured at FVOCI, which results in an accounting loss being recognised in profit or loss when an asset is newly originated.

When the fair value of financial assets and liabilities differs from the transaction price on initial recognition, the Bank recognises the difference as follows:

- When the fair value is evidenced by a quoted price in an active market for an identical asset or liability (i.e. a Level 1 input) or based on a valuation technique that uses only data from observable markets, the difference is recognised as a gain or loss.

3. Material accounting policies
e) Financial assets and liabilities (continued)

- In all other cases, the difference is deferred and the timing of recognition of deferred day one profit or loss is determined individually. It is either amortised over the life of the instrument, deferred until the instrument's fair value can be determined using market observable inputs, or realised through settlement.

Financial assets

(i) Classification and subsequent measurement

The Bank classifies its financial assets in the following measurement categories:
- Fair value through profit or loss (FVPL); or
- Fair value through other comprehensive income (FVOCI); or
- Amortised cost.

The classification requirements for debt and equity instruments are described below:

Debt instruments

Debt instruments are those instruments that meet the definition of a financial liability from the issuer's perspective, such as loans, government and corporate bonds and trade receivables purchased from clients in factoring arrangements without recourse.

Classification and subsequent measurement of debt instruments depend on:
- the Bank's business model for managing the asset; and
- the cash flow characteristics of the asset.

Based on these factors, the Bank classifies its debt instruments into one of the following three measurement categories:

- Amortised cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest ('SPPI'), and that are not designated at FVPL, are measured at amortised cost. The carrying amount of these assets is adjusted by any expected credit loss allowance recognised and measured. Interest income from these financial assets is included in 'Interest and similar income' using the effective interest rate method.

- Fair value through other comprehensive income (FVOCI): Financial assets that are held for collection of contractual cash flows and for selling the assets, where the assets' cash flows represent solely payments of principal and interest, and that are not designated at FVPL, are measured at fair value through other comprehensive income (FVOCI). Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses on the instrument's amortised cost which are recognised in profit or loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in Net Investment income'. Interest income from these financial assets is included in 'Interest income' using the effective interest rate method.

- Fair value through profit or loss (FVPL): Assets that do not meet the criteria for amortised cost or FVOCI are measured at fair value through profit or loss. A gain or loss on a debt investment that is subsequently measured at fair value through profit or loss and is not part of a hedging relationship is recognised in profit or loss and presented in the profit or loss statement within 'Net trading income' in the year in which it arises, unless it arises from debt instruments that were designated at fair value or which are not held for trading, in which case they are presented separately in 'Net investment income'. Interest income from these financial assets is included in 'Interest income' using the effective interest rate method.

National Bank of Rwanda
Notes to the financial statements
For the year ended 30 June 2025

3. Material accounting policies
e) Financial assets and liabilities (continued)

Financial assets (continued)

Business model: the business model reflects how the Bank manages the assets in order to generate cash flows. That is, where the Bank's objective is solely to collect the contractual cash flows from the assets or is to collect both the contractual cash flows and cash flows arising from the sale of assets. If neither of these is applicable (e.g. financial assets are held for trading purposes), then the financial assets are classified as part of 'other' business model and measured at FVPL. Factors considered by the Bank in determining the business model for a Bank of assets include past experience on how the cash flows for these assets were collected, how the asset's performance is evaluated and reported to key management personnel, how risks are assessed and managed and how managers are compensated.

SPPI: Where the business model is to hold assets to collect contractual cash flows or to collect contractual cash flows and sell, the Bank assesses whether the financial instruments' cash flows represent solely payments of principal and interest (the `SPPI test'). In making this assessment, the Bank considers whether the contractual cash flows are consistent with a basic lending arrangement i.e. interest includes only consideration for the time value of money, credit risk, other basic lending risks and a profit margin that is consistent with a basic lending arrangement. Where the contractual terms introduce exposure to risk or volatility that are inconsistent with a basic lending arrangement, the related financial asset is classified and measured at fair value through profit or loss.

The Bank reclassifies debt investments when and only when its business model for managing those assets changes. The reclassification takes place from the start of the first reporting year following the change. Such changes are expected to be very infrequent, and none occurred during the year.

Equity instruments

Equity instruments are instruments that meet the definition of equity from the issuer's perspective; that is, instruments that do not contain a contractual obligation to pay and that evidence a residual interest in the issuer's net assets.

The Bank subsequently measures all equity investments at fair value through profit or loss, except where the Bank's management has elected, at initial recognition, to irrevocably designate an equity investment at fair value through other comprehensive income. The Bank's policy is to designate equity investments as FVOCI when those investments are held for purposes other than to generate investment returns. When this election is used, fair value gains and losses are recognised in OCI and are not subsequently reclassified to profit or loss, including on disposal. Impairment losses (and reversal of impairment losses) are not reported separately from other changes in fair value. Dividends, when representing a return on such investments, continue to be recognised in profit or loss as other income when the Bank's right to receive payments is established.

Gains and losses on equity investments at FVPL are included in the Net trading income' line in the statement of profit or loss.

The Bank's financial assets are classified as follows:

Financial assets	***Classification***
Cash and cash equivalents	*Amortised cost*
Due from International Monetary Fund	*Amortised cost*
Due from foreign financial institutions	*FVTPL & amortised cost*
Foreign investment securities	*FVTPL & FVOCI*
Due from the Government of Rwanda	*Amortised cost*
Government of Rwanda Eurobond investments	*Amortised cost*
Due from local financial institutions	*FVTPL & amortised cost*
Loans and advances to employees	*Amortised Cost*
Equity investments	*FVOCI*

3. Material accounting policies
e) Financial assets and liabilities (continued)

Financial assets (continued)

(ii) Impairment

The Bank assesses on a forward-looking basis the expected credit loss ('ECL') associated with its debt instrument assets carried at amortised cost and FVOCI and with the exposure arising from loan commitments and financial guarantee contracts. The Bank recognises loss allowances for such losses at each reporting date. The measurement of ECL reflects:

- An unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- The time value of money; and
- Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

Note 4 (a) provides more detail of how the expected credit loss allowance is measured.

(iii) Modification of loans

The Bank sometimes renegotiates or otherwise modifies the contractual cash flows of loans to customers. When this happens, the Bank assesses whether or not the new terms are substantially different to the original terms. The Bank does this by considering, among others, the following factors:

- If the borrower is in financial difficulty, whether the modification merely reduces the contractual cash flows to amounts the borrower is expected to be able to pay.
- Whether any substantial new terms are introduced, such as a profit share/equity-based return that substantially affects the risk profile of the loan.
- Significant extension of the loan term when the borrower is not in financial difficulty.
- Significant change in the interest rate.
- Change in the currency the loan is denominated in.
- Insertion of collateral, other security or credit enhancements that significantly affect the credit risk associated with the loan.

If the terms are substantially different, the Bank derecognises the original financial asset and recognises a 'new' asset at fair value and recalculates a new effective interest rate for the asset. The date of renegotiation is consequently considered to be the date of initial recognition for impairment calculation purposes, including for the purpose of determining whether a significant increase in credit risk has occurred.

However, the Bank also assesses whether the new financial asset recognised is deemed to be credit-impaired at initial recognition, especially in circumstances where the renegotiation was driven by the debtor being unable to make the originally agreed payments. Differences in the carrying amount are also recognised in profit or loss as a gain or loss on de-recognition.

If the terms are not substantially different, the renegotiation or modification does not result in De-recognition, and the Bank recalculates the gross carrying amount based on the revised cash flows of the financial asset and recognises a modification gains or loss in profit or loss. The new gross carrying amount is recalculated by discounting the modified cash flows at the original effective interest rate (or credit-adjusted effective interest rate for purchased or originated credit-impaired financial assets).

(iv) De-recognition other than on a modification

Financial assets, or a portion thereof, are derecognised when the contractual rights to receive the cash flows from the assets have expired, or when they have been transferred and either (i) the Bank transfers substantially all the risks and rewards of ownership, or (ii) the Bank neither transfers nor retains substantially all the risks and rewards of ownership and The Bank has not retained control.

National Bank of Rwanda
Notes to the financial statements
For the year ended 30 June 2025

3. Material accounting policies
e) Financial assets and liabilities (continued)

Financial assets (continued)

The Bank enters into transactions where it retains the contractual rights to receive cash flows from assets but assumes a contractual obligation to pay those cash flows to other entities and transfers substantially all of the risks and rewards. These transactions are accounted for as 'pass-through' transfers that result in de-recognition if the Bank:

- Has no obligation to make payments unless it collects equivalent amounts from the assets;
- Is prohibited from selling or pledging the assets; and
- Has an obligation to remit any cash it collects from the assets without material delay.

Collateral (shares and bonds) furnished by the Bank under standard repurchase agreements and securities lending and borrowing transactions are not derecognised because the Bank retains substantially all the risks and rewards on the basis of the predetermined repurchase price, and the criteria for derecognition are therefore not met. This also applies to certain securitisation transactions in which the Bank retains a subordinated residual interest.

Financial liabilities

(i) Classification and subsequent measurement

Financial liabilities are classified as subsequently measured at amortised cost, except for:

- Financial liabilities at fair value through profit or loss: this classification is applied to derivatives. Gains or losses on derivatives are recognised in profit or loss.;
- Financial liabilities arising from the transfer of financial assets which did not qualify for de-recognition, whereby a financial liability is recognised for the consideration received for the transfer. In subsequent periods, the Bank recognises any expense incurred on the financial liability; and
- Financial guarantee contracts and loan commitments.

The Bank's financial liability classification is presented below:

Financial liabilities	
Due to International Monetary Fund	*Amortised cost*
Due to local financial institutions	*FVTPL & amortised cost*
Foreign liabilities	*FVTPL & amortised cost*
Government of Rwanda deposits	*Amortised cost*
Customer deposits	*Amortised cost*
Transitory accounts	*Amortised cost*
Economic recovery fund	*Amortised cost*
Sector recapitalisation funds	*Amortised cost*
Dormant account funds	*Amortised cost*
Death benefit fund	*Amortised cost*
Other payables	*Amortised cost*

(ii) De-recognition

Financial liabilities are derecognised when they are extinguished (i.e. when the obligation specified in the contract is discharged, cancelled or expires).

3. Material accounting policies
e) Financial assets and liabilities (continued)

Financial liabilities (continued)

The exchange between the Bank and its original lenders of debt instruments with substantially different terms, as well as substantial modifications of the terms of existing financial liabilities, are accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The terms are substantially different if the discounted present value of the cash flows under the new terms, including any fees paid net of any fees received and discounted using the original effective interest rate, is at least 10% different from the discounted present value of the remaining cash flows of the original financial liability. In addition, other qualitative factors, such as the currency that the instrument is denominated in, changes in the type of interest rate, new conversion features attached to the instrument and change in covenants are also taken into consideration. If an exchange of debt instruments or modification of terms is accounted for as an extinguishment, any costs or fees incurred are recognised as part of the gain or loss on the extinguishment.

If the exchange or modification is not accounted for as an extinguishment, any costs or fees incurred adjust the carrying amount of the liability and are amortised over the remaining term of the modified liability.

Financial guarantee contracts and loan commitments

Financial guarantee contracts are contracts that require the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due, in accordance with the terms of a debt instrument. Such financial guarantees are given to Banks, financial institutions and others on behalf of customers to secure loans, overdrafts and other Banking facilities.

Financial guarantee contracts are initially measured at fair value and subsequently measured at the higher of:

- The amount of the loss allowance; and
- The premium received on initial recognition less income recognised in accordance with the principles of IFRS 15.

Loan commitments provided by the Bank are measured as the amount of the loss allowance. The Bank has not provided any commitment to provide loans at a below-market interest rate, or that can be settled net in cash or by delivering or issuing another financial instrument.

For loan commitments and financial guarantee contracts, the loss allowance is recognised as a provision. However, for contracts that include both a loan and an undrawn commitment and the Bank cannot separately identify the expected credit losses on the undrawn commitment component from those on the loan component, the expected credit losses on the undrawn commitment are recognised together with the loss allowance for the loan. To the extent that the combined expected credit losses exceed the gross carrying amount of the loan, the expected credit losses are recognised as a provision.

d) Sale and repurchase (repo) agreements

The Bank has entered into repo agreements as part of its monetary policy activities. Securities purchased under agreements to resell are recorded under due to Banks as money market borrowing. Securities sold under agreement to repurchase are disclosed due from Banks. The differences between the purchase and sale prices are treated as interest and accrued using the effective interest method.
The Bank from time to time mops up money from the financial market ('repos') or injects money into the market ('reverse repos') with maturities of 1 - 28 days. The Bank engages in these transactions with commercial Banks only. These have been disclosed in the financial statements as "due to financial institutions" and "due from financial institutions".

National Bank of Rwanda
Notes to the financial statements
For the year ended 30 June 2025

3. Material accounting policies
e) Financial assets and liabilities (continued)

Financial liabilities (continued)

f) Derivative financial assets and liabilities

The Bank enters into derivatives (currency forwards and swaps) for trading purposes. At their inception, derivatives often involve only a mutual exchange of promises with little or no transfer of consideration. The Bank may take positions with the expectation of profiting from favourable movement in prices, rates or indices. The Bank's exposure under derivative contracts is closely monitored as part of the overall management of its market risk. Derivatives are recorded at fair value and carried as assets when their fair value is positive and as liabilities when their fair value is negative. Changes in the fair value of derivatives are included in net trading income

The Bank uses the following derivative instruments:

Currency forwards - Forward contracts are contractual agreements to buy or sell a specified financial instrument at a specific price and date in the future. Forwards are customised contracts transacted in the over–the–counter market. The Bank has credit exposure to the counterparties of forward contracts. Forward contracts are settled gross and result in market risk exposure.

g) Currency in circulation

Currency issued by the Bank represents a claim on the Bank in favour of the holder. The liability for currency in circulation is recorded at face value in these financial statements. Currency in circulation represents the face value of notes and coins in circulation. Notes and coins held by the Bank as cash in main vault, intermediary vault, and cashier at the end of the financial year are netted off against the liability for notes and coins in circulation because they do not represent a liability to a particular holder at that the reporting date.

h) Currency printing and minting costs

The costs incurred for printing Bank notes is deferred on payment. The costs are amortised to the P&L based on the notes issued into circulation on a monthly basis.

Cost of coins minted are deferred on payment. Subsequently, these costs are amortised with issuance of new currency into circulation.

The deferred amount is recognized as a prepayment and represents un-issued Banknotes (currency) stock.

i) Cash and cash equivalents

Cash and cash equivalents include foreign currency held in the Bank and demand deposits held with foreign Banks and highly liquid financial assets with original maturities of three months or less from the date of acquisition that are subject to an insignificant risk change in their fair value and are used by the Bank in the management of its short term commitments.

j) Funds held at/ due to International Monetary Fund (IMF)

The Bank is the designated depository for the IMF's holdings of Rwanda's currency.
Borrowings from and repayments to the IMF are denominated in Special Drawing Rights (SDRs).
The SDR balances in IMF accounts are translated into Francs at the prevailing exchange rates and any unrealized gains or losses are accounted for in accordance with accounting policy on foreign currencies.

3. Material accounting policies

k) Property and equipment

Recognition and measurement

Land and buildings are recognised at fair value based on periodic, but at least every five years, valuations by external independent valuers, less subsequent depreciation for buildings. During the year to 30 June 2025 a revaluation was conducted and related revaluation gain/(loss) surplus is credited to other reserves in shareholders' equity and profit or loss as per IAS 16. All other property and equipment is stated at historical cost less depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Cost may also include transfers from equity of any gains or losses on qualifying cash flow hedges of foreign currency purchases of property, plant and equipment.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred.

Increases in the carrying amounts arising on revaluation of land and buildings are recognised, net of tax, in other comprehensive income and accumulated in reserves in shareholders' equity. To the extent that the increase reverses a decrease previously recognised in profit or loss, the increase is first recognised in profit or loss. Decreases that reverse previous increases of the same asset are first recognised in other comprehensive income to the extent of the remaining surplus attributable to the asset; all other decreases are charged to profit or loss. Each year, the difference between depreciation based on the revalued carrying amount of the asset charged to profit or loss and depreciation based on the asset's original cost, net of tax, is reclassified from the property, plant and equipment revaluation surplus to retained earnings.

Depreciation is calculated using the straight-line method to write down the cost of property and equipment to their residual values over their estimated useful lives. Land is not depreciated. The estimated useful lives of significant items of property and equipment are as follows:

Buildings	2%
Lift for the headquarter	10%
Computer equipment	25%
Currency processing machines	10%
Motor vehicles	25%
Furniture, fittings and office equipment	25%
Security equipment	20%

Depreciation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate. Revaluation of land and buildings is carried out at least once every five years.

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in profit or loss. When revalued assets are sold, it is the Bank's policy to transfer any amounts included in other reserves in respect of those assets to retained earnings.

Property that is being constructed or developed for future use to support operations is classified as capital Work–in–Progress (WIP) and stated at cost until construction or development is complete, at which time it is reclassified as property and equipment in use.

National Bank of Rwanda
Notes to the financial statements
For the year ended 30 June 2025

3. Material accounting policies

l) Investment property

The Bank holds certain properties as investments to earn rental income or capital appreciation or any currently undetermined future use. Investment properties are carried at cost less accumulated depreciation and accumulated impairment. Depreciation is calculated at a rate of 5% using the straight-line method.
Gains or losses arising from the retirement/ disposal of investment property are recognized in profit or loss.

m) Intangible assets

(i) Software

Costs associated with maintaining software programmes are recognised as an expense as incurred. Development costs that are directly attributable to the design and testing of identifiable and unique software products controlled by the Bank are recognised as intangible assets where the following criteria are met:

- it is technically feasible to complete the software so that it will be available for use
- management intends to complete the software and use or sell it
- there is an ability to use or sell the software
- it can be demonstrated how the software will generate probable future economic benefits
- adequate technical, financial and other resources to complete the development and to use or sell the software are available, and
- the expenditure attributable to the software during its development can be reliably measured.

Directly attributable costs that are capitalised as part of the software include employee costs and an appropriate portion of relevant overheads.

Capitalised development costs are recorded as intangible assets and amortised from the point at which the asset is ready for use.

(ii) Research and development

Research expenditure and development expenditure that do not meet the criteria in (i) above are recognised as an expense as incurred. Development costs previously recognised as an expense are not recognised as an asset in a subsequent period.

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses.

(iii) Amortisation methods and periods

Amortization is calculated using the straight-line method to write down the cost of intangible assets to their residual values over their estimated useful lives as follows:

Computer software: 3 to 5 years

Amortisation methods, useful lives and residual values are reviewed at each financial year end and adjusted if appropriate.

(iv) Work in progress

Intangible assets that are being developed for future use to support operations are classified as Work – in – Progress (WIP) and stated at cost until development is complete, at which time they are reclassified as Intangible assets.

3. Material accounting policies

n) Impairment of assets

Assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units). Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

o) Income tax expense

The Bank is considered as the State with regard to the rules of tax liability and tax payment pertaining to all taxes levied for the benefit of the State and its administrative entities as per Article 61 of Law No. 016/2021 of 03/03/2021 amending Law No.48/2017 of 23/09/2017 Governing the National Bank of Rwanda. Therefore, The Bank is exempt from current income taxes.

p) Deposits

Deposits are non-derivative financial liabilities with fixed or determinable receipts that are not quoted in an active market. They arise when the Bank receives money or services directly from counterparty with no intention of trading the payable. Deposits held are carried at cost with interest income accruing on an effective interest rate basis.

Cash Ratio Deposits are taken from commercial Banks for liquidity management (monetary policy purposes) of the Bank in accordance with the Banking Act and are interest free. Cash Ratio Reserves is a monetary policy instrument used to manage liquidity. The deposits earn no interest to commercial Banks and the Bank does not trade on these deposits in any way. The deposits are currently computed at 5.0% (2024: 5.0%) of each commercial Bank's deposits taken from the public. Each commercial Bank is required to deposit the applicable amount at the Bank and the computation is done on a monthly basis.

q) Stocks of consumables

Stocks of consumables are valued at the lower of cost and net realizable value. Cost is estimated using the weighted average method. Provisions are made for all anticipated stock losses, impairment and obsolescence.

r) Provisions

Provisions are recognized when the Bank has a present obligation (legal or constructive) as a result of past event, and it is probable that an outflow of resource embodying economic benefits will be required to settle the obligation and a reliable estimate of the amount of the obligation can be made.

s) Commitments on behalf of the Government of Rwanda

Commitments on behalf of Government of Rwanda are as follows:

- Arising from the issue of Treasury bills and Treasury bonds
- Arising from administration of the Economic Recovery Funds

These commitments are not included on the statement of financial position as the Bank is involved in such transactions only as an agent. There are no expected credit losses on these commitments since they are fully covered by the Government of Rwanda.

National Bank of Rwanda
Notes to the financial statements
For the year ended 30 June 2025

3. Material accounting policies

t) Government grants and government assistance

The Bank, being a wholly owned government financial institution, may receive grants in both monetary and non-monetary bases. Government grants are recognized as income over the period necessary to match them with the related costs which they are intended to compensate, on a systematic basis.

Government grants related to assets, including non-monetary grant at fair value, are presented in the statement of financial position by setting up the grant as deferred income. In addition, the Bank may receive certain forms of government assistance which cannot reasonably have a value placed upon them, and transactions with Government which cannot be distinguished from the normal trading transactions of the Bank.

The Bank's policy on government assistance that cannot be reliably measured is to disclose the nature, extent and duration of the assistance in order that the financial statements are not misleading.

u) Employee benefits

(i) Short term obligations

Liabilities for wages and salaries, including non-monetary benefits, annual leave and accumulating sick leave that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognised in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the balance sheet.

Obligations for contributions to defined contribution plans are expensed as the related service is provided and recognized as personnel expenses in the profit or loss. Prepaid contribution is recognized as an asset to the extent that a cash refund or a reduction in future payment is available.

(ii) Post-employment obligations

The Bank operates various post-employment schemes,

Defined contribution plan

The Bank has an in-house managed defined contribution plan, based on 24 July 2015, by the Governor of the National Bank of Rwanda, as per Service Order No. 32/2015. The key modalities of the complementary pension fund at the Bank are highlighted below.

The contributions due to the NBR complementary pension scheme and Staff Death benefits. Funds shall be calculated as 10% of each staff member's basic salary, composed of the employer's share of 60% and the employee's share of 40%. Of this, 20% is deposited in the staff death fund, which the Bank manages, while 80% is contributed to the pension fund, which is managed by the NBR Complementary Pension Scheme.

Recently, the Bank's staff members opted to additionally contribute 6% on monthly basis to increase their benefits for the future. When the employee works for a period corresponding to less than a month, the contribution deductions are calculated in proportion to the employee's salary.

The above contribution plan includes an embedded death-in-service benefit of 20% of the total contributions made to the plan. Obligations are recognized as an expense in profit or loss in the period in which the service is rendered by the employee.

(iii) Other long term employee benefits

Other long term benefits are not significant and are recognised in profit or loss in the period in which they arise.

3. Material accounting policies

v) Contingent liabilities

Letters of credit and guarantees are disclosed as contingent liabilities. Estimates of the outcome and the financial effect of contingent liabilities are made by management based on the information available up to the date that the financial statements are approved for issue by the Directors.

w) Dividends

Provision is made for the amount of any dividend declared, being appropriately authorised and no longer at the discretion of the Bank, on or before the end of the reporting period, but not distributed at the end of the reporting period.

Dividends are declared after the allocation of other appropriations deemed necessary by the Board of Directors, notably to the general reserve fund.

x) Share capital and reserves

Shares are classified as share capital in equity. Article 3 of the Law No.48/2017 of 23/09/2017 Governing the National Bank of Rwanda and as amended by Law No. 016/2021 of 03/03/2021 prescribes that the overall capital of the Bank is seven billion Rwandan francs (Frw 7,000,000,000).

The capital may be increased either by the capitalization of reserve funds on the decision of the Board of Directors of NBR upon approval by a Presidential Order or by new capital endowment by the Government of Rwanda.

National Bank of Rwanda
Notes to the financial statements
For the year ended 30 June 2025

4. Financial risk management

Risk management framework

The risk management structure is as follows.

Board of Directors

The board of directors is responsible for:

- Approval of risk policies to mandate a set of standards for risk management throughout the Bank that include risk identification, measurement, monitoring, control, and risk reporting
- Setting appetite for risk taking at the Bank level and at various levels in consistent with the set strategies
- Ensuring the effectiveness, independence, and integrity of risk management systems through internal and
- Periodically (at least annually) reviewing the risk strategy and significant risk policies of the Bank.

Board Audit and Risk Committee (BARC)

The BARC is responsible for all Material Risks. BOD. The BOD establishes the committee as a standing committee to assist the BOD in Risk Management. The Purpose of the top level committee is to help the BOD, by virtue of the powers delegated to it by the BOD.

The committee has full responsibility of assisting the BOD in formulating strategies for Enterprise Risk Management, evaluating overall risks faced by the Bank, aligning risk policies with strategic objectives, determining the level of risks which will be in the best interest of the Bank.

Following are the Roles and Responsibilities of the BARC:

- Based on the reports received, BARC will take decisions and provide guidance mandate to RMD and relevant functions of the Bank on management of risks;
- Make suitable recommendations to the BOD as it sees fit and examine any other matters referred to it by the BOD;
- BARC will review issues raised by Internal and external audit that impact the risk management and make suitable recommendations to the BOD;

Management committee

Executive Management is responsible for day-to-day management of risk by providing guidance and implementing directives of the Board on risk issues.

Technical risk committee

The main objective of the committee is to ensure that all risk policies, procedures, reports that are submitted to management are technically discussed at managerial level; to ensure all key stakeholders are involved and that their inputs are inclusive. This allows risk management processes to be more effective across the Bank.

Risk management function

Risk management department for respective risks is responsible for operational aspects of implementing risk policies. The director of risk management shall head the risk management department with the role of overseeing its functioning, in collaboration with the Bank's department.

The following section discusses the Bank's risk management policies. The measurement of ECL under IFRS 9 uses the information and approaches that the Bank uses to manage credit risk, though certain adjustments are made in order to comply with the requirements of IFRS 9. The approach taken for IFRS 9 measurement purposes is discussed separately in note 4 (a) (iii).

4. Financial risk management (continued)

Risk management policies (continued)

(a) Credit risk

Credit risk is the risk of suffering financial loss, should any of the Bank's customers, clients or market counterparties fail to fulfil their contractual obligations to the Bank. Credit risk arises mainly from foreign financial institutions, local financial institutions, balances with Government of Rwanda, loans and advances to employees, equity instruments and other receivables, but can also arise from credit enhancement provided, such as derivatives, financial guarantees, letters of credit, endorsements and acceptances.

The Bank is also exposed to other credit risks arising from investments in debt securities and other exposures arising from its trading activities ('trading exposures') including non-equity trading portfolio assets and derivatives as well as settlement balances with market counterparties and reverse repurchase agreements. The directors therefore carefully manage its exposure to credit risk. The credit risk management and control are centralised with the management team which reports regularly to the Board of Directors.

For short term investments, the Bank takes exposure to issues having at least F2, A-2 and P-2 according to Fitch, Standard and Poor's (S&P) and moody with a maturity up to one year the Bank can also invest in securities issues or directly oriented by foreign forts and supranational which have a long term rating attracts ''A'' according to above stated credit rating agencies.

Investment is guided by the investment guidelines which are reviewed and approved by the investment committee once a year by setting how overall credit risk limits within scope of investment guidelines. The Bank aims to prevent credit risk from exceeding its risk tolerance. The institution eligible for transactions are chosen among those institutions meeting the minimum credit ratings limitations setting guidelines in all transactions types of immediately reflected on their limits, and the use of limits are regulatory monitored and reported.

(i) Loans and advances

The Bank lends only to the Government of Rwanda in form of overdraft facilities, local Banks and financial institutions through its monetary policy operations, and employees through approved policies. Credits to Banks and other financial institutions are for a very short term and are covered by guarantees. The Bank requires 100% deposit cover of letters of credit opened and/or confirmed. It requires guarantees in case of issuing off balance sheet liabilities.

The estimation of credit exposure for risk management purposes is complex and at times requires the use of models, as the exposure varies with changes in market conditions, expected cash flows and the passage of time. The assessment of credit risk of a portfolio of assets entails further estimations as to the likelihood of defaults occurring, of the associated loss ratios and of default correlations between counterparties. The Bank measures credit risk using Probability of Default (PD), Exposure at Default (EAD) and Loss Given Default (LGD). This is similar to the approach used for the purposes of measuring Expected Credit Loss (ECL) under IFRS 9. Refer to note 4 (a) (iii) for more details.

(ii) Other debt securities

For debt securities, external rating agency credit grades are used. These published grades are continuously monitored and updated. The PD's associated with each grade are determined based on default rates as published by the rating agency.

National Bank of Rwanda
Notes to the financial statements
For the year ended 30 June 2025

4. Financial risk management (continued)

(a) Credit risk (continued)

(iii) Expected credit loss measurement

- IFRS 9 outlines a 'three-stage' model for impairment based on changes in credit quality since initial recognition as summarized below:
- A financial instrument that is not credit-impaired on initial recognition is classified in 'Stage 1' and has its credit risk continuously monitored by the Bank.
- If a significant increase in credit risk ('SICR') since initial recognition is identified, the financial instrument is moved to 'Stage 2' but is not yet deemed to be credit impaired. Please refer to note 6 (a) (iii) (1) for a description of how the Bank determines when a significant increase in credit risk has occurred.
- If the financial instrument is credit-impaired, the financial instrument is then moved to 'Stage 3'. Please refer to note 4 (a) (iii) (2) for a description of how the Bank defines credit-impaired and default.
- Financial instruments in Stage 1 have their ECL measured at an amount equal to the portion of lifetime expected credit losses that result from default events possible within the next 12 months. Instruments in Stages 2 or 3 have their ECL measured based on expected credit losses on a lifetime basis. Please refer to note 4 for a description of inputs, assumptions and estimation techniques used in measuring the ECL.
- A pervasive concept in measuring ECL in accordance with IFRS 9 is that it should consider forward-looking information. Note 4 (a) (iii) (4) includes an explanation of how the Bank has incorporated this in its ECL models.
- Purchased or originated credit-impaired financial assets are those financial assets that are credit-impaired on initial recognition. Their ECL is always measured on a lifetime basis (Stage 3).

The following diagram summarizes the impairment requirements under IFRS 9 (other than purchased or originated credit-impaired financial assets):

Change in credit quality since initial recognition.

Stage 1	Stage 2	Stage 3
(Initial recognition)	(Significant increase in credit risk since initial recognition)	(Credit-impaired assets)
12-month expected credit losses	Lifetime expected credit losses.	Lifetime expected credit losses.

The key judgements and assumptions adopted by the Bank in addressing the requirements of the standard are discussed below:

(1) Significant increase in credit risk (SICR)

The Bank considers a financial instrument to have experienced a SICR when one or more of the following quantitative, qualitative or backstop criteria have been met:

Quantitative criteria:

The Bank uses credit ratings in order to determine SICR. The movement of an asset's credit rating to the next lower rating of the credit rating scale is defined as a 1 notch rating movement (e.g. moving from A+ to A). The SICR for the Bank is defined as a rating change of more than 2 notches as this change is guaranteed to move the asset to the next rating category or risk profile.

4. Financial risk management (continued)

(a) Credit risk (continued)

(iii) Expected credit loss measurement (continued)

Qualitative criteria:
If the borrower is on the watch list and/or the instrument meets one or more of the following criteria:

- Significant adverse changes in business, financial and/or economic conditions in which the borrower operates
- Actual or expected forbearance or restructuring.
- Actual or expected significant adverse change in operating results of the borrower.

Backstop
A backstop is applied, and the financial instrument considered to have experienced a significant increase in credit risk if the borrower is more than 30 days past due on its contractual payments.

The assessment of significant deterioration is key in establishing the point of switching between the requirement to measure an allowance based on 12-month expected credit losses and one that is based on lifetime expected credit losses.

(2) Definition of default and credit-impaired assets

The Bank defines a financial instrument as in default, which is fully aligned with the definition of credit-impaired, when it meets one or more of the following criteria:

Quantitative criteria
The borrower is more than 90 days past due on its contractual payments.

Qualitative criteria
The borrower meets unlikeliness to pay criteria, which indicates the borrower is in significant financial difficulty. These are instances where:

- The borrower is in long-term forbearance
- The borrower is deceased
- The borrower is insolvent
- The borrower is in breach of financial covenant(s)
- An active market for that financial asset has disappeared because of financial difficulties
- Concessions have been made by the lender relating to the borrower's financial difficulty
- It is becoming probable that the borrower will enter Bankruptcy.

The criteria above have been applied to all financial instruments held by the Bank and are consistent with the definition of default used for internal credit risk management purposes. The default definition has been applied consistently to model the Probability of Default (PD), Exposure at Default (EAD) and Loss given Default (LGD) throughout the Bank's expected loss calculations.

An instrument is considered to no longer be in default (i.e. to have cured) when it no longer meets any of the default criteria for a consecutive period of six months.

National Bank of Rwanda
Notes to the financial statements
For the year ended 30 June 2025

4. Financial risk management (continued)

(a) Credit risk (continued)

(ii) Expected credit loss measurement (continued)

This period of six months has been determined based on an analysis which considers the likelihood of a financial instrument returning to default status after cure using different possible cure definitions.

(3) Measuring ECL — Explanation of inputs, assumptions and estimation techniques

The ECL is measured on either a 12-month (12M) or lifetime basis depending on whether a SICR has occurred since initial recognition or whether an asset is considered to be credit-impaired. ECLs are the discounted product of the PD, EAD, and LGD, defined as follows:

- The PD represents the likelihood of a borrower defaulting on its financial obligation (as per "Definition of default and credit-impaired" above), either over the next 12 months (12M PD), or over the remaining lifetime (Lifetime PD) of the obligation.
- EAD is based on the amounts the Group expects to be owed at the time of default, over the next 12 months (12M EAD) or over the remaining lifetime (Lifetime EAD).
- LGD represents the Bank's expectation of the extent of loss on a defaulted exposure. LGD varies by type of counterparty, type and seniority of claim and availability of collateral or other credit support. LGD is expressed as a percentage loss per unit of EAD. LGD is calculated on a 12M or lifetime basis, where 12M LGD is the percentage of loss expected to be made if the default occurs in the next 12 months and Lifetime LGD is the percentage of loss expected to be made if the default occurs over the remaining expected lifetime of the loan.

The ECL is determined by projecting the PD, LGD and EAD for each future month and for each individual exposure or collective segment. These three components are multiplied together and adjusted for the likelihood of survival (i.e. the exposure has not prepaid or defaulted in an earlier month). This effectively calculates an ECL for each future month, which is then discounted back to the reporting date and summed.

The 12Months and Lifetime EADs are determined based on the expected payment profile, which varies by instrument.

- For amortizing products and bullet repayment loans, this is based on the contractual repayments owed by the borrower over a 12Months or Lifetime basis. The 12Months and Lifetime LGDs are determined based on the factors which impact the recoveries made post default. These vary by product type.
- For secured products, this is primarily based on collateral type and projected collateral values, historical discounts to market/book values due to forced sales, time to repossession and recovery costs observed.
- For unsecured products, LGD's are typically set at product level due to the limited differentiation in recoveries achieved across different borrowers.

The assumptions underlying the ECL calculation (such as how the maturity profile of the PDs and how collateral values change etc.) are monitored and reviewed periodically.

There have been no significant changes in estimation techniques or significant assumptions made during the reporting period.

4. Financial risk management (continued)

(a) Credit risk (continued)

(ii) Expected credit loss measurement (continued)

(4) Forward-looking information incorporated in the ECL models

Given the nature of the short-term exposures, forward-looking information is expected to have an immaterial impact on expected credit losses.

(iii) Maximum exposure to credit risk

The tables below provide information about the credit quality of financial assets and the allowance for impairment losses held by the Bank against these assets.

4. Financial risk management (continued)

(b) Liquidity risk

'Liquidity risk' is the risk that the Bank will encounter difficulty in meeting obligations associated with its financial liabilities that are settled by delivering cash or another financial asset.

Management of liquidity risk

The Bank's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Bank's reputation.

In order to manage liquidity risk, the Bank invests its surplus reserves in time deposits with maturities concentrated in short term maturity span of one to three months. The portfolio is structured in such a manner that a mix of deposits matures every week to ensure availability of funds to meet scheduled Government and the Bank's obligations.

The Bank divides its foreign exchange reserves into liquidity investment and Investment tranches. The liquidity tranche is intended to meet both anticipated monthly cash outflows requirements thus matching both on and off statement of financial position foreign assets and liabilities. The tranche is monitored on a daily basis and it is comprised of highly liquid short term financial instruments.

Portfolio tranching structure

Liquidity tranche - For the cover of payments, interventions, imports and short-term debt
Investment tranche - Excess reserves beyond liquidity portfolio

Tranching criteria

Liquidity tranche

Lower Band	Projected monthly average outflows (Government and Projects spending in foreign currencies) + expected monthly average FX intervention + projected monthly average Government debt services
Upper Band	4.8 months import cover

The target level is decided by the Reserve management committee.

Investment tranche

This is calculated as follows:

Investment tranche = Total reserves - liquidity tranche.

The balances held in each tranche are as follows:

Liquidity tranche	**30 June 25 Frw'000'**	**30 June 24 Frw'000'**
Liquidity tranche	741,469,597	764,651,197
Investment tranche	2,586,281,972	1,908,966,397
Total reserves	**3,327,751,569**	**2,673,617,594**

4. Financial risk management (continued)

(b) Liquidity risk (continued)

Maturity analysis for financial liabilities and financial assets (continued)

The above analysis is based on carrying amounts as at 30 June 2025 and includes any interest arising over the remaining life of the financial assets and liabilities. The only off-balance sheet item that the Bank holds relates to the Economic Recovery Fund (ERF) and imported currencies (both coins and notes) kept in the greenhouse, out of which any issuance made is reported as currency in circulation. There is no material difference between the carrying amount and the fair value.

Liquidity reserves

The table below sets out the components of the Bank's liquidity reserves.

	30 June 25 Frw'000'	30 June 24 Frw'000'
Cash	76,206,918	86,228,684
Current accounts	63,317,871	34,155,370
Fixed-term deposits	423,942,934	394,554,615
Special Drawing Rights (SDR)	130,142,306	102,932,991
	693,610,029	**617,871,660**

(c) Market risk

Market risk is the risk that changes in market prices – such as foreign exchange rates, interest rates, and equity prices – will affect the Bank's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters while optimizing returns.

Management of market risk

The Bank separates exposures to market risk into either trading or non-trading portfolios. Trading portfolios include those positions arising from market-making transactions where the Bank acts as principal with commercial Banks or the market.

Non-trading portfolios primarily arise from the interest rate management of the Bank's investment. and monetary policy assets and liabilities.

Currency risk

The Bank takes on exposure to the effects of fluctuations in the prevailing foreign currency exchange rates on its financial position and cash flows.
As per the investment policy and guidelines, for each currency, assets and liabilities should be matched at 100%. However, in the event of any deviations, only an overall maximum deviation of +/- 2% from the USD is acceptable.

Transactions in foreign currency are recorded at the rate in effect at the date of the transaction. The Bank translates monetary assets and liabilities denominated in foreign currencies at the exchange rate in effect on the reporting date. The Bank records all gains or losses on changes in currency exchange rates in profit or loss.

National Bank of Rwanda
Notes to the financial statements
For the year ended 30 June 2025

4. Financial risk management (continued)

(b) Market risk (continued)

Currency risk (continued)

The table below summarizes the foreign currency exposure as at 30 June 2025:

	2025 Frw'000	2024 Frw'000
Assets in foreign currencies	3,611,954,199	2,886,119,869
Liabilities in foreign currencies	(1,582,578,294)	(1,277,537,629)
Net foreign currency exposure at the end of the year	**2,029,375,905**	**1,608,582,240**

The Bank manages risks through prudent management of its assets and liabilities by ensuring long foreign exchange positions, especially for the United States of America dollars (US$), for which the exchange rate is relatively stable in comparison to other foreign currencies, and hence limiting exchange positions for other currencies.

Structurally, the Bank's exchange positions by currency are long except for the Euro, transferable positions in Special Drawing Rights, and in Rwandan Francs that are short. Thus, when exchange rates vary upward, the Bank makes a gain. On the other hand, if there is a downward variation in exchange rates, the Bank makes a loss.

Sensitivity analysis on currency risk

The following table demonstrates the sensitivity to a reasonably possible change in the below mentioned exchange rates, with all other variables held constant, of the Bank's profit (due to changes in the fair value of monetary assets and liabilities).

	Currency carrying amount	5% Depreciation	5% Appreciation
Assets	**Frw '000**	**Frw '000**	**Frw '000**
USD	3,146,611,530	(157,330,576)	157,330,576
GBP	1,812,278	(90,614)	90,614
EUR	13,623,844	(681,192)	681,192
SDR	439,665,141	(21,983,257)	21,983,257
Other	10,241,406	(512,070)	512,070
	3,611,954,199	**(180,597,709)**	**180,597,709**
Liabilities			
USD	721,457,491	(36,072,8750	36,072,875
EUR	92,783,693	(4,639,185)	4,639,185
GBP	18,321,401	(916,070)	916,070
SDR	748,953,932	(37,447,697)	37,447,697
Others	1,061,778	(53,089)	53,089
	1,582,578,295	**(79,128,916)**	**79,128,916**
Total (decrease)/increase	**2,079,667,642**	**(79,128,916)**	**79,128,916**
Effect on net surplus	**2,079,667,642**	**(79,128,916)**	**79,128,916**

At 30 June 2025, if the Rwandan Franc had weakened / strengthened by 5% against the major trading currencies, with all other variables held constant, the impact on the Bank's surplus would have been **Frw'000' 76,422,841** lower/higher (30 June 2024: **Frw'000' 80,431,349**).

The table below shows exchange rates of major currencies applied during the year:

Currency	Closing rate 30 June25	Closing rate 30 June24	Average rate 30 June 25	Average rate 30 June 24
USD	1,433.01	1,311,13	1,433.01	1,311,13
EUR	1,679.49	1,401.40	1,679.49	1,401.40
GBP	1,965.59	1,655.17	1,965.59	1,655.17
SDR	1,968.07	1,724.15	1,968.07	1,724.15

National Bank of Rwanda
Notes to the financial statements
For the year ended 30 June 2025

4. Financial risk management (continued)

(c) Market risk (continued)

Interest rate risk

Interest rate is the risk that the future cash flows of financial instruments will fluctuate because of changes in the market interest rates. Interest margin may decrease as a result of such changes but may increase losses in the event that unexpected movement arises. The Bank closely monitors interest rate movements and seeks to limit its exposure by managing the interest rate and maturity structure of assets and liabilities carried on the statement of financial position.

The table below shows interest rate sensitivity position of the Bank at 30 June based on the earlier of maturity or re-pricing dates. Items not recognized on the statement of financial position do not pose any significant interest rate risk to the Bank.

5. Fair value of financial instruments

A. Valuation models

The Bank measures fair values using the following fair value hierarchy which reflects the significance of the inputs used in making the measurements.

Level 1: inputs that are quoted market prices (unadjusted) in active markets for identical instruments.

Level 2: inputs other than quoted prices included within Level 1 that are observable either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques in which all significant inputs are directly or indirectly observable from market data.

Level 3: inputs that are unobservable. This category includes all instruments for which the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments for which significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

Valuation techniques include net present value and discounted cash flow models, and comparison with similar instruments for which market observable prices exist.

Assumptions and inputs used in valuation techniques include risk-free and benchmark interest rates, credit spreads and other premia used in estimating discount rates, bond and equity prices, foreign currency exchange rates, equity and equity index prices and expected price volatilities and correlations.

The objective of valuation techniques is to arrive at a fair value measurement that reflects the price that would be received to sell the asset or paid to transfer the liability in an orderly transaction between market participants at the measurement date.

B. Fair value hierarchy

The valuation hierarchy, and types of instruments classified into each level within that hierarchy, is set out below:

	Level 1	Level 2	Level 3
Fair value determined using	Unadjusted quoted prices in an active market for identical assets and liabilities	Valuation models with directly or indirectly market observable inputs	Valuation models using significant non market observable inputs
Types of financial assets	Actively traded government and other agency securities Listed derivative instruments Listed equities	Corporate and other government bonds and loans Over-the-counter (OTC) derivatives	Highly structured OTC derivatives with unobservable parameters. Corporate bonds in illiquid markets.
Types of financial liabilities	Listed derivative instruments	Over-the-counter (OTC) derivatives	Highly structured OTC derivatives with unobservable parameters

Financial instruments measured at fair value - Valuation hierarchy

The tables below analyse financial instruments measured at fair value at the reporting date, by the level in the fair value hierarchy into which the fair value measurement is categorised.

6. Operational risk

Operational risk is the risk of direct or indirect loss arising from a wide variety of causes associated with the Bank's processes, personnel, technology and infrastructure and from external factors other than credit, market and liquidity risks such as those arising from legal and regulatory requirements and generally accepted standards of corporate behaviour. Operational risks arise from all of the Bank's operations and are faced by all business units.

The Bank's objective is to manage operational risk so as to balance the avoidance of financial losses and damage to the Bank's reputation with overall cost effectiveness and to avoid control procedures that restrict initiative and creativity.

The primary responsibility for the development and implementation of controls to address operational risk is assigned to senior management within each business unit. This responsibility is supported by the development of overall Bank standards for the management of operational risk in the following areas:

- Requirements for appropriate segregation of duties, including the independent authorization of transactions.
- Requirements for the reconciliation and monitoring of transactions.
- Compliance with regulatory and other legal requirements.
- Documentation of controls and procedures.
- Requirements for the yearly assessment of operational risks faced and the adequacy of controls and procedures to address the risks identified.
- Requirements for the reporting of operational losses and proposed remedial action.
- Development of contingency plans.
- Training and professional development.
- Ethical and business standards.
- Risk mitigation, including insurance where this is effective.

7. Interest income

Interest income from foreign operations relates to interest earned from investments placed with Crown Asset Management Limited ("CAIM)", Reserve Advisory Management Partnership ("RAMP"), Bank for International Settlements ("BIS") and treasury bonds issued by foreign sovereigns (collectively known as foreign financial investments), foreign fixed term deposits, Special Drawing Rights ("SDR") holdings with the IMF and call money in foreign currency.

Interest on domestic investments relates to interest earned from loans to government, swaps agreements, agricultural sector refinancing facility loans, economic recovery loans and interest income from Government of Rwanda Eurobond investments.

Interest income on staff loans for the year ended 30 June 2025 was appropriated to the staff welfare equity reserve as part of a directive by the board of directors.

	2025	2024
	Frw '000'	Frw '000'
Foreign financial investments	94,874,587	54,115,442
Swap operations	22,959,610	17,126,376
Government of Rwanda Eurobond investments	6,512,296	5,991,841
Overnight lending - reverse repos	92,102	2,733,561
Staff loans	355,794	302,785
Loans to Government of Rwanda	-	23,851
Economic recovery loans	-	142,790
SDR holdings with IMF	4,411,281	2,280,772
Refinancing facility loans	7,258	3,345
	129,212,928	**82,720,763**

National Bank of Rwanda
Notes to the financial statements
For the year ended 30 June 2025

8. Interest expense

Interest expense includes interest paid on currency swap operations with local and foreign commercial banks, interest expense on SDR allocations with the IMF and interest on money market interventions which mainly includes Repos and reverse Repos that the Central Bank undertakes.

	2025	2024
	Frw '000'	Frw '000'
SDR allocations with IMF	4,750,470	5,292,489
Swap operations	6,692,830	5,015,952
Interest paid on monetary policy issues	7,707,799	938,795
	19,151,099	**11,247,236**

9. a) Fee and commission income

	2025	2024
	Frw '000'	Frw '000'
Commissions on foreign operations	2,153,968	3,956,004
Other commissions	90,525	76,316
	2,244,493	**4,032,320**

b) Fee and commission expense

	2025	2024
	Frw '000'	Frw '000'
Commission paid on foreign operations	2,592,905	3,471,706
Fund management fees	1,325,947	1,129,262
	3,918,852	**4,600,968**

10. a) Unrealized revaluation gains

	2025	2024
	Frw '000'	Frw '000'
Foreign assets unrealised foreign exchange gains	70,236,620	104,764,791
	70,236,620	**104,764,791**

During the year ended 30 June 2025, unrealised net foreign exchange revaluation gains amounted to **Frw'000' 70,236,620** (2024: **Frw'000' 104,764,791**). This amount has been included in the statement of profit or loss in determining the Bank's net operating profit for the year in order to comply with the requirements of IAS 21- *Accounting for the Effects of Changes in Foreign Exchange Rates*.

The unrealised net foreign exchange revaluation gains do not form part of the bank's distributable profits and have, hence, been subsequently appropriated to the translation reserve in the statement of changes in equity in line with the Bank's mandate of reserve management.

b) Net trading income

	2025	2024
	Frw '000'	Frw '000'
Net gain on foreign currency transactions	35,207,737	34,555,967
Realized losses on investment securities	(15,223,179)	(2,342,915)
Realized gains on investment securities	4,609,457	(8,268,841)
Unrealized Gain/(losses) on investment securities (FVTPL)	19,154,953	12,758,448
	43,748,968	**36,702,658**

11. Other operating income

	2025 Frw '000'	2024 Frw '000'
Government securities issuance fees	2,969,131	2,999,375
Supervision fees	3,549,784	3,153,311
Other income	1,343,751	1,139,229
Licenses and applications fees	285,922	38,589
Processing fees	210,637	183,878
Fine and penalty fees	316,769	372,385
Swift message received	59,114	60,680
Forex bureau applications and registrations fees	21,880	21,500
Gain on sales of properties and equipment	67,662	23,597
	8,824,650	**7,992,544**

This relates to government securities issuances fees, supervision fees on services offered by the Bank to the financial services industry. Other income relates to cheque printing fees, strong room rental income, cash surplus, sale of demonetized currency and other recoveries made in the year.

12. Personnel expense

	2025 Frw '000'	2024 Frw '000'
Salaries and other related allowances	32,822,088	28,811,676
Contribution to RSSB pension scheme	2,942,268	1,500,917
Medical expenses	3,363,956	2,400,344
Contribution to the complementary pension fund	1,048,409	1,010,891
Leave allowances	664,705	520,057
Contributions to the death benefit fund	259,512	250,679
Social activities and condolences	324,600	236,340
Long term awards	583,342	30,737
Other expenses	4,291,533	3,678,632
	46,300,413	**38,440,273**

Increase in other expenses is due to local and overseas training workshops.

The Bank contributes to the following post-employment benefit plans:

Complementary pension fund- entitles a retired employee or his/her dependants in case of death to receive the total contributions including the accrued interest from investments after deduction of the total amount related to all obligations due to BNR.

Death benefit fund- entitles a retired employee's dependants in case of death to receive the total death benefits equivalent to thirty-six (36) * last gross monthly salary of the deceased staff.

The contributions due to the NBR complementary pension scheme and Staff Death benefits funds shall be calculated as 10% of each staff member's basic salary, composed of the employer's share of 60% and the employee's share of 40%. Of this, 20% is deposited in the staff death benefits fund, which the Bank manages while 80% is contributed to the pension fund, which is managed by the NBR Complementary Pension Scheme.

Recently, the Bank's staff members opted to contribute an additional 6% every month to increase their benefits for the future.

25. Property and equipment (continued)

Fair value of land and buildings

An independent valuation of the Bank's land and buildings was performed by valuers to determine the fair value of the land and buildings as at 30 June 2025. The revaluation surplus was credited to other comprehensive income. If the land and buildings were stated on the historical cost basis, the amounts would be as follows:

	2025 Frw' 000	2024 Frw' 000
Cost:		
Buildings	15,467,698	15,466,280
Land	5,288,172	5,288,172
Total cost	**20,755,870**	**20,754,452**
Accumulated depreciation:		
Buildings	(1,618,766)	(1,536,995)
Land	-	-
Total accumulated depreciation	**(1,618,766)**	**(1,536,995)**
NBV	**19,137,104**	**19,217,457**

The table below analyses the non-financial assets carried at fair value, by valuation method. The different level of fair value measurement hierarchy is described as follows:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (Level 3).

	Fair value measurements at 30 June 2025 using Level 1	Level 2	Level 3
Recurring fair value measurements			
− Land			21,253,607
− Buildings			14,313,940
	-	-	**35,567,547**

	Fair value measurements at 30 June 2024 using Level 1	Level 2	Level 3
Recurring fair value measurements			5,288,172
− Land			15,467,698
− Buildings			**20,755,870**
	-	-	**20,755,870**

Valuation processes of the Bank

The Bank's Finance Department in collaboration with Administrative Department coordinates the valuations processes of land and buildings required for financial reporting purposes, including level 3 fair values. This team reports directly to the executive director Finance and Strategy Directorate.

The company engages external, independent and qualified valuers to determine the fair value of the company's land and buildings. The latest valuation was carried out as at 12 May 2025 by Certified valuer HAJABAKUNZI UWINSHUTI Eric. In the directors' opinion, there has been no significant change to the fair values as at 30 June 2025 to warrant another valuation.

National Bank of Rwanda
Notes to the financial statements
For the year ended 30 June 2025

25. Property and equipment (continued)

The external valuations of land and buildings were performed using market and cost approach respectively. Based on the external valuers' report, the finance team has determined these inputs based on the size, age and condition of the land and buildings, the state of the local economy and comparable prices in the corresponding national economy.

Information about fair value measurements

Description	Fair value at 30 June 2025 Frw' 000	Valuation technique(s)	Unobservable inputs
Buildings	21,702,671	**Cost approach**	Price per square metre
Land	13,648,529	**Market approach**	
	35,351,200

The Work In Progress (WIP) balance relates to costs incurred on the ongoing projects the Bank has embarked on in the year that include T24 upgrade Phase 2.
The intangible assets relate to the systems used by the Bank, as shown below:
ERP - BNR's financial reporting system that generates the General Ledger
RIPPS - a payment processing system. It handles clearing and settlement for Banks' transactions and all securities.
T24 - it is the core Banking system. It has an interface with RIPPS and ERP.
As at 30 June 2025, the Bank had the following projects ongoing to enhance the capability of the Banking systems; - T24 phase 2 upgrade that will enhance the Core Banking software, Cloud Service and Oracle and T24 SWAP Module

27. Other assets

	2025	2024
	Frw'000'	**Frw'000'**
Stock of consumables	159,199	127,325
Accrued revenue	427,643	673,350
Prepayments	5,137,828	10,058,701
Advance to suppliers and contractors	3,838,890	1,252,957
Deferred currency printing expenses	4,908,474	5,607,319
Other assets ECL	(987,933)	(1,604,143)
	13,484,101	**16,115,509**
At 1 July	**1,604,143**	**647,848**
Write back	(616,210)	956,295
As at 30 June	**987,933**	**1,604,143**

28. Currency in circulation

	2025	2024
	Frw'000'	**Frw'000'**
Notes and coins issued	596,677,239	469,310,893
Money in Reserve	(113,283,900)	(57,109,799)
	483,393,339	**412,201,094**

Notes and coins issued represent all the currency issued into circulation. Money in reserve represents currency issued into circulation but within BNR vault. While the two elements have been netted off to compute the currency in circulation as at 30 June 2025, it should be noted that the increase in current financial year is mainly due to demand of new legal tender following full re-opening of economy and replacement of old currencies in the financial year.

29. Government of Rwanda deposits

	2025	2024
	Frw'000'	**Frw'000'**
Government of Rwanda current accounts	492,408,367	417,170,311
Government of Rwanda's special deposits	23,534,153	23,366,149
Deposits for letters of credit and other commitment	57	93
Projects and GoR ministries' accounts	94,638,876	71,898,572
Local government deposits	21,794,491	33,923,676
Public institutions	2,361,282	3,244,624
Public service enterprises	7,329,498	5,467,000
Foreign currency accounts	51,300,736	27,314,918
	693,367,460	**582,385,343**

All government deposits are interest free.

30. Due to local financial institutions

	2025	2024
	Frw'000'	**Frw'000'**
Local currency deposits	516,153,085	380,140,962
Foreign currency deposits	355,823,906	306,415,208
Money Market Intervention	-	88,500,000
Due to commercial Banks on swaps contracts	322,818,574	287,545,055
	1,194,795,565	**1,062,601,225**

The effective interest rate on money market borrowings was 6.5% while BNR pays interest rate of 2% p.a for SWAPs contracts with commercial banks.

31. (a) Other liabilities

	2025 Frw'000'	2024 Frw'000'
Transitory accounts	67,554,840	6,674,736
Economic recovery fund	10,899,852	3,756,352
Sector recapitalization	4,097,069	4,097,069
Supplier payables accounts	20,032,675	10,741,533
Other payables accounts	2,600,629	2,167,686
Provision for Contingencies	2,000	2,000
Staff leave accrual	2,645,687	1,971,288
Dormant account funds in Frw	1,964,687	799,198
Death benefit fund	1,285,051	995,588
Statutory deductions payable	981,270	1,222,275
Commitment to the non-residents	230169	497,081
Staff deposits	536,923	361,121
Tax payable accounts	543,580	1,562,959
Rswitch Limited	197	233
	113,374,629	**34,847,119**

Supplier payables include accruals for expenses, staff bonus provision as well as provision on fees incurred to realize collaterals. Other payables balance incorporates balances held on closed accounts for institutions, BNR RIPPS clearing accounts and customer dormant accounts.

31. (b) Customer deposits

	2025 Frw'000'	2024 Frw'000'
Non statutory accounts	5,812,000	3,820,073
	5,812,000	**3,820,073**

The non-statutory accounts relate to various staff club accounts, deposit guarantee fund accounts and embassies deposits while the non-statutory dormant accounts transfers include dormant accounts transfers from commercial Banks.

32. Foreign liabilities

	2025 Frw'000'	2024 Frw'000'
Deposits in local currency	2,259,928	1,177,715
Deposits in foreign currency	1,372,900	1,943,088
	3,632,828	**3,120,802**

National Bank of Rwanda
Notes to the financial statements
For the year ended 30 June 2025

33. Share capital and reserves

(i)Share capital

	2025 Frw'000'	2024 Frw'000'
Authorized and fully paid-up share capital	**7,000,000**	**7,000,000**

There were no movements in share capital during the financial year.

(ii)Retained earnings

	2025 Frw'000'	2024 Frw'000'
Retained earnings	416,141,908	364,509,341
	416,141,908	**364,509,341**

The retained earnings are surpluses retained from operations after allocation to various funds, repayment of the loan to the government of Rwanda, payment of dividends and after adjusting for unrealised revaluation gains/losses to translation reserve.

(iii) Reserves

(a) General reserve

	2025 Frw'000'	2024 Frw'000'
At 1 July	**36,251,794**	31,898,470
Surplus appropriation to reserve	6,521,361	4,353,324
At 30 June	**42,773,155**	**36,251,794**

The general reserve fund is a fund into which at least 20% of the net annual surplus of the Bank is transferred at the end of each financial year. Net annual profit is surplus of the year after deduction of non-distributable income and expenses. This is after allowing for expenses for operation and after allowance has been made for bad and doubtful debts, depreciation of assets, contribution to staff benefit fund, and such other contingencies and provisions as the Bank deems appropriate. Determination of net annual profit for year is indicated on Note 38.

The reserves are available to be used to meet any future obligation of the Bank under its mandate.

(b) Other reserves

	2025 Frw'000'	2024 Frw'000'
Foreign exchange revaluation reserve	198,298,403	128,061,783
Staff welfare reserve	23,074,585	22,416,006
Land revaluation reserve	20,418,694	4,453,259
Building revaluation reserve	4,865,160	4,248,920
Government support for IT modernization	944,965	944,965
Fair valuation reserve for FVOCI financial assets	7,898,822	(32,813,115)
New Building Reserves	7,000,000	7,000,000
DT & Restructuring Reserves	5,000,000	-
	267,500,630	**134,311,819**

(c) Staff welfare reserve

The staff welfare reserve fund is a fund into which at least 15% of the net annual profits of the Bank is transferred at the end of each financial year including any interest income earned on staff loans. In the current year, no balance was transferred to the fund (2024: null since no balance transferred to this fund).

Interest income on staff loans for the year ended 30 June 2025 of **Frw '000' 355,794** (2024: **Frw '000' 302,785**) was also allocated to the staff welfare equity reserve as approved by the board in the prior periods, as it is not distributed.

Property and equipment revaluation reserve

The property and equipment revaluation reserve is a reserve into which revaluation gains or losses for buildings and land are transferred. The reserve is made up of the land revaluation reserve and the property revaluation reserve. It is the Bank's policy to revalue its land and buildings after every 5 years.

Fair value through other comprehensive income (FVOCI)

The fair value reserve is a reserve into which fair value movements on investment securities/ financial instruments held at Fair Value through other comprehensive income are transferred during the year. During the year, the reserve increased, due to fair valuation gains on internal portfolio.

	2025 Frw'000'	2024 Frw'000'
At 1 July	**(32,813,114)**	**(47,577,737)**
Fair valuation gain/(loss) on FVOCI financial assets	40,711,936	14,764,623
At 30 June	**7,898,822**	**(32,813,114)**

Foreign exchange revaluation reserve

A reserve where unrealized foreign exchange gains and losses on revaluation are transferred.
It's the Bank's policy to recycle the foreign exchange gains through the reserve as foreign assets are held to ensure their growth being the mandate of the Bank.

Gains or losses resulting from a revaluation of reserve exchange holdings or international commitments recorded in the balance-sheet of the Bank due to a revision of the foreign exchange system or a modification of the exchange value of the franc decided by the Government are transferred to a special account entitled "Revaluation Account".

If the revaluation account presents a credit balance at the end of the financial year, twenty percent (20%) shall be paid by the State. The Bank does not pay dividends out of exchange gains.

National Bank of Rwanda
Notes to the financial statements
For the year ended 30 June 2025

Government support for IT modernisation fund ("IT modernisation reserve")

The fund was created through an appropriation of surplus from prior periods by approval of the Board. The amount was used to support the IT modernisation plans of the Bank. The reserve account holds funds for IT modernisation projects anticipated by the Bank in the current drive of cashless economy and Fintech environment.

	2025 Frw'000'	2024 Frw'000'
At 1 July	1,208,312	1,208,312
Government support on IT modernization	(263,347)	(263,347)
At 30 June	**944,965**	**944,965**

34. Related party disclosures

Government of Rwanda is the sole shareholder and the ultimate controlling party. Based on the exemption under accounting standards, limited transactions and balances with government and government related parties have not been disclosed.

i) Transactions with key management personnel

Compensation

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the Bank. The Bank key management personnel are the Governor, Deputy Governor and Executive Directors. Key management personnel compensation comprised of the following:

	2025 Frw'000'	2024 Frw'000'
Short-term employee benefits	**2,395,264**	**1,973,038**

Loans to key management	2025 Frw'000'	2024 Frw'000'
At 1 July	**1,943,012**	**1,909,414**
New loans granted & reclassified during the year	628,653	175,000
Loans repaid during the year	(176,401)	(141,402)
As at 30 June	**2,395,264**	**1,943,012**

ii) Transactions with board of directors

	2025 Frw'000'	2024 Frw'000'
Fees to non-executive directors	43,653	42,224
	43,653	**42,224**

iii) Transactions with Government of Rwanda

Transactions entered into with the Government include:

- Banking services;
- Management of issuances and redemption of securities;
- Settlements and remittances in foreign currencies by order and/or in favor of the Government of Rwanda.
- Administering the Economic Recovery Fund
- Fund manager for the Deposit Guarantee Fund

	Note	2025	2024
		Frw'000'	Frw'000'
Government of Rwanda Eurobond investments	20	137,758,194	126,234,329
Government deposits	29	693,367,410	582,385,343
Interest income on Euro Bond investment	7	6,512,296	5,991,841
Interest income on loan due from Government of Rwanda	7	-	23,851

The National Bank of Rwanda did not pay interest on government deposits during either the current year or the prior year.

Economic Recovery Fund

	2025	2024
Off balance sheet	Frw '000'	Frw '000'
Economic Recovery Fund	**52,998,928**	**63,483,110**

In June 2020, the Government of Rwanda represented by MINECOFIN signed a Memorandum of Understanding with the National Bank of Rwanda (NBR) where NBR was given the mandate to manage the Economic recovery fund to support businesses impacted by the COVID-19 Outbreak. Supported businesses were in the following Windows; (a) Hotel refinancing, (b) Working Capital or line of Credit Window for Large and small and medium Enterprises (SMEs) and (c) Working Capital Window for micro business through Microfinance Institutions.

NBR is charged with operational management of the portfolio that includes disbursements and recovery from the commercial Banks that obtain the funds. Commercial Banks subsequently issue loans to their customers after credit appraisal processes. The credit risk is with the Commercial Banks and thus expected to follow the normal processes of loans disbursements. The fund has an oversight committee that sits in MINECOFIN and this is composed of MINECOFIN, MINICOM, Private Sector Federation (PSF), NBR, and Rwanda Bankers Association (RBA) among others. Since BNR is liaison in ensuring that the portfolio is managed as appropriate with the facilitation of the systems infrastructure, and barres no risk, is therefore seen as an agent and effectively reporting the portfolio business under the off balance sheet items of the Bank to ensure fair presentation of the Financial statements.

National Bank of Rwanda
Notes to the financial statements
For the year ended 30 June 2025

Economic Recovery Fund (Continued)

The movement analysis in the Fund is as follows:

	2025	2024
	Frw'000'	Frw'000'
At 1 July	**3,756,352**	17,751,205
Recovery from Commercial Banks	9,681,886	9,167,275
Accrued interest	460201	337,873
Repayments	(3,400,000)	(23,500,000)
At 30 June	**10,498,439**	**3,756,352**

During the year no commission earned on management of Economic Recovery Fund (2024: None)

Other related party transactions

	2025	2024
	Frw'000'	Frw'000'
Rental income from RSWITCH	78,698	18,013

35. Contingent liabilities and assets

There are no pending claims brought against the Bank as at 30 June 2025 (2024: -Null) that may raise a contingent liability to the National Bank of Rwanda. In addition, the Bank has taken to court various parties to recover money due to it, and as at the year end, the bank has two pending legal cases in which probable inflow of Frw 2,718,350 is expected. No amount has been booked as a receivable in respect of court cases considering that they are yet to be in status "virtually Certain".

36. Cash and cash equivalents for the purposes of the statement of cash flows

	2025	2024
	Frw'000'	Frw'000'
Cash	76,206,918	86,228,684
Current accounts	63,317,871	34,155,370
Fixed term deposits (up to 3 months)	423,942,934	394,554,615
	563,467,723	**514,938,669**

37. Commitments

The Bank had not entered into any commitments as at 30 June 2025 other than the ongoing projects which are captured under work in progress in the property and equipment. The table below summarizes the projects:

	2025	2024
	Frw'000	Frw'000
Software	81,004	3,349,258
Security equipment	69,307	128,545
Buildings	955,295	207,919
Machines	-	127,492
	1,105,606	**3,813,213**

38. Subsequent events

i) Appropriation of dividends

Subsequent to the year end, a meeting of the Board of Directors held and approved the following appropriation of the surplus for 2025.

Appropriation of surplus	**2025 Frw'000'**	**2024 Frw'000'**
Surplus for the year	**150,243,551**	**150,432,830**
Adjusted by:		
- Interest income on staff loans	(355,794)	(302,785)
- Net foreign assets exchange/revaluation (gains)/losses (note 11(a))	(70,236,620)	(104,764,791)
- Unrealized gains on investment securities (note 10 (c))	(19,154,953)	(12,758,448)
Net surplus for the year (less revaluation gain)	**60,496,184**	**32,606,806**
General Reserve Fund (20% of net surplus)	(12,099,237)	(6,521,361)
Net surplus after general reserve fund	**48,396,947**	**26,085,445**
Net payable	**48,396,947**	**26,085,445**
Board approved amount retained in retained earnings for other reserves	(9,074,428)	(4,891,021)
DT & Restructuring Reserves	-	(5,000,000)
Financial Sector Development	-	(6,000,000)
New Building Reserves	(10,000,000)	-
Currency Printing Cost	(8,000,000)	-
Cash Processing Machine Upgrade Project	(3,000,000)	-
Dividends distribution after retained reserves	**18,322,520**	**10,194,424**

There are no other significant subsequent events that require disclosure or adjustment to the financial statements.

National Bank of Rwanda
Notes to the financial statements
For the year ended 30 June 2025

Sustainability and Corporate Social Responsibility (CSR) Disclosure

(Unaudited Supplementary Information)

In alignment with **IFRS S1**: General Requirements for Disclosure of Sustainability-related Financial Information and **IFRS S2**: Climate-related Disclosures, the Bank has begun integrating sustainability and CSR reporting into its annual financial reporting framework.
The following disclosures highlight the Bank's key environmental, social, and governance (ESG) initiatives and progress toward national and international sustainability objectives during the financial year ended 30 June 2025.
(The information below is supplementary to the audited financial statements and has not been subject to audit.)

IFRS S1 and S2 begun to be adopted by National Bank of Rwanda in financial year 2024-2025. The Bank has undertaken various initiatives in line with the adoption of the sustainability standards during the financial year as highlighted below;

I. Non-use of plastics initiatives

As part of its broader environmental strategy, the National Bank of Rwanda has committed to progressively eliminating single-use plastics from its operations (Offices, events, procurements, etc. The Management and Board of Directors of the Bank view the non-use of plastics as an opportunity to reduce waste management costs and support national sustainability goals.

This initiative supports the NBR's green central banking ambition and aligns with the government of Rwanda's targets for reducing plastic waste. The Bank evaluated alternative materials, such as reusable ones, and prioritized those that were compatible with operational needs. Over the transition period, the Bank will phase out plastic items in a staged manner, prioritizing high-volume use items first.

II. Waste management – cash shredding

As part of its environmental sustainability and waste management framework, the Bank continued to implement responsible disposal practices for unfit and withdrawn banknotes through a secure cash shredding process. The initiative aims to ensure that currency destruction is carried out in a manner that safeguards both environmental integrity and operational security.

During FY2024-25, all unfit currency notes were shredded using energy-efficient equipment designed to minimize dust and emissions. The resulting paper residue was safely stored and later disposed of through environmentally approved channels.

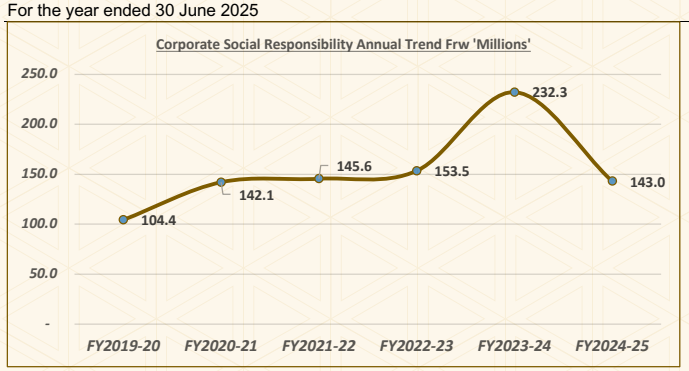
III. This initiative supports the Bank's commitment to sustainable waste management by reducing landfill disposal and promoting resource recovery. Electronic waste disposal through public auction

The Bank implemented responsible electronic waste disposal practices through transparent public auctions. This initiative ensures that obsolete electronic equipment, such as computers, printers, and mobile devices, is disposed of in an environmentally sound manner.

IV. During FY2024-25, the Bank conducted five public auctions for the disposal of decommissioned IT and office equipment, ensuring compliance with national waste management regulations.

V. Corporate Social Responsibility (CSR)

The Board of Directors of the Central Bank oversees Corporate Social Responsibility (CSR) initiatives as part of its mandate on sustainability and financial stability. Over the 6-year trend, the Bank contributed FRW 920 million to the community under its CSR program, as reflected on the graph:



VI. Green Procurement initiatives

The Bank is strengthening its commitment to environmental sustainability by reviewing and updating its procurement policy to a Green Procurement Policy that promotes the purchase of environmentally friendly and resource-efficient goods and services. The initiative ensures that procurement decisions incorporate sustainability criteria, including energy efficiency, recyclability, reduced carbon footprint, and ethical sourcing.

VII. Bank Premises greening initiatives (Gardening etc)

In pursuit of its sustainability goals, the Bank intensified its initiatives to green its premises, aiming to minimize environmental impact and enhance resource efficiency. During FY2024-25, the bank started using some of the solar lights and has enough green space. These actions demonstrate the Bank's commitment to reducing operational emissions and fostering a green and healthy workplace environment.

VIII. Staff loan Financing (Electric, Hybrid vehicles)

The Bank's car loan financing program aims to promote sustainable mobility by offering preferential lending for electric and hybrid vehicles, thereby contributing to the reduction of financed CO_2 emissions and supporting Rwanda's low-carbon transport agenda.

During the reporting year, total car loans amounted to RWF 2.8 billion, representing 20% of total lending. Of this, RWF 913.9 million (40%) was financed for low-emission or hybrid vehicles under the Bank's Green Mobility Initiative.

The Bank recognizes the transition risk associated with financing fuel vehicles. Climate risk assessments will be integrated into the credit approval process to ensure long-term portfolio resilience and stability. The transition to electric vehicles presents opportunities for growth in green retail finance.

Research, Capacity Building & International Cooperation

Capacity Building initiatives

The National Bank Board oversees initiatives to strengthen institutional and community capacity in financial and environmental matters. Senior management is accountable for implementing training programs, policy dialogues, and stakeholder engagement. Oversight includes periodic reporting to the Board on progress, alignment with national development strategies, and contribution to resilience of the financial system."

National Bank of Rwanda
Notes to the financial statements
For the year ended 30 June 2025

The bank conducts training on three key aspects, including business continuity initiatives, sustainability-related training, and training for external stakeholders to promote financial inclusion. During the financial year ended on June 30, 2025, the Bank conducted three (3) training sessions for staff members in leadership roles, one hundred forty (140) trainings for staff members in other roles, and one hundred and one trainings (101) for members of professional bodies.
The board provides oversight of workforce sustainability, including capacity building, training, and staff retention strategies, as evidenced by the very low staff turnover rate of 2.79% over the last six years.

The Bank has implemented diverse **Corporate Social Responsibility (CSR) and sustainability initiatives** that directly support the United Nations Sustainable Development Goals (SDGs). These initiatives demonstrate commitment to inclusive growth, social development, and long-term sustainability.

S/N	Sustainable Development Goals (SDGs)	Relevant Bank Initiatives
1	**SDG 1 – No Poverty**	• Financing construction of houses for vulnerable communities (Impinganzima Project). • Payment of community health insurance (*mutuelle*) for vulnerable people in Bumbogo.
2	**SDG 2 – Zero Hunger**	• Support to Solid Africa NGO for agricultural support for washing stations in quest for improved output and nutritional support.
3	**SDG 3 – Good Health and Well-Being**	• Health and safety initiatives during COVID-19 pandemic. • Construction and equipping of Mvuzo health post (Bumbogo & Gasabo).
4	**SDG 4 – Quality Education**	• Support to Early Childhood Development (ECD). • Financial literacy & inclusion programs. • Awards to promote learning and innovation (cash, bonds, laptops, phones).
5	**SDG 5 – Gender Equality**	• Gender-focused financial literacy initiatives. • Financing of diversity & leadership programs.
6	**SDG 8 – Decent Work and Economic Growth**	• General financial literacy and inclusion programs. • CSR sensitization workshops (with Forex Bureaus Association).
7	**SDG 9 – Industry, Innovation and Infrastructure**	• Support to City of Kigali construction project. • Community infrastructure projects (Unit Club construction).
8	**SDG 11 – Sustainable Cities and Communities**	• Community development support through *Umuganda* activities
9	**SDG 12 – Responsible Consumption and Production**	• CSR awareness campaigns on sustainability.
10	**SDG 16 – Peace, Justice and Strong Institutions**	• Sponsorship of Kwibuka remembrance program.

(*) Calculated by summing all ODCs deposits and loan to ODCs in the consolidated sectoral balance sheet

(**) Includes both central government and local government, but excludes Social Security Fund

(***) Other assets are adjusted with the difference between ODCs positions at the central bank and their own records

Note that ODCs include:

(1) BHR from December 2005 to November 2011

(2) UOB since August 2007

(3) CCP (Comptes Cheques Postaux) between December 2008 and November 2011

(4) KCB since January 2009

(5) ZIGAMA-CSS since December 2009

(6) UNGUKA and Bank of Africa (BOA) since November 2011

(7) EQUITY since December 2011

(8) AB Bank since January 2014

(9) NCBA (formerly named CRANE Bank) since August 2014

(10) BRD Commercial since March 2015 to June 2016

(11) KCB merged with BPR to become BPR Bank Rwanda since April 2022

(12)Equity merged with Cogebanque since

NOTES: The current appendices are in BPM6 format and some differences in the historical data especially on services have come about because of improved coverage as well as changes in source data, BMP6 recommends survey based data and in this case , some services line items have been updated with the survey data.

other sources of differences are different adjustments i.e adjustment for coverage, classification, and for timing as recommended by BPM6 and IMTS 2010.
